Visions of the Apocalypse Wheeler Winston Dixon,2003-09-17 Visions of the Apocalypse examines the cinema's fascination with the prospect of nuclear and/or natural annihilation, as seen in such films as Saving Private Ryan, Bowling for Columbine, We Were Soldiers, Invasion U.S.A., The Last War, Tidal Wave, The Bed Sitting Room, The Last Days of Man on Earth and numerous others. It also considers the ways in which contemporary cinema has become increasingly hyper-conglomerated, leading to films with ever-higher budgets and fewer creative risks. Along the way, the author discusses such topics as the death of film itself, to be replaced by digital video; the political and social tensions that have made these visions of infinite destruction so appealing to the public; and the new wave of Hollywood war films, coupled with escapist comedies, in the post-9/11 era. Encompassing both questions of physical and filmic mortality Visions of the Apocalypse is a meditation on the questions of time, memory and the cinema's seemingly unending appetite for spectacles of destruction.

**Asian Regionalism in the World Economy** Masahiro Kawai,Jong-Wha Lee,Peter A. Petri,2010-01-01 The structure and policy architecture of the world economy, as it emerges from the historic challenges now underway, will be affected by the dramatic rise of Asian economies and deepening connections among them. This important book examines the dramatic transformation of the Asian economy, the challenges it faces, emerging regional solutions, and how Asia can play a more constructive role in the global economy. Asia is becoming not just the world's factory, but also its leading creditor, and one of its key sources of dynamism and stability. Key questions are identified and addressed in three areas: Asia's growth and productivity, financial stability, and regional economic integration. In each of these areas, the contributing authors evaluate current trends and the forces shaping the future. They consider whether the regions progress is sustainable and what it will take to make it so. How is Asia reshaping its economy in response to the changing global landscape? More urgently, how can Asia weather the severe, global financial and economic stormoriginating from the global credit crisis? How will it extend its gains to people left behind? And how can it contribute to better governance and greater prosperity in the world economy? This book covers new ground by connecting theory, assembling detailed evidence on trends and challenges, and offering forwardlooking policy prescriptions. This timely book will appeal to Asian economic policymakers as well as postgraduate students interested in Asian economics, international economics and regional integration. Staff of international and regional organizations interested in Asian economics will also find this book invaluable.

Governance and Regionalism in Asia Nicholas Thomas,2009-01-13 In the decade since the Asian financial crisis the ten states of Southeast Asia that form ASEAN, together with China, Japan and South Korea have formed the basis of a community intended to support the well-being of its member states, markets and peoples. This highly successful regionalisation was not anticipated by the region's leaders, however, and as a result, policy makers are increasingly talking about 'meeting fatigue' and the need to find a better way to govern regional affairs. Among the reforms being considered is a shift towards a more rules-based culture as well as the more explicit incorporation of both private sector and civil society organisations into the policy processes. In short, ASEAN+3 is seeking to develop new norms and processes for its networks and institutions. This book explores the pressures currently influencing East Asian regionalist policy debates, analysing the trend towards deeper integration and the emergence of a governance model for managing regional processes. Combining state and subnational perspectives in conjunction with an examination of the role of the business community and civil society organisations, this book highlights the policy challenges confronting regionalism and governance in East Asia, including key issues such as the rule of law, financial cooperation and a case study on disaster management.

**Survival October-November 2021: The Limits of Power** The International Institute for Strategic Studies (IISS),2023-04-21 Survival, the IISS's bimonthly journal, challenges conventional wisdom and brings fresh, often controversial, perspectives on strategic issues of the moment. In this issue: · Anatol Lieven argues that realist support for prudence and restraint in foreign policy does not equate to chauvinism, isolationism and opposition to international cooperation · Toby Dodge assesses that the United States' attempt to comprehensively transform Afghanistan was based on its erroneous presumption that the liberal-peacebuilding model was universally applicable · Audrey Kurth Cronin contends that the logic of fighting terrorists far from the US homeland no longer holds, as the US faces resource constraints and rising domestic terrorism · Jens Ringsmose and Sten Rynning analyse the potential priorities and scope of NATO's next Strategic Concept, and how it can bridge the Alliance's political-military divide And eight more thought-provoking pieces, as well as our regular Book Reviews and Noteworthy column. Editor: Dr Dana Allin Managing Editor: Jonathan Stevenson Associate Editor: Carolyn West Assistant Editor: Jessica Watson

*Memorials to Shattered Myths* Harriet Senie,2016 Although radically different, the Vietnam War, the Oklahoma City bombing, the Columbine High School shootings, and the attacks of 9/11 all shattered myths of national identity. Vietnam was a war the United States didn't win; Oklahoma City revealed domestic terrorism in the heartland; Columbine debunked legends of high school as an idyllic time; and 9/11 demonstrated U.S. vulnerability to international terrorism.

