The Goldwatcher John Katz, Frank Holmes, 2009-08-18 Why did the price of gold hit record highs in 2008? Take a look at the headlines - government bailouts of failed banks, mortgage and credit crises, rising inflation, slowing growth and global insecurity. In order to protect themselves from treacherous financial markets and depreciated paper currencies investors worldwide are turning to gold. Gold has long been used as money and as a store of wealth, but what's the source of its value? Why does that value sometimes rise so high and at other times fall so low? And what do we know

about gold's complex and often tumultuous past that may yield clues about how it may behave in the future? Gold is a side show on a world financial stage dominated by the dollar. The tail can't wag the dog -gold prices are affected by changes in prospects for the dollar and not vice versa. With uncertain outcomes for the American and global economies, gold's stateless money franchise makes this book compelling reading. John Katz is a clear eyed independent strategist and analyst with an extraordinary ability to get to grips with subjects ranging from biotechnology via alternative energy to commodities and gold. Uniquely for a commentator on gold he has no dogmas. To assess the risks and rewards that come with owning gold he introduces opinions from an impressive range of commentators, examines different scenarios that may play out on the world economic stage and highlights situations when owning gold makes sense and when it doesn't. To complete the picture Frank Holmes's contribution to *The Goldwatcher* explains the risks and rewards. *The Goldwatcher* has been written for 21st century investors. It will be an indispensable resource for responsible people from institutional money managers to private savers - whether the gold price moves up, down, or sideways. —Patrick H. Spencer, Managing Director, Head of Institutional Sales, Robert W. Baird Limited, London Frank Holmes's stellar track record as a resource portfolio manager is a clear reflection of his understanding of the business, the markets and the factors that affect them. His success is as much about unearthing value as it is about creating an investment process that is religiously followed. If you want to succeed in your resource investment, this book is a must. It's all the more enjoyable because the writing style is easy-going, clear and understandable. —Pierre Lassonde, Former chairman, World Gold Council, and past president, Newmont Mining Corp This book is also supported by *The Goldwatcher* blog - <http://www.thegoldwatcher.com>, which addresses news and developments affecting gold and the dollar, updates statistical information and links with sources for data and commentary.

Legal Knowledge Representation: Automatic Text Analysis in Public International and European Law

Erich Schweighofer, 1999-10-19 This volume is a presentation of all methods of legal knowledge representation from the point of view of jurisprudence as well as computer science. A new method of automatic analysis of legal texts is presented in four case studies. Law is seen as an information system with legally formalised information processes. The achieved coverage of legal knowledge in information retrieval systems has to be followed by the next step: conceptual indexing and automatic analysis of texts. Existing approaches of automatic knowledge representations do not have a proper link to the legal language in information systems. The concept-based model for semi-automatic analysis of legal texts provides this necessary connection. The knowledge base of descriptors, context-

sensitive rules and meta-rules formalises properly all important passages in the text corpora for automatic analysis. Statistics and self-organising maps give assistance in knowledge acquisition. The result of the analysis is organised with automatically generated hypertext links. Four case studies show the huge potential but also some drawbacks of this approach.

Legitimacy of China's Counter-Terrorism Approach Chi Zhang,2022-09-12 This book examines how the Chinese Communist Party (CCP) has sought to legitimise its counter-terrorism strategy in the eyes of its domestic and international audiences. An important element of CCP policy in Xinjiang has been the deployment of ordinary Chinese citizens, or the 'mass line,' to create new realities on the ground. This book explores how the history of ideological struggle in the PRC has taken on new characteristics, as well as offering insight into how the CCP has maintained legitimacy in the eyes of its population, even as it pursues policies which are internationally controversial, shedding light on the past and future of the behaviour of the Chinese state, a subject of interest to China scholars, scholars of the Belt and Road, and counter-terrorism experts.

UN-ASEAN Coordination Guangyu Qiao-Franco,2023-02-14 Despite the high frequency of their interactions, the policy coordination process between the United Nations (UN) and the Association of Southeast Asian Nations (ASEAN) has been underexamined in global and regional governance and ASEAN studies literature. To chart this important terrain, this incisive book contributes to scholarship by investigating UN-ASEAN policy coordination in the case of trafficking in persons (TIP).

The Great Eagles Michael O'Neal Campbell, 2022-05-19 This book examines the current literature and knowledge on the evolution and ecology of all the birds named as eagles, with particular emphasis on the larger species. It also examines the past and current relations between eagles and people, including habitat change and conservation issues. Eagle ecologies and conservation are currently seriously impacted by human activities such as industrialization, urbanization, pollution, deforestation and hunting. Some eagle species have consequently experienced extreme population changes. There are, however, some positive developments. Eagles have a strong, historic bond with human civilization, due to their status as the world's most charismatic birds. Conservation policies have also been successful in repopulating some ecosystems with breeding eagles. Therefore, despite the complexity of this relationship, there may yet be hope for this unique species group, frequently rated as the kings of birds, and symbolic of human power, ambition, royalty, nationality, and even concepts of God. It is hoped that this book will contribute to the further understanding of these unique and fantastic birds.

