**Imagining Ireland Abroad, 1904-1945** Lili Zách, 2021-07-29 Offering a unique account of identity formation in Ireland and Central Europe, this book explores and contextualises transfers and comparisons between Ireland and the successor states of the Austro-Hungarian Empire. It reveals how Irish perceptions of borders and identities changed after the (re)birth of the small states of Austria, Hungary and Czechoslovakia and the creation of the Irish Free State. Adopting a transnational approach, the book documents the outward-looking attitude of Irish nationalists and provides original insights into the significance of personal encounters that transcended the borders of nation-states. Drawing on a wide range of official records, private papers, contemporary press accounts and journal articles, *Imagining Ireland Abroad, 1904-1945* bridges the gap between historiographies of the East and West by opening up a new perspective on Irish national identity.

**The Admirals** Walter R. Borneman, 2012-05-01 How history's only five-star admirals triumphed in World War II and made the United States the world's dominant sea power. Only four men in American history have been promoted to the five-star rank of Admiral of the Fleet: William Leahy, Ernest King, Chester Nimitz, and William Halsey. These four men were the best and the brightest the navy produced, and together they led the U.S. navy to victory in World War II, establishing the United States as the world's greatest fleet. In *THE ADMIRALS*, award-winning historian Walter R. Borneman tells their story in full detail for the first time. Drawing upon journals, ship logs, and other primary sources, he brings an incredible historical moment to life, showing us how the four admirals revolutionized naval warfare forever with submarines and aircraft carriers, and how these men—who were both friends and rivals—worked together to ensure that the Axis fleets lay destroyed on the ocean floor at the end of World War II.

The New Technology Elite Vinnie Mirchandani, 2012-03-27 How-to guidance for optimizing incumbent technologies to deliver a better product and gain competitive advantage Their zip codes are far from Silicon Valley. Their SIC codes show retail, automobile or banking. But industry after industry is waking up to the opportunity of smart products and services for their increasingly tech-savvy customers. Traditionally technology buyers, they are learning to embed technology in their products and become technology vendors. In turn, if you analyze Apple, Google, Amazon, Facebook, Twitter and eBay, you marvel at their data centers, retail stores, application ecosystems, global supply chains, design shops. They are considered consumer tech but have better technology at larger scale than most enterprises. The old delineation of technology buyer and vendor is obsolete. There is a new definition for the technology elite - and you find them across industries and geographies. The 17 case studies and 4 guest columns spread through The New Technology Elite bring out the elite attributes in detail. Every organization will increasingly be benchmarked against these elite - and soon will be competing against them. Contrasts the productivity that Apple, Google and others have demonstrated in the last decade to that of the average enterprise technology group Reveals how to leverage what companies have learned from Google, Apple, Amazon.com, and Facebook to your company's advantage Designed for business practitioners, CEOs, CFOs, CIOs, technology vendors, venture capitalists, IT consultants, marketing executives, and policy makers Other titles by Vinnie Mirchandani: The New Polymath: Profiles in Compound-Technology Innovations If you're looking to encourage technology innovation, look no further. The New Technology Elite provides the building blocks your company needs to become innovative through incumbent technologies.

**Rethinking the World Trade Order** Mohammad F. A. Nsour, 2010 Regional Trade Agreements (RTAs) have proliferated at an unprecedented pace since the creation of the World Trade Organization (WTO). Although the WTO legally recognizes countries' entitlement to form RTAs, neither the WTO nor parties to RTAs have an unequivocal understanding of the relationship between the WTO and RTAs. In other words, the legal controversies, the result of uncertainty regarding the application of the WTO/GATT laws, risk undermining the objectives of the multilateral trade system. This research tackles a phenomenon that is widely believed to be heavily economic and political. It highlights the economic and political aspects of regionalism, but largely concentrates on the legal dimension of regionalism. The main argument of the book is that the first step to achieving harmony between multilateralism and regionalism is the identification of the legal uncertainties that regionalism produces when countries form RTAs without taking into account the substantive and procedural aspect of the applicable WTO/ GATT laws. The book calls for the creation of a legal instrument (i.e. agreement on RTAs) that combines all of the applicable law on RTAs, and simultaneously clarifies the legal language used therein. Likewise, the WTO should have a proactive role, not merely as a coordinator of RTAs, but as a watchdog for the multilateral system that has the power to prosecute violating RTAs. The author is aware that political concerns are top priorities for governments and policy makers when dealing with the regionalism problematic. Hence, legal solutions or proposals are not sufficient to create a better international trade system without the good will of the WTO Members who are, in fact, the players who are striving to craft more regional trade arrangements.

