The Corporate Transformation of Health Care John P. Geyman, MD, 2004-09-14 The author explores how the corporate transformation of hospitals, HMOs, and the insurance and pharmaceutical industries has resulted in reduction in services, dangerous cost cutting, poor regulation, and corrupt research. He sheds light on the political lobbying and media manipulation that keeps the present system in place. Exposing the shortcomings of reform proposals that do little to alter the status quo, he makes a case for a workable single-payer system. This is an essential read for today's practitioners, policy makers, healthcare analysts and providers, and all those concerned with the precarious state of America's under- and uninsured.

Moldova Marcin Kosienkowski, William Schreiber, 2012
Moldova: Arena of International Influences brings international perspective to Moldova's foreign relations since its independence from the Soviet Union in 1991. Eighteen chapters analyze the policy toward Moldova of selected international actors: Belarus, Bulgaria, China, the Czech Republic and Slovakia, the European Union, Germany, Hungary, Italy, Lithuania, Poland, Romania, Russia, Turkey, Ukraine, the United Kingdom, the United States, and the unrecognized breakaway state of Transnistria. For these international actors, Moldova functions as an arena of influences--a sphere of intersecting interests, activities and, occasionally, competition. For the first time, leading experts and practitioners from many of the countries engaged in Moldova are brought together in a common language. The result is a detailed map of the international political landscape in Moldova, a chronicle of the past two decades, and a forecast of the country's future.

Delivering Benefits in Old Age Paul Dornan, 2017-11-28
Although means-testing for Social Security transfers is economical, it hasn't proven to be very effective. The Minimum Income Guarantee (MIG) and the Pension Credit initiatives implemented by the Labour Government in the UK have both suffered from low levels of take up amongst entitled pensioners. This book sheds important new light on this pressing problem, examining existing research on take-up and highlighting gaps in understanding. It explores the strengths and weaknesses of the theoretical base, drawing

on European theory and applying it to the UK. Socio-economic, demographic and attitudinal trends are analyzed to elucidate the impact they have had, and will have, on the proportion entitled to MIG and its take-up rate. Current policy is also analyzed to explore the importance of take-up for the Labour government and the prospects of improving it. As high take-up would be an important step in combating poverty, this book offers solutions and options to tackle these problems. It is therefore of critical interest to academics and policy makers in the UK and around the world.

Characters of the Information and Communication Industry Richard F. Bellaver, 2011-05-06 I have taught a graduate course on the history of the information and communications industry for 20 years. The course shows students how the world has moved from primitive communication to the integrated multi-media situation we are in today. Concentration is on the fields of journalism, telecommunications, broadcasting, and computing. Emphasis is placed on the leaders of the areas and the political and cultural surroundings that encouraged or discouraged growth of the industry. It is true that technology is a driving force of this industry, but it has been the individual people (characters) impelled by discovery, acceptance and marketability of that technology who have taken the next step to improve communication. The Journalism field started with Gutenberg and early added Ben Franklin, later it got a little yellow with Hearst and Pulitzer. I think Henry Luce started the business of media integration, but Rupert Murdoch certainly keeps it going. The first practical use of electricity was found by Samuel Morse and his telegraph. Bell invented the telephone, or was it Meucci? Theodore Vail invented the Bell System. Broadcasting started with Marconis invention, or was it

Teslas? David Sarnoff and William Paley made the medium practical and characters like Edwin R. Morrow, Walter Cronkite and even Oprah Winfrey gave it credibility. Certainly Charles Babbage and Ada Lovelace had something to do with the start of computers, but later scientists Vannevar bush and Jon von Neumann added the electronics. Then UNIVAC convinced Thomas Watson Junior that IBM better start making them. Jobs and Wozniac started the personal computer business, but Bill Gates created the software to make them run. Tim Berners-Lee hooked those computers to a network and then Amazon, eBay, and Google found a way to make money using the result. This book is the story of these people and companies.

