The New Dimension of International Terrorism

Stefan M. Aubrey, 2004 The events of September 11, 2001 confronted the United States and the rest of the World with the reality of a new dimension of international terrorism. This new dimension did not start nor end with the attacks against the World Trade Center or the Pentagon, but began in the 1990s. This study examines the new dimension of international terrorism, contrasting it with the classical terrorism, the predominantly left-wing terrorist movements of the 1960s - 1980s in Europe, which were a subset of the bipolar geopolitical arena. The author establishes the relationship of radical Islamist movements to the terrorist groups of the new dimension (principally focusing on Al-Qaeda) in providing the motivation for committing catastrophic terrorist acts, looks at the shadowy world of terrorist financing and makes suggestions regarding international counter-terrorist strategies.

#### Russian Involvement in Eastern Europe's

Petroleum Industry Adnan Vatansever,2005 This report answers questions such as: as one of the largest foreign acquisitions by a Russian company occurred in Bulgaria, what lessons are applicable to charting future Russian downstream takeovers? Why have Eastern Europe and Western FSU countries been the primary focus of Russian acquisitions? What drives LUKoil (and other Russian oil companies) to pursue acquisition of assets in these regions? Finally, what is the stance of the Russian government in terms of promoting such acquisitions abroad? This series of reports establishes for the first time the confluence of Russian foreign policy with the acquisition of foreign energy assets by Russian entities. Nine

Fisheries, Quota Management and Quota Transfer

Gordon M. Winder,2017-07-11 This volume examines the impact of fish stock assessment and catch share arrangements in context through case studies and in terms of ecosystem, economy and society. It examines the rationalizing work of bio-economic projects, especially the institutionalization of individual transferable quota (ITQ) in fisheries: what impact have they had on fisheries and fishers? The contributing authors understand ITQ and quota management as bio-economic projects, that is, as widely deployed but locally constituted projects that combine biological and economic logics to rationalize production and, in this case, fish. Politicians and managers use these projects and the models that justify them to rationalize fisheries in favor of modern technology and for capital and species efficiency. Aimed at a diverse interdisciplinary fisheries management readership, and designed as a guide to issues emerging in any assessment of ITQ, the book is a timely investigation of the origins and diverse experiences of ITQ projects, including resistance to them, attempts to develop fisheries management around them, and experiences of the risks that come with them. Now around forty years old, ITQ has never been subject to the kind of comprehensive sustainability assessments once advocated by Elinor Ostrom, let alone the full-

cost accounting of impacts at the national level that Evelyn Pinkerton recently called for. Fisheries, Quota Management and Quota Transfer offers multi-disciplinary assessments of the effects of ITQ from scholars working in eight countries. The book brings together scholars from anthropology, economics, geography, sociology, the history of science, and marine environmental history to discuss experiences from fisheries in eight industrialized countries. It considers cases from outside as well as inside the EU, including ITQ pioneers, New Zealand and Iceland. The combination allows for an unprecedented international perspective on stock assessments and share allocation systems. By emphasizing emerging, becoming, learning and transforming through knowledge, the book conceives technology as a field of power and choice, nevertheless dominated by managers through specific projects in specific contexts. Individual chapters relate bio-economic projects to separate theoretical literature, an approach that facilitates multi-disciplinary dialog.

**British Foreign Policy** Jamie Gaskarth, 2013-07-11 Britain has been a significant voice in global politics in the last two decades and its impact on world events far outweighs its material resources. But how does a small island on the edge of Europe continue to exercise this level of power on an international scale? What kind of actor is Britain

internationally? And what future challenges will confront British foreign policymakers in a multi-polar world of emerging powers? In this comprehensive introduction to British foreign policy today Jamie Gaskarth addresses these and other key questions. Against a rich historical backdrop, he examines the main actors and processes involved in British foreign policy-making as well as the role played by identity in shaping such choices. Later chapters focus on the relationship between economics and foreign policy, what it means to be ethical in this policy sphere, and the justification for and benefits of the UK's continued use of force to achieve its foreign policy goals. Combining interview research, theoretical insight and analysis of contemporary and historical trends, this book charts how British foreign policy has come to be understood and practised in the 21st Century. It will be an invaluable guide for students of British politics, foreign policy, international relations and related courses.

**African Americans in the Armed Forces** Tamra B. Orr,2019-12-15 African Americans have fought in every major U.S. war, but even as they fought to defend their country, they also had to battle

From the Buffalo Soldiers and Tuskegee Airmen of the past to today's soldiers and officers, African Americans have helped protect a country that has often failed to protect their civil rights. The bravery of these men and women is presented through detailed main text and sidebars that feature annotated quotes.
