Tsukasa Aso, Christoph Rademacher, Jonathan Dobinson

History of Design and Design Law Tsukasa Aso, Christoph Rademacher, Jonathan Dobinson, 2022-04-22 For the first time, this book provides an up-to-date history of product design and product design law covering 17 countries – Japan, Korea, China, Singapore, the United Kingdom, Germany, France, Italy, the Nordic countries (Denmark, Finland, Iceland, Norway and Sweden), Russia, the United States, Brazil and Australia – selected for their innovative or influential approach to design or design protection. Each country is the subject of two chapters – one on the history of design and the other on the history of design law – authored by experts in design and intellectual property (IP) law. This unique interdisciplinary approach explains why and how various national design protection systems (that can include design, copyright, trade mark, competition and civil laws) developed, making it an ideal book for students, researchers and lawyers. The book also serves as an international survey of different national policy and legal responses to historical developments and specific design and legal issues allowing readers to consider their advantages and disadvantages – and so is also recommended for policy and law makers, as well as organizations that administer IP rights. Topics include the subject matter of design protection; procedural and substantive requirements; design registration; infringement; and the overlap of design rights and other IP rights. The chapters on design history provide further context to the historical development of these legal concepts by considering major design movements, key designers and iconic designs and the current state of design. The chapters highlight the connected and often complementary relationship between the two histories, not only for each country, but at the regional and international level, often as a result of government policies, trade, colonialism, immigration and globalisation. Design and design practice continue to become more global and evolve with developments in technology. At the same time, design laws are not internationally harmonized and continue to develop at the national level, with a number of significant changes occurring in recent years. This timely book shows how the lessons of the past continue to inform the future direction of design and the legal systems developed to protect it.

Regulatory Support for Off-Grid Renewable Electricity Ngozi Chinwa Ole, Eduardo G. Pereira, Peter Kayode Oniemola, Gustavo Kaercher Loureiro, 2023-02-02 This book investigates the role of law in enabling and addressing the barriers to the development of off-grid renewable electricity (OGRE). The limited development of OGRE is ascribed to a host of social, economic, and legal barriers, including the problem of initial capital costs, existing subsidies for conventional electricity, and lack of technological and institutional capacity. Through the analyses of selected case studies from Africa, Asia, Europe and North and South America, this book discusses the typical barriers to the development of OGRE from a global perspective and examines the role of the law in addressing them. Drawing together the lessons learnt from the case studies, this book offers robust recommendations on how the development of OGRE will support the goal of achieving universal access to low carbon, reliable, and sustainable electricity globally. This volume will be of great interest to students, scholars, policy makers, investors, and practitioners in the fields of energy law and policy, climate change, and renewable

energy development.

Reconciling Energy, the Environment and Sustainable Development Maria João C. Pereira Rolim, 2019-08-13
Challenged by sustainability imperatives, the world faces a transition in how it uses and produces energy. Yet, despite the indisputable interdependence between energy and the environment, law in these two areas has developed separately, with little consideration for how the logic and aims of each might be reconciled. This innovative book addresses this crucial nexus, exploring the role that law must inevitably play as the effects of fossil fuel-induced climate change continue to radically affect every aspect of life on Earth. Focusing on the emerging concept of reflexive regulation, the analysis takes giant steps in paving the way for effective legal engagement in the energy transition process. Issues and topics explored in detail include the following: energy's distinctive characteristic as an economic activity that works in a chain; relation of physical aspects of energy to its legal and social dimensions; main aspects of regulation, environmental law and the concept of sustainability; specific security of supply challenges faced by the industry; and emergence and worldwide adoption of the environmental impact assessment as a procedural mechanism and its connection with Reflexive Regulation. The author supports her arguments with detailed and critical examination of the regulation theoretical framework and includes citations of case law, rules and regulations from diverse jurisdictions. A case study on the development of the Brazilian electricity sector – an exemplary case, considering the country's abundance of natural energy resources, industrial efficiency prerogatives, regulatory incentives to ensure investment in supply expansion, and increasing demands in meeting sustainability objectives, all as highlighted by ongoing litigation – illustrates the arguments put forward. This book makes a substantial contribution to developing a framework aimed at linking potential divergent policy objectives in diverse and distinct interdependent fields. It will be welcomed by energy and environmental lawyers and policy makers, as well as by economists, scholars and other professionals concerned with the meaning of law and regulation in relation to energy, the environment and development, and the possible roles law and regulation may play in a pressing scenario of change.