Beyond Sputnik Homer Alfred Neal, Tobin Smith, Jen McCormick, 2010-09-22 Science and technology are responsible for almost every advance in our modern quality of life. Yet science isn't just about laboratories, telescopes and particle accelerators. Public policy exerts a huge impact on how the scientific community conducts its work. *Beyond Sputnik* is a comprehensive survey of the field for use as an introductory textbook in courses and a reference guide for legislators, scientists, journalists, and advocates seeking to understand the science policy-making process. Detailed case studies---on topics from cloning and stem cell research to homeland security and science education---offer readers the opportunity to study real instances of policymaking at work. Authors and experts Homer A. Neal, Tobin L. Smith, and Jennifer B. McCormick propose practical ways to implement sound public policy in science and technology and highlight how these policies will guide the results of scientific discovery for years to come. Homer A. Neal is the Samuel A. Goudsmit Distinguished University Professor of Physics, Interim President Emeritus, and Vice President for

Research Emeritus at the University of Michigan, and is a former member of the U.S. National Science Board. Tobin L. Smith is Associate Vice President for Federal Relations at the Association of American Universities. He was formerly Assistant Director of the University of Michigan and MIT Washington, DC, offices. Jennifer B. McCormick is an Assistant Professor of Biomedical Ethics in the Division of General Internal Medicine at the Mayo College of Medicine in Rochester, Minnesota, and is the Associate Director of the Research Ethics Resource, part of the Mayo Clinic's NIH Clinical Translational Science Award research programs. GO BEYOND SPUTNIK ONLINE--Visit www.science-policy.net for the latest news, teaching resources, learning guides, and internship opportunities in the 21st-Century field of science policy. Beyond Sputnik is a readable, concise, yet remarkably comprehensive introduction to contemporary science policy. It is devoid of 'wonkishness' yet serves the needs of policymakers and students alike. Because science and technology policy is of central importance in the twenty-first century this accessible volume is a godsend. --- Charles M. Vest, President of the National Academy of Engineering and Vice Chair of the National Research Council of the National Academies of Sciences and Engineering This highly researched book is a treasure trove for anyone concerned with science policy relating to such challenges as providing energy, preserving the environment, assuring healthcare, creating jobs, and more. ---Norman Augustine, retired Chairman and CEO of Lockheed Martin Corporation and recipient of the 2008 Vannevar Bush Award from the National Science Board Science policy is a subject of growing importance in the United States, yet there has long been a vacuum among textbooks in the field. Beyond Sputnik fills it splendidly and will be greeted with enthusiasm by students and faculty alike. Even those who

have practiced the art for years will learn from it. ---Albert Teich, Director of Science and Policy Programs at the American Association for the Advancement of Science
Homer A. Neal, Tobin L. Smith, and Jennifer B. McCormick have written a landmark work calling for a national effort to restore our nation's power in the fields of science, energy, and education, as we did in the remarkable year following Sputnik. The next president should read *Beyond Sputnik* and accept this call to action as did President Eisenhower. ---
Ambassador David M. Abshire, President of the Center for the Study of the Presidency, Cofounder and Vice Chairman of the Center for Strategic and International Studies, and President of the Richard Lounsbery Foundation At last we have a text that tells the story from where A. Hunter Dupree left off; an excellent core text for courses in science and technology policy, DC policymakers, and anyone who needs to get up to speed in the field . . . The book that we have all been waiting for. ---Christopher T. Hill, Professor of Public Policy and Technology, George Mason University

