Xenotransplantation Sheila A. M. McLean, 2019-07-05 Originally published in 2005. One of the leading causes of death is organ failure, that is, when one or other of the organs that run the machine we call the body gives out. However, whereas with a machine spare parts can usually replace faulty parts, in the case of humans the supply of these is limited as it is dependent on organs being obtained from living or dead donors. Due to the limitations of supply, increasing attention is being paid to alternative schemes for obtaining organs. One of these possibilities is xenotransplantation: using organs from animals. In this book, the authors examine the legal and ethical issues surrounding xenotransplantation and consider the implications for the future. As they point out, xenotransplantation represents a major deviation from standard medical practice and the possibility of transplantation of large segments of tissue, or whole organs, from animals into humans poses an entirely novel set of considerations - ethical, legal and scientific - which it is necessary to evaluate and understand.

Philosophy for Public Health and Public Policy James Wilson, 2021-09-09 Public health has never been more important, or more controversial. What states do, and fail to do, makes a significant difference to the lives we are able to lead. Putting public health first would allow improvements to the health of everyone, especially the worst off. Yet many citizens actively oppose state interference to improve population health, complaining that it encroaches on personal liberty. How should policymakers reconcile these conflicting priorities? This groundbreaking book argues that philosophy is not just useful, but vital, for thinking coherently about priorities in health policy and public policy. Novel, theoretically rigorous, yet practical, *Philosophy for Public Health and Public Policy* examines why it is so common for public policies to fail in practice to improve the problems they aim to solve, and what to do about this. It argues that a shift to complex systems approaches to policymaking is overdue. Philosophers need to become much more attuned to the contingency and messiness of real world policymaking, and to the ways in which philosophical tools such as thought experiments are frequently unreliable. This book also provides an ethical framework for public health policy. It argues that public health is a right of citizens, alongside more familiar rights such as liberty and security. Public health should not be thought of merely as interference with the rights that individuals have, but as necessary to protect these rights. Chapters explore implications for resource allocation, personal responsibility, health equity, and the control of communicable disease.

The Impact of the Freedom of Information Act on Central Government in the UK R. Hazell, B. Worthy, M. Glover, 2010-08-11 Based on interviews with officials, requesters and journalists, as well as a survey of FOI requesters and a study of stories in the national media, this book offers a unique insight into how the Freedom of Information Act 2000 really works.

Why You Won't Get Rich Robert Verkaik, 2021-02-09 From the bottom to the top of our economy, capitalism is too blunt an instrument to tackle Britain's epidemic of inequality. Soaring rents, unfair taxation and a growing gig economy have brought about unprecedented economic shame: Amazon warehouse workers living in tents, nurses turning to foodbanks, London firemen commuting hundreds of miles to work. Even those higher up the ladder are losing their grip on the life they were promised. Barristers take home less than the minimum wage and doctors are starting out with £100,000 student debts on salaries lower than the national average. We're all facing a new economic phenomenon - in-work poverty. At the same time a generation of young professionals is coming to terms with never being able to own even the cheapest home in their area. At the same time a generation of young professionals is coming to terms with never being able to own even the cheapest home in their area. Hard work no longer pays off. But there is hope for a better, fairer future.

The Hydrogen Age Geoffrey B. Holland, James J. Provenzano, 2007 Hydrogen linked with clean, renewable sources of energy provides the prescription for the ills of an ailing planet. Geoffrey B. Holland and James J. Provenzano's hallmark book 'The hydrogen age' details just how this remarkable energy carrier has been vital to the workings of the universe since the beginning of time, and why it is now ready to play a central part in healing our Earth, our atmosphere, and the world's economies as a clean-energy commodity. - book jacket.

Civil Servants and Politics C. Neuhold, S. Vanhoonacker, Luc Verhey, 2013-03-25 This comparative study focuses on the changing relations between civil servants and politicians in the European Union in the last two decades. As well as national case studies this book also looks into politico-administrative relations in supranational institutions such as the European Commission and the European Parliament.

Rulemaking by the European Commission Carl Fredrik Bergström, Dominique Ritleng, 2016-01-22 The last few years have seen major reforms to the delegation of powers and post-delegation supervision of the European Commission. In light of these reforms, *Rulemaking by the European Commission: The New System for Delegation of Powers* assesses whether the new system has really affected the old doctrine of delegation of powers, and if so, how? Specific questions answered include: have the objectives of the reform been achieved and what were these objectives? How does the new system affect the division of functions between the institutions of the EU and the institutional balance? Has this new system affected the relationship between the EU and its Member States, and if so, how does it concern its citizens? Presented by an interdisciplinary group of experts who have actively followed or participated in the process of reform, the book is structured in four parts: (1) the political and historical context in which the rule-making takes place, (2) the operation and functioning of the system before and after the reform, (3) the legal substance of a new framework for rule-making and the emerging case law from the Court of Justice of the EU, and (4) the procedural dimension, including the legal preconditions for non-institutional actors to participate.