Southeast Asia in Search of an ASEAN Community C. Rodolfo Severino, 2006 Talking about ASEAN, this volume reappraises the organization from the inside, through controversial or perplexing issues such as the ASEAN Way, the accession of the new members, including Myanmar, the principle of non-interference, regional security, regional economic integration, the haze and SARS, and ASEAN's future.

Containing Iran Sasan Fayazmanesh, 2013-11-13 Since the 1979 Revolution in Iran and the end of a close relationship between the US and the Shah, successive American administrations – including the Obama Administration – have tried to contain Iran by various means, particularly sanctions and military threats. Even though President Obama came to office promising to engage Iran, in reality his administration has followed the policy of “tough diplomacy,” which has included, among other acts, imposing draconian sanctions against Iran. Following the author's earlier book on the history of containment of Iran and Iraq, the current book examines closely the Obama Administration's policy toward Iran, as well as the role played by Israel, the European Union and the

International Atomic Energy Agency (IAEA) in the implementation of this policy. Specifically, it is argued that the policy of “tough diplomacy,” designed mostly by those associated with the Israeli lobby groups, was intended to give an ultimatum to Iran in some direct meetings, telling Iran to either accept the US-Israeli demands or face aggression. The meetings were also intended to create the illusion of engaging Iran in order to gain international support for aggressive actions. Barack Obama announced this policy in his speeches as a Senator, particularly at the American Israel Public Affairs Committee policy conferences. After he became president in 2008, the policy of “aggressive diplomacy” was put in motion. While pretending to engage Iran in diplomacy, the Obama Administration, in coordination with the US Congress and the government of Israel, pushed for the most confrontational IAEA reports on Iran and an unprecedented set of unilateral and multilateral sanctions. The US and Israel also engaged in a campaign of military threats, sabotage and assassination of Iranian nuclear scientists. Yet, after four years of hostilities, the policy of “tough diplomacy” failed to achieve many of its goals and failed to contain Iran.

Digital Solidarities, Communication Policy and Multi-stakeholder Global Governance Marc Raboy, Normand Landry, Jeremy Shtern, 2010 In 2003 and again in 2005, the international community was called by the United Nations to take part in a World Summit on the Information Society (WSIS). This two-phased summit placed an unprecedented global spotlight on information and communication issues. At the same time, the WSIS represented a grand experiment in global governance: the active participation of non-governmental stakeholders in the development of public policies at the international level. Digital Solidarities, Communication Policy and Multi-stakeholder Global Governance examines the actors, structures and themes that shaped the WSIS with a particular focus on the role played by civil society. The book investigates how civil society self-organization has continued post-WSIS through the Internet Governance Forum (IGF) and other policymaking venues, and reflects on what the WSIS experience reveals about the challenges and opportunities embedded in the notion of multi-stakeholder governance and its implications for understanding global communication.

Women and Children as Victims and Offenders: Background, Prevention, Reintegration Helmut Kury, Sławomir Redo, Evelyn Shea, 2016-06-20 This work compiles experiences and lessons learned in meeting the unique needs of women and children regarding crime prevention and criminal justice, in particular the treatment and social reintegration of offenders and serves as a cross-disciplinary work for academic and policy-making analyses and follow-up in developing and developed countries. Furthermore, it argues for a more humane and effective approach to countering delinquency and crime among future generations. In a world where development positively depends on the rule of law and the related investment security, two global trends may chart the course of development: urbanization and education. Urbanization will globalize the concepts of “justice” and “fairness”; education will be dominated by the urban mindset and digital service economy, just as a culture of lawfulness will. This work looks at crime prevention education as an investment in the sustainable quality of life of succeeding generations, and at those who pursue such crime prevention as the providers of much-needed skills in the educational portfolio. Adopting a reformist approach, this work collects articles with findings and recommendations that may be relevant to domestic and international policymaking, including the United Nations Studies and their educational value for the welfare of coming generations. The books address the relevant United Nations ideas by combining them with academic approaches. Guided by the Editors’ respective fields of expertise, and in full recognition of academic freedom and “organized scepticism”, it includes contributions by lawyers, criminologists, sociologists and other eminent experts seeking to bridge the gap between academic and policy perspectives, as appropriate, against the international background, including the United Nations developments. The second volume opens with Part IV, which presents articles on different kinds of crime prevention. The effectiveness of punishment and, in particular, imprisonment is examined by contrasting it with alternative sanctions and the following questions are raised: Does harsh punishment have a crime preventive effect? What are the side effects of imprisonment on the offenders and