*China, India and the International Economic Order* Muthucumaraswamy Sornarajah,Jiangyu Wang,2010-08-26 With contributions by a variety of internationally distinguished scholars on international law, world trade, business law and development, this unique examination of the roles of China and India in the new world economy adopts the perspectives of international economic law and comparative law. The two countries are compared with respect to issues concerning trade and development, the World Trade Organization, international dispute settlement, regional/free trade agreements, outsourcing, international investment, foreign investment, corporate governance, competition law and policy, and law and development in general. The findings demonstrate that, though their domestic approaches to

economic issues diverge, China and India adopt similar stances at the international level on many major issues, recapturing images which existed during the immediate post-colonial era. Cooperation between China and India could provide leadership in the struggle for economic development in developing countries.

**Microbiome Drivers of Ecosystem Function** Javid A. Parray,Nowshen Shameem,Dilfuza Egamberdieva,2024-01-01 Microbiome Drivers of Ecosystem Function focuses on the advancements in microbial technologies towards harnessing the microbiome for improved crop productivity and health that are at the frontier of agricultural sciences. It provides insights into the diversity of endophytic microbiomes and their potential utility in agricultural production.Increased crop yield through chemical interventions have limit thresholds and alternative, natural and/or integrated approaches are increasingly needed. Microbial inoculants among the ways in which food production efficiency can be improved. Plant growth-promoting soil organisms increase net crop uptake of soil nutrients, resulting in larger crops and higher yields of harvested food. These and other symbiotic associations between plants and microbes can ultimately be exploited for the increased food production necessary to feed the world, in addition to creating safer farming techniques that minimize ecological disruption.As a volume in the Microbiome Research in Plants and Soil series, Microbiome Drivers of Ecosystem Function serves as an ideal reference for researchers and students in the fields of agricultural biotechnology, biochemistry, environmental science, plant biology, agricultural sciences, and agricultural engineering. Provides insights on engineered microbes in sustainable agriculture, recent biotechnological developments, and future prospects Introduces microbes as chief ecological engineers in reinstating equilibrium in degraded ecosystems Presents the current state and development, as well as future challenges in studying plant-microbe interactions Discusses endophytic microbiomes and other microbial consortium with multifunctional plant growth-promoting attributes

**Business Under Crisis, Volume III** Demetris Vrontis,Alkis Thrassou,Yaakov Weber,S. M. Riad Shams,Evangelos Tsoukatos,Leonidas Efthymiou,2022-01-07 From recurring episodes of great depression, oil crises, political crises, wars, debt crises, to the ongoing climate change, there is a constant pressure on businesses to cope with critical events. However, throughout history, crises have been pivotal in advancing businesses and societies. This contributed volume approaches crisis not simply as a source of problems, but also as a set of choices. It seeks to explore critical events as possible opportunities for sustainability, through process improvement, creativity, innovation and entrepreneurship. Chapters reveal that times of crisis provide opportunities for new start-ups, creativity, resilience, organisational change, and revitalisation. This book also emphasises the importance of sustainability, driven either by the market or as a response to critical events. Within the wider attempt to explore avenues for Innovation, Entrepreneurship and Sustainability at times of crisis, the book is loosely organised in three thematic sections: organisational responses to crisis; digitisation, and how technology facilitates or hinders sustainability under conditions of crisis; and SMEs, Family Firms (FF), Entrepreneurship, which explores how critical events offer opportunities for innovation.

Es este un tema un tanto descuidado por la teoría de los derechos, tradicionalmente inclinada a poner mayor énfasis en el tema del reconocimiento de los derechos y de la habilitación de mecanismos de garantía que, sin embargo, no siempre resultan idóneos a la obtención del objetivo propuesto.
