The Defence of French Robin Adamson, 2007-01-01 This book aims to find out whether French, one of the great languages of the world, is in crisis or not. It traces the history and development of language defence in France and examines the sometimes contradictory attitudes of French people to their beloved language. It assesses the necessity for and the usefulness of the many activities in defence of French and suggests what its future might be.

American-Made Nick Taylor, 2009-02-24 Seventy-five years after Franklin D. Roosevelt's New Deal, here for the first time is the remarkable story of one of its enduring cornerstones, the Works Progress Administration (WPA): its passionate believers, its furious critics, and its amazing accomplishments. The WPA is American history that could not be more current, from providing economic stimulus to renewing a broken infrastructure. Introduced in 1935 at the height of the Great Depression, when unemployment and desperation ruled the land, this controversial nationwide jobs program would forever change the physical landscape and social policies of the United States. The WPA lasted eight years, spent \$11 billion, employed 8½ million men and women, and gave the country not only a renewed spirit but a fresh face. Now this fascinating and informative book chronicles the WPA from its tumultuous beginnings to its lasting presence, and gives us cues for future action.

Migration and the Education of Young People 0-19 Mabel Ann Brown, 2015-11-24 Migration and the Education of Young People 0-19 investigates migration from a number of perspectives to consider the changing dynamics of society within different countries. Examining the data associated with global migration by focusing on case studies from a wide range of countries, it provides detailed and balanced coverage of this politically sensitive topic to explore the educational needs of migrant young people, the impact of large-scale migration to and from countries and the policy challenges that individual countries face when ensuring adequate provision for migrant young people within their education systems. Chapters cover: The reasons why people might move Social and emotional learning in Britain: a tool to guard against cultural pollution? Migration into a global city: the economic and educational success of London Latvian people on the move and the impact on education People's movement - Greece Return migration in Lithuania: incoming challenges for children's education The United States, Latin America, immigration and education Tanzanian street children: victims, ordinary lives or extraordinary survivors? This book explores the changing social dynamics through an extensive range of case studies and will be an essential resource for students taking undergraduate and postgraduate courses in education, sociology and international relations.

Trauma and Repair Annie Stopford, 2020-08-26 Trauma and Repair: Confronting segregation and violence in America is an interview-based interdisciplinary exploration of complex trauma in low-income communities and neighborhoods in Baltimore, Maryland; Oakland, California; New Orleans, Louisiana; and Elaine, Arkansas. Moving fluidly between the respondents' life narratives and clinical and academic perspectives on trauma and inequality, Stopford depicts multidimensional and intergenerational trauma, including prolonged economic injustice and repeated exposure to community violence. Written in an accessible and engaging style that draws on insights from sociology, public health, history, legal studies, and clinical psychoanalysis, this original study is a vital addition to the literature on inequality and poverty in the United States.

Children with Disabilities in America Philip L. Safford, Elizabeth J. Safford, 2005-12-30 Images of disabled children are found throughout well-known works of literature, film, and even opera. Their characters range from sweet, to brave, to tragic. Disabled children are also a part of the reality of life either in personal ways or as poster girls and boys for drives and causes. Behind these images is a historical presence that has been created by the societies in which these children live and have lived. This work examines current knowledge about children's experience of physical, cognitive, and

emotional/behavioral impairments from the Colonial period to the present, while revealing the social constructions of both disability and childhood throughout American history. Just as disability has been advanced as an essential consideration in other historical inquiries, such as that of gender, this is a work intended to demonstrate the critical role of disability with respect to the history of childhood.

Powering Up Canada R.W. Sandwell, 2016-11-01 With growing concerns about the security, cost, and ecological consequences of energy use, people around the world are becoming more conscious of the systems that meet their daily needs for food, heat, cooling, light, transportation, communication, waste disposal, medicine, and goods. Powering Up Canada is the first book to examine in detail how various sources of power, fuel, and energy have sustained Canadians over time and played a pivotal role in their history. Powering Up Canada investigates the ways that the production, processing, transportation, use, and waste issues of various forms of energy changed over time, transforming almost every aspect of society in the process. Chapters in the book's first part explore the energies of the organic regime – food, animal muscle, water, wind, and firewood-- while those in the second part focus on the coal, oil, gas, hydroelectricity, and nuclear power that define the mineral regime. Contributors identify both continuities and disparities in Canada's changing energy landscape in this first full overview of the country's distinctive energy history. Reaching across disciplinary boundaries, these essays not only demonstrate why and how energy serves as a lens through which to better understand the country's history, but also provide ways of thinking about some of its most pressing contemporary concerns. Engaging Canadians in an urgent international discussion on the social and environmental history of energy production and use – and its profound impact on human society – Powering Up Canada details the nature and significance of energy in the past, present, and future. Contributors include Jenny Clayton (University of Victoria), George Colpitts (University of Calgary), Colin Duncan (Queen's University), J.I. Little (Emeritus, Simon Fraser University), Joanna Dean (Carleton University), Matthew Evenden (University of British Columbia), Laurel Sefton MacDowell (Emerita, University of Toronto Mississauga), Joshua MacFadyen (Arizona State University), Eric Sager (University of Victoria), Jonathan Peyton (University of Manitoba), Steve Penfold (University of Toronto), Philip van Huizen (McMaster University), Andrew Watson (University of Saskatchewan), and Lucas Wilson (independent scholar).