NIH Extramural Center Programs Institute of Medicine, Board on Health Sciences Policy, Committee for Assessment of NIH Centers of Excellence
Programs, 2004-05-21 Grants for research centers located in universities, medical centers, and other nonprofit research institutions account for about 9 percent of the National Institutes of Health budget. Centers are popular because they can bring visibility, focus, and increased resources to bear on specific diseases. However, congressional debate in 2001 over proposed legislation directing NIH to set up centers for muscular dystrophy research highlighted several areas of uncertainty about how to decide when centers are an appropriate research mechanism in specific cases. The debate also highlighted a growing trend among patient advocacy groups to regard centers as a key element of

every disease research program, regardless of how much is known about the disease in question, the availability of experienced researchers, and other factors. This book examines the criteria and procedures used in deciding whether to establish new specialized research centers. It discusses the future role of centers in light of the growing trend of large-scale research in biomedicine, and it offers recommendations for improving the classification and tracking of center programs, clarifying and improving the decision process and criteria for initiating center programs, resolving the occasional disagreements over the appropriateness of centers, and evaluating the performance of center programs more regularly and systematically.

Unseriöser Journalismus? Roger Blum, 2015-11-25

Wie seriös ist der Journalismus von Radio und Fernsehen? Wie oft und in welchen Themenbereichen sind die Beiträge einseitig, unsachlich, manipulativ? Wie können sich Bürgerinnen und Bürger gegen übergriffige, fehlerhafte, die Wirklichkeit verzerrende Sendungen wehren? Dies findet man heraus, wenn man Beschwerden gegen Medien und ihren Ausgang analysiert. Das Buch **Unseriöser Journalismus?** ist diesen Fragen nachgegangen. Der Autor gibt zunächst einen Überblick über die Beschwerdemöglichkeiten des Publikums gegen Radio- und Fernsehsendungen in Deutschland, Österreich, der Schweiz, Luxemburg, Südtirol, Ostbelgien und Liechtenstein. Dann untersucht er thematisch geordnet konkrete Beschwerden der letzten acht Jahre in der Schweiz, die die Unabhängige Beschwerdeinstanz für Radio und Fernsehen (UBI) behandelte. Bei jedem Fall werden zunächst die Hauptargumente der Beschwerdeführer geschildert und dann die Hauptgründe für den getroffenen Entscheid zusammengefasst. Die Position des Präsidenten wird im Wortlaut wiedergegeben. Und es wird mitgeteilt, mit

welchem Stimmenverhältnis wie entschieden wurde und wo das Urteil online zu finden ist. Am Ende des Buches zieht der Autor Bilanz über seine Erfahrungen als Präsident der Unabhängigen Beschwerdeinstanz (2008-2015). Das Buch richtet sich an Journalistinnen und Journalisten, Radio- und Fernsehveranstalter, Medienwissenschaftler und Medienrechtler, Engagierte im Konsumentenschutz und interessierte Bürgerinnen und Bürger.

Typen verdeckter Werbung in Printmedien und Möglichkeiten ihrer inhaltsanalytischen Untersuchung Birgit Kalbacher, 2009-04-20

Inhaltsangabe: Einleitung: Ein Journalismus, der bloß noch zur Garnierung oder vielleicht sogar zur Tarnung von Werbebotschaften dient, der hat sich selbst aufgegeben, erklärte der deutsche Bundespräsident Horst Köhler bei der festlichen Übergabe des neuen Pressekodex am 20. November 2006. Damit nimmt er Bezug auf eine der wichtigen Neuerungen im Pressekodex, der seit dem 1. Januar 2007 in Kraft ist, welche in einer weiteren Präzisierung des Trennungsgrundsatzes von Werbung und redaktionellem Teil besteht und womit seiner zunehmenden Brisanz Rechnung getragen wird. Lange wurde der Trennungsgrundsatz in den Medienwissenschaften zum Teil bis heute eher stiefmütterlich behandelt. Doch redaktionelle Werbung ist keine Neuentwicklung der letzten Jahre. In den Bereichen von Rundfunk und Fernsehen³ hat sich dies inzwischen geändert, ebenso wie im Internet. Im Vordergrund der verdeckten Werbung stehen dort vor allem das Product Placement und das Sponsoring. Weniger beachtet und damit auch weniger genau untersucht und analysiert wurde bisher jedoch der Trennungsgrundsatz in den Printmedien. Im Bereich der Printmedien gibt es daher bis heute nur wenige wissenschaftliche Arbeiten, die sich mit dem Problem des Trennungsgrundsatzes von Werbung