their families? Are alternatives, such as restorative justice or mediation, more effective and cheaper? Part V outlines proactive strategies of crime prevention, e.g. for potential sex offenders or in the domain of internet crime. Part VI envisions a more peaceful and inclusive society, which would be realized by improving the protection of women and children in their everyday life, and easing the reintegration of those who have become offenders. The importance of the role played by the UN in formulating these goals is underlined. The volume concludes with an epilogue of the 70th President of the United Nations Economic and Social Council, Martin Sajdik, and a post scriptum of the editors. p>

Civil Society Media and Global Governance Arne Hintz,2009 How do community, alternative and citizens media activists and advocates interact with global media policy processes? Are their concerns recognised, and do new forms of multi-stakeholder governance offer a place for them? Focusing on the United Nations World Summit on the Information Society, Civil Society Media and Global Governance examines agendas and strategies of media actors, traces successes and failures, and proposes a new conceptual framework for the relation of these media with global policy processes.

Family Health Social Work Practice John T. Pardeck,2002-06-30 Pardeck and his contributors approach the topic of family health from a macro perspective. Family health is a holistic approach to treatment embracing aspects of family functioning not typically considered in other more traditional approaches to assessment and treatment. They place particular emphasis on the ecological context in which the family functions, including the neighborhood, community, and other larger social systems. Family health is defined as the development of, and continuous interaction among, the physical, mental, emotional, social, economic, cultural, and spiritual dimensions of the family, that result in the holistic well-being of the family and its members. The chapters in the book are guided by a number of key premises, including (a) Family health social work practice is grounded in a biopsychosocial approach to assessment and treatment; (b) Family health is based in a systems-ecological approach to assessment and intervention because of the role that various systems play in the well-being of the family; (c) Family health views the family system as the most important system for promoting the growth and development of the person; (d) Family health social work practice requires close collaboration between social work practitioners and other professionals. Based on these basic premises, Pardeck focuses on the macro level issues of family health practice that include community intervention, policy and program development, and program administration. The book is an important resource for social work professionals, scholars, students, and other researchers involved with social work practice and human services.

The Gay Rights Question in Contemporary American Law Andrew Koppelman, 2010-02-15 The gay rights question is whether the second-class legal status of gay people should be changed. In this book Andrew Koppelman shows the powerful legal and moral case for gay equality, but argues that courts cannot and should not impose it. The Gay Rights Question in Contemporary American Law offers an unusually nuanced analysis of the most pressing gay rights issues. Does antigay discrimination violate the Constitution? Is there any sound moral objection to homosexual conduct? Are such objections the moral and constitutional equivalent of racism? Must state laws recognizing same-sex unions be given effect in other states? Should courts take account of popular resistance to gay equality? Koppelman sheds new light on all these questions. Sure to upset purists on either side of the debate, Koppelman's book criticizes the legal arguments advanced both for and against gay rights. Just as important, it places these arguments in broader moral and social contexts, offering original, pragmatic, and workable legal solutions.

China, Africa, and the Future of the Internet Iginio Gagliardone, 2019-06-15 China is transforming Africa's information space. It is assisting African broadcasters with extensive loans, training and exchange programmes and has set up its own media operations on the continent in the form of CCTV Africa. In the telecommunications sector, China is helping African governments to expand access to the internet and mobile phones, with rapid and large-scale success. While Western countries have ambiguously linked the need to fight security threats with restrictions of the information space, China has been vocal in asserting the need to control communication to ensure stability and development. Featuring a wealth of interviews with a variety of actors – from Chinese and African journalists in Chinese media to Chinese workers for major telecommunication companies – this highly original book demonstrates how China is both contributing to the 'Africa rising' narrative while exploiting the weaknesses of Western approaches to Africa, which remain trapped between an emphasis on stability and service delivery, on the one hand, and the desire to advocate human rights and freedom of expression on the other. Arguing

no state can be understood without attention to its information structure, the book provides the first assessment of China's new model for the media strategies of developing states, and the consequences of policing Africa's information space for geopolitics, security and citizenship.