The Modern Military and the Environment William A. Wilcox, Jr., 2007-04-16 The battle is an old one: man versus nature. And in modern society, man includes the military. Machines. Chemicals. Who wins the battle and at what cost? This practical analysis of the conflict between national security requirements and environmental responsibility looks at just that. William Wilcox examines the most common environmental issues that the military faces during wartime and peacetime and provides an introduction to the legal authorities, including statutes, regulations, and executive orders, governing the application of environmental law to military activities.

Cities and Nature Lisa Benton-Short, John Rennie Short, 2013-05-29 Cities and Nature connects environmental processes with social and political actions. The book reconnects science and social science to demonstrate how the city is part of the environment and how it is subject to environmental constraints and opportunities. This second edition has been extensively revised and updated with in-depth examination of theory and critical themes. Greater discussion is given to urbanization trends and megacities; the post-industrial city and global economic changes; developing cities and slums; urban political ecology; the role of the city in climate change; and sustainability. The book explores the historical relationship between cities and nature, contemporary challenges to this relationship, and attempts taken to create more sustainable cities. The historical context situates urban development and its impact on the environment, and in turn the environmental impact on people in cities. This provides a foundation from which to understand contemporary issues, such as urban political ecology, hazards and disasters, water quality and supply, air pollution and climate change. The book then considers sustainability and how it has been informed by different theoretical approaches. Issues of environmental justice and the role of

gender and race are explored. The final chapter examines the ways in which cities are practicing sustainability, from light greening efforts such as planting trees, to more comprehensive sustainability plans that integrate the multiple dimensions of sustainability. The text contains case studies from around the globe, with many drawn from cities in the developing world, as well as reviews of recent research, updated and expanded further reading to highlight relevant films, websites and journal articles. This book is an asset to students and researchers in geography, environmental studies, urban studies and planning and sustainability.

Global Minority Rights Joshua Castellino, 2017-05-15 This important volume brings together a range of material in different areas of law and the social sciences that address questions concerning the rights of minorities. The discipline is arguably one of the oldest branches of public international law, and owes its heritage to those who struggled to create standards to protect the numerically inferior and non-dominant communities from the excesses of the majority. While reflecting this rich heritage, the works contained in this volume show the extent to which policy constructs (especially in law) have begun to pay heed to the need to include minorities in different domestic settings across the globe. To provide readers with a structured approach to understanding global minority rights law the editor divides the issues into six main headings, namely: Historical Development; Conceptual Development; Contemporary Challenges; Fundamental Norms of Minority Protection; Specific Rights of Minorities; Human Rights and Minority Rights.

Disaster Recovery Testing Philip Jan Rothstein, 2007-09 Rather than providing readers with only one perspective on testing contingency plans, Mr. Rothstein has taken the powerful approach of carefully assembling a panel of thirty professionals to contribute their unique expertise in 36 detailed chapters, 350+ pages, covering such subject areas as:- test planning and management, including management's role, budgeting, justification and politics- test participants and resources, including professional development, human factors, the test team, self-assessment, the roles of vendors, consultants, auditors, clients, software- testing methods, including walkthroughs, simulations, joint testing, surprise testing, real disasters as the ultimate test- what is being tested, including business units, locations, data centers, voice / data communications, trading floors, local area networks- any other practical considerations, such as test monitoring, first-time testing, feedback, reporting and follow-up; even a sample test plan is included.

American Nightmares Dale Bailey, 2011-06 When Edgar Allan Poe set down the tale of the accursed House of Usher in 1839, he also laid the foundation for a literary tradition that has assumed a lasting role in American culture. "The House of Usher" and its literary progeny have not lacked for tenants in the century and a half since: writers from Nathaniel Hawthorne to Stephen King have taken rooms in the haunted houses of American fiction. Dale Bailey traces the haunted house tale from its origins in English gothic fiction to the paperback potboilers of the present, highlighting the unique significance of the house in the domestic, economic, and social ideologies of our nation. The author concludes that the haunted house has become a powerful and profoundly subversive symbol of everything that has gone nightmarishly awry in the American Dream.

Floating Trail Bridges and Docks Jasen Neese, 2002 The Missoula Technology and Development Center (MTDC) was asked to evaluate the use of floating bridges for trail crossings in very wet areas. This report outlines the basic designs of floating structures. It includes information about floating boat docks, floating bridge designs, anchorage systems, and devices that allow the dock to adjust itself to varying water levels. It also describes the situations where floating bridges may be a practical solution.
