Accelerating Progress in Obesity Prevention Institute of Medicine, Food and Nutrition Board, Committee on Accelerating Progress in Obesity Prevention, 2012-05-30

One-third of adults are now obese, and children's obesity rates have climbed from 5 to 17 percent in the past 30 years. The causes of the nation's obesity epidemic are multi-factorial, having much more to do with the absence of sidewalks and the limited availability of healthy and affordable foods than a lack of personal responsibility. The broad societal changes that are needed to prevent obesity will inevitably affect activity and eating environments and settings for all ages. Many aspects of the obesity problem have been identified and discussed; however, there has not been complete agreement on what needs to be done to accelerate progress. Accelerating Progress in Obesity Prevention reviews previous studies and their recommendations and presents five key recommendations to accelerate meaningful change on a societal level during the next decade. The report suggests recommendations and strategies that, independently, can accelerate progress, but urges a systems approach of many strategies working in concert to maximize progress in accelerating obesity prevention. The recommendations in Accelerating Progress in Obesity Prevention include major reforms in access to and opportunities for physical activity; widespread reductions in the availability of unhealthy foods and beverages and increases in access to healthier options at affordable, competitive prices; an overhaul of the messages that surround Americans through marketing and education with respect to physical activity and food consumption; expansion of the obesity prevention support structure provided by health care providers, insurers, and employers; and schools as a major national focal point for

obesity prevention. The report calls on all individuals, organizations, agencies, and sectors that do or can influence physical activity and nutrition environments to assess and begin to act on their potential roles as leaders in obesity prevention.

The Democratization Project Ashok Swain, Ramses Amer, Joakim Öjendal, 2011 This volume, drawing on the work of a variety of scholars, contributes to identifying and understanding the challenges and opportunities presented by the current wave of democratization to the peace and development of the world both at the domestic level in selected countries, trends in regions of the world, and in the global system of the post-Cold War Era.

Race, Color, Identity Efraim Sicher, 2013-05-30 Advances in genetics are renewing controversies over inherited characteristics, and the discourse around science and technological innovations has taken on racial overtones, such as attributing inherited physiological traits to certain ethnic groups or using DNA testing to determine biological links with ethnic ancestry. This book contributes to the discussion by opening up previously locked concepts of the relation between the terms color, race, and Jews, and by engaging with globalism, multiculturalism, hybridity, and diaspora. The contributors-leading scholars in anthropology, sociology, history, literature, and cultural studies-discuss how it is not merely a question of whether Jews are acknowledged to be interracial, but how to address academic and social discourses that continue to place Jews and others in a race/color category.

Deportations in the Nazi Era Henning Borggräfe, Akim Jah, 2022-11-21 During the Nazi era, about three million Jews – half the victims of the Holocaust – were deported from the German Reich, the occupied territories, as well as Nazi-allied countries, and sent to

ghettos, camps, and extermination centers. The police and the SS also deported tens of thousands of Sinti and Roma, mainly to the Auschwitz concentration and extermination camp, where most of them were killed. Deportations were central to National Socialist persecution and extermination. In November 2020, an international conference organized by the Arolsen Archives focused on the various historical sources, their research potential, and (digital) methods of cataloging them. It also explored new (systematizing and comparative) approaches in historical research. This volume features over 20 contributions by scholars from different countries and with a variety of perspectives and questions. The main geographical focus is on deportations from the German Reich and German-occupied Southeastern Europe.

Lessons from Regional Responses to Security, Health and Environmental Challenges in Latin America Ivo Ganchev, 2024-01-23 What is the role of regional organizations in maintaining security across different parts of Latin America and the Caribbean (LAC)? How did COVID-19 impact states in the region and what types of collective action have helped respond to public health emergencies? In what way is LAC environmental policy formulated and what broader lessons can be drawn for the Global South? This edited volume addresses these questions, revealing the reasons behind the successes and failures of LAC regional responses to collective challenges as well as their limitations and potential for future improvement. It contains 11 chapters, authored by 16 authoritative academics who employ methodologically-diverse perspectives. Each chapter provides insights that would be of interest to scholars, students and policy-makers working on the regional governance of LAC and the Global South. The contributions are thematically organised

in three parts and produced with pragmatic considerations in mind, discussing existing and potential real solutions to pressing issues.

