Prospects and Risks Beyond EU Enlargement Iris Kempe, 2012-12-06 With the European Union's upcoming eastern enlargement, Europe is confronted with the necessity of creating security and stability beyond the EU borders in Eastern and Southeastern Europe. This task includes not only numerous risks but also opportunities to face the challenges of the 21st century. This volume provides policy-oriented recommendations and differentiated insider knowledge about the regional situation in Russia, Ukraine, Moldova and Belarus. Authors from the region analyze policies by state and by key issues such as energy, transportation, the future of Kaliningrad or the regional hot spot in Transnistria. A concept for a Multi-Layered Europe is developed for the strategic dilemmas concerning the current debate on Wider Europe. The unique alliance between analytical output and strategic thinking makes the book valuable for the academic community and for persons responsible for Europe's future.

After the Virus Hilary Cooper, Simon Szreter, 2021-09-23 Why was the UK so unprepared for the pandemic, suffering one of the highest death rates and worst economic contractions of the major world economies in 2020? Hilary Cooper and Simon Szreter reveal the deep roots of our vulnerability and set out a powerful manifesto for change post-Covid-19. They argue that our commitment to a flawed neoliberal model and the associated disinvestment in our social fabric left the UK dangerously exposed and unable to mount an effective response. This is not at all what made Britain great. The long history of the highly innovative universal welfare system established by Elizabeth I facilitated both the industrial revolution and, when revived after 1945, the postwar Golden Age of rising prosperity. Only by learning from that past can we create the fairer, nurturing and empowering society necessary to tackle the global challenges that lie ahead - climate change, biodiversity collapse and global inequality.

Reinforcing Rule of Law Oversight in the European Union Carlos Closa, Dmitry Kochenov, 2016-10-13 This book provides an analysis of key approaches to rule of law oversight in the EU and identifies deeper theoretical problems.

Women and Welfare Conditionality Sharon Wright, 2023-09 Recent welfare reforms, based on austerity narratives and a gender-neutral rationale, have failed to recognise the ways in which women and men experience the different demands and rewards of paid employment and unpaid care. This book draws on a wealth of qualitative longitudinal evidence to cast light on women's lived experiences of welfare and work. Giving voice to social security recipients, this book uncovers the hidden gendered bias of conditional welfare reforms to challenge dominant political discourses, policy design and practice norms. It combines and develops three interdisciplinary perspectives - feminist analysis, lived experience and street-level bureaucracy - to offer a new understanding of British welfare reform policies and practice.

Implementing the Nagoya Protocol Brendan Coolsaet, Fulya Batur, Arianna Broggiato, John Pitseys, Tom Dedeurwaerdere, 2015-04-23 Implementing the Nagoya Protocol compares existing ABS regimes in ten European countries, including one non-EU member and one EU candidate country, and critically explores several cross-cutting issues related to the implementation of the Nagoya Protocol in the EU.

Access to Knowledge for Consumers: Reports of Campaigns and Research 2008-2010, 2010 Information Program grantee Consumers International has released the

results of a global survey designed to expose the obstacles consumers face in gaining access to education and cultural materials. The survey was conducted in 13 languages, covering 15,000 consumers across 24 countries. The survey found that The biggest barriers that consumers face in accessing copyright works are those created by copyright law. Even so, consumers around the world will choose original copyright works over pirated copies, provided that they are available at an affordable price. While borrowing from libraries and other cultural institutions provided a viable alternative for some consumers priced out of original copyrighted works, the survey found that, particularly in developing countries, access to libraries is limited and the works they carry are few. Although the authors of the survey saw copyleft initiatives like Open Educational Resources and Free and Open Source Software as great ways to help consumers vault access barriers, they concluded that governments needed to act to address consumers' needs for lower cost original materials to buy, borrow and access online. The survey forms the first two chapters of Consumers International's new report Access to Knowledge for Consumers: Reports of Campaigns and Research 2008-2010--Publisher description.
