Science Fiction and Computing David L. Ferro, Eric G. Swedin, 2011-09-29 The prevalence of science fiction readership among those who create and program computers is so well-known that it has become a cliché, but the phenomenon has remained largely unexplored by scholars. What role has science fiction played in the actual development of computers and computing? And likewise, how has computing (including the related fields of robotics and artificial intelligence) affected the course of science fiction? The 18 essays in this critical work explore the interrelationship of these domains over the span of more than half a century.

The Desire of Ages Ellen G. White, 1898

Curating Organizational Memory Tim Gilman-Ševčík, 2022-06-23 Why does technology obsessively seek to artificially enhance and expand our memory? We don't have to accept information overload and interconnectedness as the backbones of our age. Our most trusted organizations, schools, and businesses are increasingly burdened by institutionalized storage and an accumulation of knowledge capital. As this book shows, by incorporating forgetting into their strategies for change, they can evolve within this time of radical adaptation. Our fear of forgetting may be blocking a real understanding of how innovative thought forms in our mediated capitalism. Anti-institutions can embrace the power of forgetting as a means of elevating thinking. Leading with the formulation of a new "academy", this book will help the reader conceive of education in art and business as rooted in concepts and practices of forgetting. It shows that forgetting is an unexpected theory of organizing that can challenge ossified institutional practices.

Pain in Children Gary A. Walco, Kenneth R. Goldschneider, 2008-09-11 Advances over the past two decades have enabled physicians to revolutionize the manner in which they can assess and manage children's pain. Thirty years ago it was thought that young children did not experience pain and therefore it was not necessary to treat it. Today professionals from a variety of disciplines have contributed data that have revolutionized medical perspectives. Technological advances now enable doctors to treat acute pain in fetuses, premature neonates, infants, toddlers, children, and adolescents with increasing precision and efficacy. Research highlighting the context of chronic pain has moved them away from a mind-body dichotomy and toward an integrated, holistic perspective that leads to substantial improvement in children's adaptive functioning as well as subjective discomfort. This book covers these topics and is intended for anyone who provides medical care to children. Each chapter provides an overview of the problem, followed by a hands on description of relevant assessment and intervention strategies. The role of the primary care practitioner is highlighted, both as a front-line resource as well as a consumer of specialized pediatric pain treatment services. Each chapter ends with a summary and specific bullet points highlighting the most central elements, making for quick and easy reference.

The Greenwood Encyclopedia of Children's Issues Worldwide [6 volumes] Irving Epstein, 2007-12-30 From the skyrocketing AIDS rate in Haiti to the oppressive pollution in industrial China, from the violent street culture of Nigeria to the crippling poverty in Nicaragua, from child trafficking in Thailand to child marriages in India, this jam-packed six-volume set explores all these issues and more in an unprecedented look at the world's children at the dawn of the 21st century. In recent years, while many countries have enjoyed a higher standard of living and improved working conditions, others have been torn apart by war and incapacitated by famine, and are struggling to improve life for their children and their future. Recent concern over the world's children has resulted in a global attempt to define what constitutes an acceptable childhood. New attention has been paid, not only to healthcare and secondary education, but also to the right to play and increased access to technology. The UN's codification of children's rights has done much to expand our understanding of what is needed for healthy growth and development of children and youth. Organized by region, The Greenwood Encyclopedia of Children's Issues Worldwide is the first globally focused set of this magnitude, offering

extensive, up-to-date coverage of these critical issues. Original chapters accessibly synthesize current data on key topics, including education, play and recreation, child labor, family, health, laws and legal status, religious life, abuse and neglect, and growing up in the 21st century.

Situational Breakdowns Anne Nassauer, 2019-06-07 In our everyday lives, we rely on routines that make tasks and interactions easier and provide a sense of order--routines of greeting each other, getting to work, organizing the things we do on the job, at the gym, or during family dinners. Yet, we have all experienced situations where routines fail and people behave contrary to expectations. In *Situational Breakdowns*, Anne Nassauer demonstrates that when routines break down, surprising outcomes often emerge. Focusing on detailed accounts of peaceful and violent protests from the 1960s until 2010, violent uprisings such as Ferguson 2014, and armed store robberies caught on CCTV, Nassauer argues that by systematically looking at the way situations unfold, clear patterns can be identified for how and why routine interactions break down. Employing over 1,000 visual recordings, documentary sources, interviews with participants, and participant observation with police, she shows which factors can draw us into violent situations and discusses how and why we make uncommon individual and collective decisions. Drawing on insights from sociology, psychology, primatology, international relations, and neuroscience, Nassauer compares situational dynamics with human motivations to demonstrate that our interactions, interpretations, and emotions greatly influence the outcome of situations. A novel interpretation of surprising social outcomes, *Situational Breakdowns* reveals that, despite the course of events overriding motivations, people can avoid being caught up in violence, if they know what to look for.