und redaktionellem Teil auseinandersetzen, und bei den wenigen vorhandenen handelt es sich zumeist nicht um Studien aus sozialwissenschaftlicher, sondern aus juristischer Sicht. Doch auch im Bereich von Zeitungen und Zeitschriften ist die Forschung bezüglich der Trennung von Werbung und redaktionellem Teil sehr wichtig, denn hier muss ebenfalls von der Gefahr ausgegangen werden, dass die verdeckte Werbung immer mehr zunimmt. Es ist unübersehbar: Immer mehr gedruckte Werbung kommt in Form von redaktionellen Beiträgen daher, hiess es schon 1995 in einem Zeitschriftenartikel. Doch gerade wegen fehlender Untersuchungen mit grösseren Datenmengen kann dieser Satz bisher mit Zahlen, Fakten und Ergebnissen wissenschaftlich weder ausreichend bestätigt noch entkräftet werden. In der Publizistikwissenschaft ist das Verhältnis von redaktionellem Text und Anzeigen mit unterschiedlichen Methoden untersucht, eine Interdependenz aber entweder gar nicht geprüft oder nicht überzeugend belegt worden: Quantifizierende Strukturanalysen von Zeitungsinhalten [] handeln Anzeigen (Außerredaktionelles) und redaktionellen Text als zwei getrennte Stoffblöcke ab. [] Mögliche inhaltliche Beziehungen zwischen Anzeigen und [...]

5G Spectrum and Standards Geoff

Varrall, 2016-05-31 This new resource provides key insight into future 5G radio systems and the technical and economic impact on industries, communities and end-users. The book offers a comprehensive understanding of the options available for teams tasked with bringing 5G products and services to market or developing supporting standards and regulatory frameworks. Readers find

contemporary examples of millimeter band radio hardware including 60 GHz and V band and E Band point to point radio. This book demonstrates the profound progress with 4G radio signal processing and RF hardware to reveal its potential applicability to 5G radio systems. It shows how 5G systems are capable of delivering data rates that are ten to one hundred times faster than 4G systems. Developments in spatial processing and beam forming in local area radio networks are presented and the challenge of scaling these systems to wide area radio is explored. This book reviews military and space radio and automotive radar innovation with direct relevance to 5G radio design.

Britain's Pensions Crisis Hugh Pemberton, Pat Thane, Noel Whiteside, 2006-10-19 British pensions are in crisis. This volume explores the past, present and future of pensions in Britain. Leading experts discuss both the politics and economics of this key area of social policy, and consider developments in the systems of other European countries and in North America.

Mulheres na diplomacia do Brasil Gabriela Soares Balestero, 2023-02-13 Nesta investigação, analisam-se fontes históricas e sociais como fatores predominantes que moldam a diplomacia brasileira, bem como o contexto sociopolítico das relações internacionais, para se entender a pequena visibilidade das mulheres no cenário político e também os fatores que ainda dificultam o ingresso da maioria das mulheres na carreira diplomática no Brasil. Os caminhos teórico-metodológicos envolvidos levam em consideração a trajetória de luta pela visibilidade das mulheres e pelos direitos humanos no âmbito público, procurando-se, assim, seguir, a partir do debate das teorias feministas e de gênero e também da inserção desses discursos até então silenciados na esfera diplomática, uma

abordagem de observação e análise de fontes documentais diversas, inclusive o audiovisual Exteriores: Mulheres Brasileiras na Diplomacia. O aparato documental pesquisado visou tratar sobre as mudanças históricas na trajetória das mulheres na diplomacia desde sua inserção na vida pública (política), suas dificuldades e seus desafios, na intenção de fortalecer o diálogo sobre uma maior promoção de igualdade que permita a participação e ocupação do feminino em lugares de tomadas de decisões. Nesse contexto, como resultados, concluímos que o Itamaraty é um desses espaços institucionais.
