Aimer et mourir Eilene Hoft-March, Judith Holland Sarnecki, 2009-01-23 *Aimer et Mourir* offers a wide-ranging selection of essays that collectively address how, from the Middle Ages to the present, the notions of love and death get inextricably associated with the narratives that are women's lives. Some of the essays tackle male writers' representations that link women and, in particular, women's sexuality, with death, resulting in the figures of the femme fatale, the woman in parturition, and the desiring vampire. A number of essays reiterate that women's hyper-sexualized bodies have been used as a social construct and a psychological screen upon which to project a fear of death. The challenges to this pat reduction of "woman's" domain come from the mostly women writers represented here—and they span from Marguerite de Navarre to Amélie Nothomb. These women writers rework the old formulae, giving us instead death-defying memories of love, love regenerative of language (as of bodies), love forcing the frontiers of death, or love creatively redefined within the parameters of death. Nor are these new narratives imagined as belonging to women alone but rather as attesting to a richer, more varied, and greatly sensitized human experience.

Muslims in the West after 9/11 Jocelyne Cesari, 2009-12-04 This book is the first systematic attempt to study the situation of European and American Muslims after 9/11, and to present a comprehensive analysis of their religious, political, and legal situations. Since 9/11, and particularly since the Madrid and London bombings of 2004 and 2005, the Muslim presence in Europe and the United States has become a major political concern. Many have raised questions regarding potential links between Western Muslims, radical Islam, and terrorism. Whatever the justification of such concerns, it is insufficient to address the subject of Muslims in the West from an exclusively counter-terrorist perspective. Based on empirical studies of Muslims in the US and Western Europe, this edited volume posits the situation of Muslim minorities in a broader reflection on the status of liberalism in Western foreign policies. It also explores the changes in immigration policies, multiculturalism and secularism that have been shaped by the new international context of the 'war on terror'. This book will be of great interest to students of Critical Security Studies, Islamic Studies, Sociology and Political Science in general. Jocelyne Cesari is an Associate at Harvard's Center for Middle Eastern Studies and the Center for European Studies, teaching at Harvard Divinity School and the Government Department, specializing in Islam and the Middle East.

Hague Yearbook of International Law / Annuaire de La Haye de Droit International, Vol. 17 (2004) A.-Ch. Kiss, Johan G. Lammers, 2021-10-25 This is the seventeenth volume of the Hague Yearbook of International Law, which succeeds the Yearbook of the Association of Attenders and Alumni of the Hague Academy of International Law. The title Hague Yearbook of International Law reflects the close ties which have always existed between the AAA and the City of The Hague with its international law institutions, and indicates the Editor's intention to devote attention to developments taking place in those international law institutions, viz. the International Court of Justice the Permanent Court of Arbitration, the Iran-United States Claims Tribunal, and the Hague Conference on Private International Law. This volume contains in-depth articles on these developments and summaries of (aspects of) decisions rendered by the International Court of Justice, the International Criminal Court, the International Criminal Tribunal for the former Yugoslavia since 1991, the Iran-United States Claims Tribunal, the Permanent Court of Arbitration and the Hague Peace Conference on Private International Law.

International Maritime Boundaries Jonathan I. Charney, David A. Colson, Lewis M. Alexander, Robert W. Smith, 1993 This is the ultimate guide to

international maritime boundaries. Its unique practical features include - systematic examination of all international maritime boundaries worldwide; - comprehensive coverage, including the text of every modern boundary agreement; - descriptions of judicially-established boundaries; - maps and detailed analyses of those boundaries; - expert papers examining the status of maritime boundary delimitations in each of the ten regions of the world; - papers from a global perspective analyzing key issues in maritime boundary theory and practice; and - a cumulative index for volumes I - V. These features make International Maritime Boundaries an unmatched comprehensive, accessible resource in the field.

Ideological and Institutional Aspects of Islamicization Process Majid Mohammadi, 2020-06-11 This book explains how Islamism works. Islamism, whether Sunni or Shi'i, is the most existential threat to the human race in the 21st century. It is the ideology of hate, discrimination, and intolerance. It is the emblem of homophobia, misogyny, and bigotry. It can be compared to communism and fascism of the 20th century in terms of damage to human society. Every component of communism and fascism incorporated in Islamism is wrapped with religiosity and entwined with this new reading of Islam.