Relaciones internacionales Alcántara, Manuel,García Montero, Mercedes,Sánchez López, Francisco,2018-07-01 El Comité Organizador del 56º Congreso Internacional de Americanistas (ICA) publica las actas del encuentro celebrado en la Universidad de Salamanca el 15 al 20 de julio de 2018. Bajo el lema «Universalidad y particularismo en las Américas», reflexionó sobre la dialéctica entre la universalidad y los particularismos en la producción de conocimiento, un diálogo en el que la necesidad de conocer los particularismos de los fenómenos sociales, políticos, artísticos y culturales obliga a formular nuevas hipótesis que enriquecen y replantean las grandes teorías generales de las ciencias y las humanidades. El carácter interdisciplinario e inclusivo que ha caracterizado al ICA desde su inicio en 1875, como un congreso de estudios de área en sentido completo, hace aún más significativa esa dinámica de producción de conocimiento. Con un planteamiento interdisciplinario e inclusivo, ICA reúne a investigadores que estudian el continente americano, desde Alaska hasta Tierra de Fuego, incluyendo el territorio del Caribe, a partir del análisis de su política, economía, cultural, lenguas, historia y prehistoria. Así, el Comité Organizador les invitó participar en el análisis y la reflexión sobre las especificidades de las Américas y el Caribe con el objetivo de enriquecer las grandes teorías

IBM® Redpaper™ publication describes the adapter-

based virtualization capabilities that are being deployed in high-end IBM POWER7+™ processor-based servers.

Peripheral Component Interconnect Express (PCIe) single root I/O virtualization (SR-IOV) is a virtualization

technology on IBM Power Systems servers. SR-IOV allows multiple logical partitions (LPARs) to share a PCIe adapter

with little or no run time involvement of a hypervisor or

other virtualization intermediary. SR-IOV does not replace

the existing virtualization capabilities that are offered as

part of the IBM PowerVM® offerings. Rather, SR-IOV

compliments them with additional capabilities. This paper

describes many aspects of the SR-IOV technology,

including: A comparison of SR-IOV with standard

virtualization technology Overall benefits of SR-IOV

Architectural overview of SR-IOV Planning requirements

SR-IOV deployment models that use standard I/O

Diniz Maciel, KyoungHun Min, Stephen Tremain, Steve Wallace, IBM Redbooks, 2014-06-30 IBM® PowerVM® virtualization technology is a combination of hardware and software that supports and manages the virtual environments on POWER5-, POWER5+, IBM POWER6®, and IBM POWER7®-based systems. PowerVM is available on IBM Power Systems™, and IBM BladeCenter® servers as optional Editions, and is supported by the IBM AIX®, IBM i, and Linux operating systems. You can use this set of comprehensive systems technologies and services to aggregate and manage resources by using a consolidated, logical view. Deploying PowerVM virtualization and IBM Power Systems offers you the following benefits: Lower energy costs through server consolidation Reduced cost of your existing infrastructure Better management of the growth, complexity, and risk of your infrastructure This IBM Redbooks® publication is an extension of IBM PowerVM Virtualization Introduction and Configuration, SG24-7940. It provides an organized view of best practices for managing and monitoring your PowerVM environment concerning virtualized resources managed by the Virtual I/O Server.

POWER7 and POWER7+ Optimization and Tuning

Guide Brian Hall, Mala Anand, Bill Buross, Miso Cilindzic, Hong Hua, Judy Liu, John MacMillan, Sudhir Maddali, K Madhusudanan, Bruce Mealey, Steve Munroe, Francis P O'Connell, Sergio Reyes, Raul Silvera, Randy Swanberg, Brian Twichell, Brian F Veale, Julian Wang, Yaakov Yaari, IBM Redbooks, 2013-03-04

This IBM® Redbooks® publication provides advice and technical information about optimizing and tuning application code to run on systems that are based on the IBM POWER7® and POWER7+™ processors. This advice is drawn from application optimization efforts across many different types of code that runs under the IBM AIX® and Linux operating systems, focusing on the more pervasive performance opportunities that are identified, and how to capitalize on them. The technical information was developed by a set of domain experts at IBM. The focus of this book is to gather the right technical information, and lay out simple guidance for optimizing code performance on the IBM POWER7 and POWER7+ systems that run the AIX or Linux operating systems. This book contains a large amount of straightforward performance optimization that can be performed with minimal effort and without previous experience or in-depth knowledge. This optimization work can:

- Improve the performance of the application that is being optimized for the POWER7 system
- Carry over improvements to systems that are based on related processor chips
- Improve performance on other platforms

The audience of this book is those personnel who are responsible for performing migration and implementation activities on IBM POWER7-based servers, which includes system administrators, system architects, network administrators, information architects, and database administrators (DBAs).