Cambodia's Neoliberal Order Simon Springer, 2010-07-02 Neoliberal economics have emerged in the post-Cold War era as the predominant ideological tenet applied to the development of countries in the global south. For much of the global south, however, the promise that markets will bring increased standards of living and emancipation from tyranny has been an empty one. Instead, neoliberalisation has increased the gap between rich and poor and unleashed a firestorm of social ills. This book deals with the post-conflict geographies of violence and neoliberalisation in Cambodia. Applying a geographical analysis to contemporary Cambodian politics, the author employs notions of neoliberalism, public space, and radical democracy as the most substantive components of its theoretical edifice. He argues that the promotion of unfettered marketisation is the foremost causal factor in the country's inability to consolidate democracy following a United Nations sponsored transition. The book demonstrates Cambodian perspectives on the role of public space in Cambodia's process of democratic development and explains the implications of violence and its relationship with neoliberalism. Taking into account the transition from war to peace, authoritarianism to democracy, and command economy to a free market, this book offers a critical appraisal of the political economy in

Cambodia.

The Myth of America's Decline: Politics, Economics, and a Half Century of False Prophecies Josef Joffe, 2013-11-04 “A bracing and intelligent reminder that, for all its woes, America remains extraordinarily dynamic, innovative, and resilient.”—Fareed Zakaria Hailed by the Wall Street Journal as one of the best books of 2013, *The Myth of America's Decline* is a highly provocative look at how the United States, for all its failings, continues to be the leading business, political, and intellectual model for all other nations. In a world where America bashers constantly chortle that the United States is in decline, Josef Joffe, using lively historical examples and empirical economic models, demonstrates that these doomsday contentions are flawed, and that America—even when compared with a resurgent China—is the land where the future is being born.

Beyond Settlement Vanessa E. Shields, Nicholas Baldwin, 2008 Political, ideological, and ethnic conflicts have resulted in countless deaths, the creation of millions of refugees, the destruction of livelihoods, and widespread human suffering, to say nothing of the economic destruction. This book examines institution building and security sector reform in conflict states by analyzing eighteen case studies covering eleven countries and six decades. With regard to institution building, there is an analysis of four democratic levers—elections, the legislature, the executive, and devolution—focusing on how the structure and function of these political institutions contribute to the management and reduction of conflict and to the consolidation of fragile democracies. Concerning security sector reform, there is an analysis of how military, police, and intelligence institutions are reformed in states that are coming out of conflict—states that are moving beyond settlement. Some of the conflicts in this study are ongoing (Palestine), while others have been resolved (Spain, South Africa), while still others are in a

peace-building or immediate post-conflict stage (Northern Ireland).

Cinema of the Arab World Terri Ginsberg, Chris Lippard, 2020-03-03

This volume engages new films and modes of scholarly research in Arab cinema, and older, often neglected films and critical topics, while theorizing their structural relationship to contemporary developments in the Arab world. The volume considers the relationship of Arab cinema to transnational film production, distribution, and exhibition, in turn recontextualizing the works of acknowledged as well as new directorial figures, and country-specific phenomena. New documentary and experimental practices are referenced and critiqued, while commercial cinema is covered both as an industrial product and as one of several instances of contestation. The volume thus showcases the breadth and depth of Arab film culture and its multilayered connections to local conditions, regional affiliations, and the tendencies and aesthetics of global cinema.

Latino Immigrants and the Transformation of the U.S. South Mary E. Odem, Elaine Cantrell Lacy, 2009 The Latino population in the South has more than doubled over the past decade. The mass migration of Latin Americans to the U.S. South has led to profound changes in the social, economic, and cultural life of the region and inaugurated a new era in southern history. This multidisciplinary collection of essays, written by U.S. and Mexican scholars, explores these transformations in rural, urban, and suburban areas of the South. Using a range of different methodologies and approaches, the contributors present in-depth analyses of how immigration from Mexico and Central and South America is changing the South and how immigrants are adapting to the southern context. Among the book's central themes are the social and economic impact of immigration, the resulting shifts in regional culture, new racial dynamics, immigrant incorporation and place-making, and diverse southern responses to Latino newcomers. Various chapters explore ethnic and racial tensions among poultry workers in rural Mississippi and forestry workers in Alabama; the "Mexicanization" of the urban landscape in Dalton, Georgia; the costs and benefits of Latino labor in North Carolina; the challenges of living in transnational families; immigrant religious practice and community building in metropolitan Atlanta; and the creation of Latino spaces in rural and urban South Carolina and Georgia.