Nitrogen Fixation in Crop Production David W. Emerich, Hari B. Krishnan, American Society of Agronomy, Crop Science Society of America, Soil Science Society of America, 2009 This book presents the science, application, and politics of the use of nitrogen-fixing crop plants across the globe in various environments. Nitrogen fixation can help provide a growing population with a nutritious, environmentally friendly, sustainable food supply. From new omics approaches to the role of nitrogen fixation in mitigating greenhouse gas emissions, from farming strategies in nonindustrialized nations to nitrogen fixation in the global economy, scientists will find the key issues and expanding research areas, and how they contribute to the next wave of advancements related to agriculture and the environment

Convergence National Defense University (U. S.), 2013 The Center for Complex Operations (CCO) has produced this edited volume, *Convergence: Illicit Networks and National Security in the Age of Globalization*, that delves deeply into everything mentioned above and more. In a time when the threat is growing, this is a timely effort. CCO has gathered an impressive cadre of authors to illuminate the important aspects of transnational crime and other illicit networks. They describe the clear and present danger and the magnitude of the challenge of converging and connecting illicit networks; the ways and means used by transnational criminal networks and how illicit networks actually operate and interact; how the proliferation, convergence, and horizontal diversification of illicit networks challenge state sovereignty; and how different national and international organizations are fighting back. A deeper understanding of the problem will allow us to then develop a more comprehensive, more effective, and more enduring solution.

Biodiversity: Finance and the Economic and Business Case for Action OECD, 2019-12-06 This report sets the economic and business case for urgent and

ambitious action on biodiversity. It presents a preliminary assessment of current biodiversity-related finance flows, and discusses the key data and indicator gaps that need to be addressed to underpin effective monitoring of both the pressures on biodiversity and the actions (i.e. responses) being implemented. The report concludes with ten priority areas where G7 and other countries can prioritise their efforts.

Think Bayes Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Deviant Globalization Nils Gilman, Jesse Goldhammer, Steven Weber, 2011-03-24 >

Balbuzar Geirard Moncomble, 2022-01-12 A fable about freedom, about resistance, about power. And an ode to nature. In the Sarboucane sea, Balbuzar the pirate reigns supreme. He attacks, plunders, sinks, and ransoms everything that comes within his reach. Savage, cruel, formidable, certainly, Balbuzar is, but also with a certain bonhomie, and a great sense of justice. He is in harmony with the sea, the islands, the wind, the rocks. Around him, birds, always. Men, women, children...they all love him. For he is free as the air. But now the Empress Pépita XIII is worried about her state of affairs, and Balbuzar's constant plundering. She sends against him her best officer, the Commodore, at the head of an armada. He represents force, order, law. Arrogant, domineering, relentless. And sure to be the one who will clean the Sarboucane sea. Balbuzar and the Commodore clash. Two exceptional sailors, two sharp warriors. The fight begins, shattering, tumultuous. The struggle, however, is unequal, for the Commodore has immense resources, an army behind him and the power of the empire. He's built a gigantic ship that will surely sweep away the pirates and their black-flag flotilla. Balbuzar's fate seems certain. Will the outlaw be crushed by the enormity of the adversary? Cooked in the imperial pot? Or will the cunning pirate find the rift in the monster's breastplate? Will he defeat his monstrous foe, like David blasting Goliath? A story that will delight young and old, and artwork that bears repeated viewing to take it all in. Will the cunning pirate Balbuzar be able to find the chink in the monstrous Commodore's armor? Geirard Moncombe's prose deftly balances action, humor, and poetry while Freideiric Pillot's stunning, gorgeously detailed illustrations help paint this rousing, unforgettable tale. One that you'll want to come back to again and again... Featuring 32 double page illustrations interspersed with text. If you're an art geek, this book is a MUST!

The State of State Reforms in Latin America Eduardo Lora, 2006-10-23 Latin America suffered a profound state crisis in the 1980s, which prompted not only the wave of macroeconomic and deregulation reforms known as the Washington Consensus, but also a wide variety of institutional or 'second generation' reforms. 'The State of State Reform in Latin America' reviews and assesses the outcomes of these less studied institutional reforms. This book examines four major areas of institutional reform: a. political institutions and the state organization; b. fiscal institutions, such as budget, tax and decentralization institutions; c. public institutions in charge of sectoral economic policies (financial, industrial, and infrastructure); and d. social sector institutions (pensions, social protection, and

education). In each of these areas, the authors summarize the reform objectives, describe and measure their scope, assess the main outcomes, and identify the obstacles for implementation, especially those of an institutional nature.