Responsibilities to Protect David Whetham, Bradley J. Strawser, 2015-03-27 Following the humanitarian horrors of the 1990s, the international community began to seek consensus on a new norm to help address the tension between upholding the sovereign right of states to administer their own internal affairs, and the pressing need for civilian populations to be protected from their own government in certain situations. The result was the responsibility to protect initiative from the UN, accepted as an emerging norm and based on existing legal structures although not itself necessarily accepted as law. This volume looks not only at the humanitarian-

inspired interventions of the past 15 years, such as those that took place under the Force for Good banner of the UK Government under New Labour, but also looks at what this has meant for the people actually involved in doing them. What responsibilities do states have towards their own soldiers when sending them to protect 'other' people? Should that responsibility extend to moral and psychological protection as well as physical protection, and if so, how? How far does the duty go when considering the protection of one's own citizens who have deliberately placed themselves in harm's way, such as journalists who have chosen to leave the safety of a protected area? What happens when institutions are faced with the choice of protecting their people or their reputation? What does it feel like for the inhabitants of a state who become 'protected' by the international community?

Torture, Intelligence and Sousveillance in the War on Terror Dr Vian Bakir, 2013-10-28 Torture, Intelligence and Sousveillance in the War on Terror examines the communication battles of the Bush and Blair political administrations (and those of their successors in America and Britain) over their use of torture, first-hand or second-hand, to gain intelligence for the War on Terror. Exploring key agenda-building drivers that exposed the torture-intelligence nexus and presenting detailed case studies of key media events from the UK and USA, this insightful volume exposes dominant political discourses on the torture-for-intelligence policy. Whether in the form of unauthorized leaks, official investigations, investigative journalism, real-time reporting, or Non-Governmental Organisation activity, this timely study evaluates various modes of resistance to governments' attempts at strategic political communication, with particular attention to 'sousveillance': community-based recording from first-person perspectives. A rigorous exposition of the power-knowledge relationships constituting the torture-intelligence nexus, which re-evaluates agenda-building models in the digital age and assesses the strength of the public sphere across the Third, Fourth and Fifth Estates, Torture, Intelligence and Sousveillance in the War on Terror will appeal to scholars across the social sciences with interests in media and communication, sociology and social theory, politics and political communication, international relations, and journalism.

Intelligence Elites and Public Accountability Vian Bakir, 2018-04-17 This book provides a definitive overview of the relationships of influence between civil society and intelligence elites. The secrecy surrounding intelligence means that publication of intelligence is highly restricted, barring occasional whistle-blowing and sanitised official leaks. These characteristics mean that intelligence, if publicised, can be highly manipulated by intelligence elites, while civil society's ability to assess and verify claims is compromised by absence of independent evidence. There are few studies on the relationship between civil society and intelligence elites, which makes it hard to form robust assessments or practical recommendations regarding public oversight of intelligence elites. Addressing that lacuna, this book analyses two case studies of global political significance. The intelligence practices they focus on (contemporary mass surveillance and Bush-era torture-intelligence policies) have been presented as vital in fighting the 'Global War on Terror', enmeshing governments of scores of nation-states, while challenging internationally established human rights to privacy and to freedom from torture and enforced disappearance. The book aims to synthesise what is known on relationships of influence between civil society and intelligence elites. It moves away from disciplinary silos, to make original recommendations for how a variety of academic disciplines most likely to study the relationship between civil society and intelligence elites (international relations, history, journalism and media) could productively cross-fertilise. Finally, it aims to create a practical benchmark to enable civil society to better hold intelligence elites publicly accountable. This book will be of great interest to students of intelligence studies, surveillance, media, journalism, civil society, democracy and IR in general.

The Coming China Wars Peter Navarro, 2006 China's breakneck industrialization is placing it on a collision course with the entire world. Tomorrow's China Wars will be fought over everything from decent jobs, livable wages, and leading-edge technologies to strategic resources such as oil, copper, and steel--even food, water, and air. Economist Navarro previews all these potential conflicts, and reveals the urgent, radical decisions that must be made to avoid catastrophe. China's thirst for oil is driving nuclear proliferation in Iran, genocide in the Sudan, even Japan's remilitarization. Navarro reveals China's shocking role in the drug trade and how its flesh trade may help trigger tomorrow's worst AIDS crisis; how China has become the world's most ruthless imperialist, how it is promoting global environmental disaster, and, perhaps most terrifying of all, how this nuclear superpower and pirate nation may be spiraling toward internal chaos.--From publisher description.

Environmentalism, Ethical Trade, and Commodification Adam Henne, 2015-06-05 This book explores the global connections between Chilean landscapes and Northern consumers embodied by the Forest Stewardship Council logo, the green seal of approval for certified sustainably-produced good wood. How do we decide what makes good forestry? What knowledges and values are expressed or silenced when good is defined with a market mechanism like certification? Henne's ethnographic study documents the new forms of labor and the new expectations about sustainability and responsibility that certification generates, in the context of the competing ideas about how to manage a forest – or even what a forest is – that constitute forest certification in Chile. A critical analysis of certification's practices helps understand the role of ethical trade initiatives in creating sustainable, survivable global futures.

Géopolitique de Kaliningrad Frank Tétart, 2007 Le 1er mai 2004, l'Union européenne s'est élargie à dix nouveaux membres. Cet événement majeur pour l'histoire du continent européen a de fait enclavé en son sein la région russe de Kaliningrad, qui jusqu'en 1945 était la partie Nord de la Prusse-Orientale allemande. Mais Kaliningrad est-elle le trou noir de la nouvelle Europe, comme tendent à la présenter certains clichés, ou saura-t-elle profiter de cette nouvelle situation ? L'analyse des représentations géopolitiques des Russes et des Européens concernant Kaliningrad permet d'appréhender le rapport de ce territoire avec le reste du continent européen, y compris l'Union européenne, en faisant apparaître les enjeux géopolitiques internes et externes qui lui sont liés.
