**Mental Disability and the Death Penalty** Michael L. Perlin,2013 Michael Perlin shows how the administration of the death penalty deprives persons with mental disabilities of their constitutional rights, and how trial courts and prosecutors consciously flaunt the law. Using real life examples, he brings this often overlooked situation to light and calls for immediate change.

*See It/Shoot It* Christopher J. Fuller,2017-04-25 An illuminating study tracing the evolution of drone technology and counterterrorism policy from the Reagan to the Obama administrations This eye-opening study uncovers the history of the most important instrument of U.S. counterterrorism today: the armed drone. It reveals that, contrary to popular belief, the CIA's covert drone program is not a product of 9/11. Rather, it is the result of U.S. counterterrorism practices extending back to an influential group of policy makers in the Reagan administration. Tracing the evolution of counterterrorism policy and drone technology from the fallout of Iran-Contra and the CIA's "Eagle Program" prototype in the mid-1980s to the emergence of al-Qaeda, Fuller shows how George W. Bush and Obama built upon or discarded

strategies from the Reagan and Clinton eras as they responded to changes in the partisan environment, the perceived level of threat, and technological advances. Examining a range of counterterrorism strategies, he reveals why the CIA's drones became the United States' preferred tool for pursuing the decades-old goal of preemptively targeting anti-American terrorists around the world.

The Drone Debate Avery Plaw, Matthew S. Fricker, Carlos Colon, 2015-12-24 The Drone Debate offers a thorough investigation of the where, why, how, and when of the U.S.'s use of UAVs. Beginning with a historical overview of the use of drones in warfare, it then addresses whether targeted killing operations are strategically wise, whether they are permissible under international law, and the related ethical issues. It also looks at the political factors behind the

use of drones, including domestic and global attitudes toward their use and potential issues of proliferation and escalation. Finally, the use of drones by other countries, such as Israel and China, is examined. Each chapter features a case study that highlights particular incidents and patterns of operation in specific regions, including Yemen, Somalia, Pakistan, and Libya and strike types (signature strikes, personality strikes, etc.).

*Political Biology* M. Meloni, 2016-05-25 This book explores the socio-political implications of human heredity from the second half of the nineteenth century to the present postgenomic moment. It addresses three main phases in the politicization of heredity: the peak of radical eugenics (1900-1945), characterized by an aggressive ethos of supporting the transformation of human society via biological knowledge; the repositioning, after 1945, of biological thinking into a liberal-democratic, human rights framework; and the present postgenomic crisis in which the genome can no longer be understood as insulated from environmental signals. In *Political Biology*, Maurizio Meloni argues that thanks to the ascendancy of epigenetics we may be witnessing a return to soft heredity - the idea that these signals can cause changes in biology that are themselves transferable to succeeding generations. This book will be of great interest to scholars across science and technology studies, the philosophy and history of science, and political and social theory.

**Tracing Cultural Change in Turkey's Experience of Democratization** Metin

Koca,2023-03-24 Does democracy require an agreement on specific foundational values? Bringing insights from Turkey to the study of democratization, this book argues that democracy may rather be about acknowledging the disagreement over values before negotiating over other concerns, such as rights, freedoms, capabilities and duties. It explores this idea by examining three landscapes of culture in Turkey, which have been the subjects of persistent stories regarding the unequal relationship between the self and the other. These include LGBT visibility and the entertainment sector, women and clothing, and Alevism and funerals. Through these case studies, the book analyses the remaking of (in)tolerance through the integration of LGBT representations into broader political struggles over values, the assertion of women's rights and freedoms from traditional values surrounding dress, and the conflict between essentialist intolerance and the syncretic traditions of Alevi identity. Bringing these landscapes together with the surrounding cultural tensions in Turkey and the West, Tracing Cultural Change in Turkey's

Experience of Democratization will be a valuable resource for students and scholars of Middle Eastern studies and politics, gender studies and cultural studies.

**Transnational Legal Processes** Michael Likosky, 2002-04 This work comprises 24 linked essays by leading transatlantic scholars in international law and the social sciences examining the sociolegal aspects of multi-jurisdictional legal techniques and trans-jurisdictional social phenomena. The contributors bring a range of disciplinary expertises including anthropology, economics, law and sociology to bear on key questions raised by transnational legal processes. The pieces explore legal developments in multiple territories including Africa, Asia, Latin America and the United States. The volume is designed as a general reader for courses on law and globalisation and related studies. The collection is made up of four parts, each addressing a central theme in transnational law and legal action (law-making and compliance), human rights, commerce and governance. The essays discuss such diverse problems as: the role of foreign actors in the ethnic conflicts of Kosovo and Rwanda; the power the United States and the UK wield over international capital markets; and the adaptability of existing public international law to deal with the challenges wrought by globalisation.

International Investment Protection and Constitutional Law Stephan W. Schill, Christian J. Tams, 2022-11-25 This book develops a conceptual framework that captures not only the tensions between constitutional values that are

common to liberal democracies – human rights, democracy, and the rule of law – and the investment treaty regime, but also the potential for co-existence and complementarity.