Grand Delusion Steven Simon, 2023-04-11 A longtime American foreign policy insider's penetrating and definitive reckoning with this country's involvement in the Middle East—and its bitter end The culmination of almost forty years at the highest levels of policymaking and scholarship, Grand Delusion is Steven Simon's tour de force, offering a comprehensive and deeply informed account of U.S. engagement in the Middle East. Simon begins with the Reagan administration, when American perception of the Middle East shifted from a cluster of faraway and frequently skirmishing nations to a shining, urgent opportunity for America to (in Reagan's words) "serve the cause of world peace and the future of mankind." Reagan fired the starting gun on decades of deepening American involvement, but as the global economy grew, bringing an increasing reliance on oil, U.S. diplomatic

and military energies were ever more fatefully absorbed by the Middle East until the Obama administration and its successors finally sought to disentangle America from the region. *Grand Delusion* explores the motivations, strategies, and shortcomings of each presidential administration from Reagan to today, exposing a web of intertwined events—from Lebanese civil conflict to shifting Iranian domestic politics, Cold War rivalries, and Saudi Arabia’s quest for security to 9/11 and the war on terror—managed by a Washington policy process frequently ruled by wishful thinking and partisan politics. Simon’s sharp sense of irony and incisive writing bring a complex history to life. He questions the motives behind America’s commitment to Israel; explodes the popular narrative of Desert Storm as a “good war”; and calls out the devastating consequences of our mistakes, particularly for people of the region trapped by the onslaught of American military action and pitiless economic sanctions. *Grand Delusion* reveals that this story, while episodically impressive, was too often tragic and at times dishonorable. As we enter a new era in foreign policy, this is an essential book, a cautionary history that illuminates American’s propensity for self-deception and misadventure at a moment when the nation is redefining its engagement with a world in crisis.

*Life Sciences Research to Product Development* Pronobesh Chattopadhyay, Danswring

Goyary,2024-03-07 The present volume, *Life Sciences Research to Product Development: Regulatory Requirement Transforming, Volume 1*, discusses the procedures of drug approval and regulatory requirements that must be met according to the United States Food and Drug Administration (US FDA), the European Medical Agency (EMA), and the Central Drug Standard Control Organization (CDSCO). Many researchers either abandon their work in the middle of the process or find it difficult to follow the rules. Therefore, it is not surprising that any biological researcher associated with drug

development should have a thorough understanding of regulatory requirements. This volume incorporates all the requisite regulatory norms and provides the latest information on the mandated regulation of herbal medicines. The book covers other obligatory regulatory requirements such as: The legal method and practice of herbal drug products, the roles of Ayurvedic medicines, and the process to obtain regulatory approval. Drug molecules not included in Department of Ayurveda, Yoga, Naturopathy, Unani, Siddha, and homeopathy (AYUSH) but referred to as phytopharmaceuticals are also considered new drugs. The boundary line between food and herbal pharmaceuticals is discussed, as well as pre-clinical toxicity testing, clinical trials, and stability studies in accordance with the rules. The chapter on regulatory implications for the approval process in this book will be the most useful resource for researchers and students, particularly those with backgrounds in pharma, forensic medicine, or regulatory affairs, or those who aspire to succeed in drug research. Additionally, the information contained in this volume of the book could be of great interest to researchers working in the herbal drug industry.

**International Environmental Law and Asian Values** Roda Mushkat,2004 Following decades of vigorous economic expansion, Asia is confronting the environmental consequences of unfettered development. This poses a challenge because of the strong bias of prevailing cultural systems in the region toward the goal of lifting standards of living over achieving ecological sustainability. This book juxtaposes international environmental norms and practices with relevant Asian policies and their applications in key areas. Roda Mushkat examines the fundamental principle of public participation in environmental law-making, as well as the rights approach, against the emergence of democratic and human rights norms in the region. The complex relationship between trade and the environment is also discussed in light of the strong regional emphasis on economic growth, trade liberalization, and the aversion to conditionalities. Given regionalization processes in Asia-Pacific and elsewhere, this work seeks to establish to what extent such processes have led to the regionalization of international environmental law. *International Environmental Law and Asian Values* concludes that, although some gaps can be identified between international imperatives and regional responses, Asian values have not proved to be an insurmountable barrier to the spread of international environmental legal ideas. On the whole, the region is responding to impulses emanating from the global arena rather than resisting them consciously. The analysis and conclusions of this comprehensive and original work will be of considerable interest to scholars of international law and relations, environmental policy, comparative culture, economic development, and social change.

Lens, Laboratory, Landscape Claudia Schaefer,2014-08-26 An interdisciplinary study of the rise of empirical observation in the Spanish arts and sciences as the principle vehicle for acquiring knowledge about the natural world. *Lens, Laboratory, Landscape* focuses on competing views about the power of vision in Spain between the 1830s and the 1950s. The photographic lens, laboratory microscope, “retinal vision” of philosopher José Ortega y Gasset, and the topographical studies of Manuel de Terán are woven together in and around a European cultural milieu that gave observation primacy. For once, Spain—now bereft of its empire—was not on the outside of such debates. Whether in the laboratory, family home, darkroom, art gallery, or on the road, in Cuba or Zaragoza, Madrid or Massachusetts, Spanish artists and scientists were engaged with the social and economic power of observation at a time when the speed of modern life made observing a challenge. Claudia Schaefer brings the technologies of the eye—photograph, microscope, lens, tools for land surveying—to light as markers on the nation’s touted path to modernity. Claudia Schaefer is Rush Rhees Chair, Professor of Spanish and Comparative Literature, and Professor of Film and Media Studies at the University of Rochester. She is the author of several books, including *Bored to Distraction: Cinema of Excess in End-of-the-Century Mexico and Spain*, also published by SUNY Press.