Spatial Epidemiological Approaches in Disease Mapping and Analysis Poh-Chin Lai, Fun-Mun So, Ka-Wing Chan, 2008-08-18 Containing method descriptions and step-by-step procedures, the *Spatial Epidemiological Approaches in Disease Mapping and Analysis* equips readers with skills to prepare health-related data in the proper format, process these data using relevant functions and software, and display the results as mapped or statistical summaries. Describing the wide range of available methods and key GIS concepts for spatial epidemiology, this book illustrates the utilities of the software using real-world data. Additional topics include geographic data models, address matching, geostatistical analysis, universal kriging, point pattern analysis, kernel density, spatio-temporal display, and disease surveillance.

Building Regression Models with SAS Robert N. Rodriguez, 2023-04-18 Advance your skills in building predictive models with SAS! *Building Regression Models with SAS: A Guide for Data Scientists* teaches data scientists, statisticians, and other analysts who use SAS to train regression models for prediction with large, complex data. Each chapter focuses on a particular model and includes a high-level overview, followed by basic concepts, essential syntax, and examples using new procedures in both SAS/STAT and SAS Viya. By emphasizing introductory examples and interpretation of output, this book provides readers with a clear understanding of how to build the following types of models: general linear models quantile regression models logistic regression models generalized linear models generalized additive models proportional hazards regression models tree models models based on multivariate adaptive regression splines *Building Regression Models with SAS* is an essential guide to learning about a variety of models that provide interpretability as well as predictive performance.

Smarter Tomorrow Elizabeth R. Ricker, 2021-08-17 What if you could upgrade your brain in 15 minutes a day? Let Elizabeth Ricker, an MIT and Harvard-trained brain researcher turned Silicon Valley technologist, show you how. Join Ricker on a wild and edifying romp through the cutting-edge world of neuroscience and biohacking. You'll encounter Olympic athletes, a game show contestant, a memory marvel, a famous CEO, and scientists galore. From Ricker's decade-long quest, you will learn: ● The brain-based reason so many self-improvement projects fail . . . But how a little-known secret of Nobel Prize winning scientists could finally unlock success ● Which four abilities—both cognitive and emotional—can predict success in work and relationships . . . and a new system for improving all four ● Which seven research-tested tools can supercharge mental performance. They

range from low-tech (a surprising new mindset) to downright futuristic (an electrical device for at-home brain stimulation) Best of all, you will learn to upgrade your brain with Ricker's 20 customizable self-experiments and a sample, 12-week schedule. Ricker distills insights from dozens of interviews and hundreds of research studies from around the world. She tests almost everything on herself, whether it's nicotine, video games, meditation, or a little-known beverage from the Pacific islands. Some experiments fail hilariously—but others transform her cognition. She is able to sharpen her memory, increase her attention span, boost her mood, and clear her brain fog. By following Ricker's system, you'll uncover your own boosts to mental performance, too. Join a growing, global movement of neurohackers revolutionizing their careers and relationships. Let this book change 15 minutes of your day, and it may just change the rest of your life!

A Century of Kurdish Politics Güneş Murat Tezcür,2020-06-29 The Kurdish question remains one of the most important and complicated issues in ethnic politics in contemporary times, with the Kurds being one of the largest ethnic groups in the world without a state of their own. This comprehensive volume brings together a group of distinguished scholars to address the Kurdish question in its centennial year with a fresh analytical lens, to demonstrate that the study of Kurdish politics has developed beyond a narrow focus on the state-minority antagonism. It addresses a series of interrelated questions focusing on Kurdish politics as well as broader themes related to nationalism, ethnic mobilization, democratic struggles, and international security. The authors examine the agency of Kurdish political actors and their relations with foreign actors; the relations between Kurdish political leaders and organizations and regional and great powers; the dynamics and competing forms of Kurdish political rule; and the involvement of Kurdish parties in broader democratic struggles. Using original empirical work, they place the scholarship on Kurdish politics in dialogue with the broader scholarship on ethnic nationalism, self-determination movements, diaspora studies, and rebel diplomacy. This book was originally published as a special issue of the journal *Ethnopolitics*.

100 Plus Sonia Arrison,2011-08-23 Humanity is on the cusp of an exciting longevity revolution. The first person to live to 150 years has probably already been born. What will your life look like when you live to be over 100? Will you be healthy? Will your marriage need a sunset clause? How long will you have to work? Will you finish one career at sixty-five only to go back to school to learn a new one? And then, will you be happily working for another sixty years? Maybe you'll be a parent to a newborn and a grandparent at the same time. Will the world become overpopulated? And how will living longer affect your finances, your family life, and your views on religion and the afterlife? In *100 Plus*, futurist Sonia Arrison takes us on an eye-opening journey to the future at our doorsteps, where science and technology are beginning to radically change life as we know it. She introduces us to the people transforming our lives: the brilliant scientists and genius inventors and the billionaires who fund their work. The astonishing advances to extend our lives—and good health—are almost here. In the very near future fresh organs for transplants will be grown in laboratories, cloned stem cells will bring previously unstoppable diseases to their knees, and living past 100 will be the rule, not the exception. Sonia Arrison brings over a decade of experience researching and writing about cutting-edge advances in science and technology to *100 Plus*, painting a vivid picture of a future that only recently seemed like science fiction, but now is very real. *100 Plus* is the first book to give readers a comprehensive understanding of how

life-extending discoveries will change our social and economic worlds. This illuminating and indispensable text will help us navigate the thrilling journey of life beyond 100 years.
