**Accident and Emergency Informatics** T.M. Deserno,M. Haghi,N. Al-Shorbaji,2022-06-17 Time is short in emergency situations; the need for action becomes imperative. Biomedical Informatics can be invaluable in supporting the management of emergency medicine, and the need for the creation of Accident and Emergency Informatics (A&EI) as a novel subfield became obvious. As in all areas of Biomedical Informatics, A&EI must deal with issues such as relevant data collection, the management of data extracted from accident sites, health records or sensors, wearables and apps, and appropriate data processing, with the dual purpose of preventing harm and decision support. This book is an introduction to the research and application domain of A&EI, and is the product of three years' work by the Working Group in A&EI of the International Medical Informatics Association (IMIA). The book presents ten chapters organized in four sections. The first section explores the framework for achieving an emergency-informatics health information infrastructure; the second focuses on the gathering of critical clinical data related to the building up of a smart environment for A&EI; the third introduces state-of-the-art technologies for integration into virtual emergency registries; and the final part considers the delicate issues of patient safety raised by the introduction of surveillance technologies into clinical care, along with other issues presenting challenges to the domain of A&EI for the future. The book is an important contribution to the field of A&EI, and will be of interest to healthcare professionals, informaticians, and all those who want a better understanding of the domain of Accident and Emergency Informatics.

**World Directory of Map Collections** Olivier Loiseaux,Section of Geography and Map Libraries,2012-01-02 The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. The series IFLA Publications deals with many of the means through which libraries, information centres, and information professionals worldwide can formulate their goals, exert their influence as a group, protect their interests, and find solutions to global problems.

The Global Technology Revolution China, In-Depth Analyses Richard Silberglitt,Anny Wong,2009-02-13 China's Tianjin Binhai New Area and the Tianjin Economic-Technological Development Area commissioned a technology-foresight study to help them plan for economic growth. The authors recommend seven emerging technology applications (TAs)--solar energy, mobile communications, rapid bioassays, new water-purification systems, molecular-scale drugs, electric and hybrid vehicles, and green manufacturing--and describe drivers, barriers, and plans for each.

*Biz-War and the Out-of-Power Elite* Jarol B. Manheim,2004-04-26 This book tells the fascinating story of the reemergence of the American political left over the last quarter century in the form of the new Progressive Movement. Born out of Liberalism's crushing defeats at the hands of conservative strategists of the Reagan/Bush era, this new movement has cleverly reverse engineered the conservative's institutional networking strategy to plan and finance its resurgence. Progressive strategists have constructed an elaborate network of foundations, advocacy groups, and other institutions to

advance their agenda. But where the conservatives relied on affirmative corporate support to help power their movement, the Progressive Left has used an anti-corporate strategy whose purpose is three-fold: 1. To reclaim the moral high ground of politics by challenging corporate power and influence. 2. To gain effective control over other people's money (e.g., pension funds, mutual funds) and use it to press for changes in corporate social policies. 3. To leverage this influence over corporate decision-making to change the direction of American politics and public policy. Biz War extends the argument of Manheim's 2001 book, *The Death of A Thousand Cuts*, by showing how anti-corporate campaigns have evolved from economically-oriented labor actions to ideological and programmatic political struggles. It details how the strategies and tactics crafted by organized labor are being employed with increasing effect by the political left. The book will be of interest to students of contemporary American politics, strategic communication, political movements, and business management. Likewise it will help corporate executives and financial analysts understand more fully the proxy wars and other attacks against their companies.

*Colombia* Andrés Solimano, 2000 *Annotation Global Economic Prospects and the Developing Countries* 2001 discusses three issues that are central to the challenges facing developing countries as they participate in the global trading system: \* Many developing countries, particularly some of the poorest ones, have had little success sharing in the expansion of global trade, because of both protectionist policies and inappropriate macroeconomic and trade policies. \* In trade negotiations, the global economy faces the critical governance issue of adequate standards for health and safety, labor practices, environmental protection, and intellectual property rights. It will be equally important to ensure that the standards are appropriate and nondiscriminatory, that developing countries participate fully in their formulation, and that compliance is monitored. \* The influence of technological innovations and what electronic commerce means for trade and production in developing economies. *Global Economic Prospects* offers an in-depth analysis of the economic prospects of developing economies as they enter the new millennium. It examines growth and prospects for poverty reduction in the developing world and considers economic output, trade, and financial developments in industrial economies. This edition also includes detailed statistical tables and an analysis of development for each developing country region.

*Introduction to Natural and Man-made Disasters and Their Effects on Buildings* Roxanna McDonald, 2003 This is a comprehensive guide to all types of natural and man made disasters and their effect on buildings. It gives overall guidance and a basic technical understanding of prevention, mitigation and management of disaster, and outlines a checklist of preventive design elements for each situation. Every category is illustrated with a case study which pin points the essential information that is crucial to architects and engineers in designing buildings with disaster prevention in mind. The aim of the book is to give a clear understanding of the nature of events and problems, and to enable readers to respond with knowledge to the unique demands placed on their designs. A special emphasis is also placed on re-building as an opportunity to start again. For the specialists this is a process of constant learning and improving techniques in the light of events past. \* Gain comprehensive understanding of disaster types and their effects on buildings \* International case studies with clear technical information provide practical advice for disaster prevention and rebuilding \* Looks at the effects of natural and man-made disasters, including terrorist attacks

*Global Issues* Kristen E. Boon, Aziz Huq, Douglas Lovelace, Jr., 2009 *Terrorism: Commentary on Security Documents Volume 103, Global Issues*, continues the recent changes to this series that have justified a new publisher-brand, a new title, and a re-designed cover. That new title emphasizes the expert commentary now provided by three leading scholars in the field: Doug Lovelace, Director of the Army War College's Strategic Studies Institute, Kristen Boon of Seton Hall Law School, and Aziz Huq of the University of Chicago School of Law. In this particular volume, Lovelace updates researchers on new developments in various regions of the world. He devotes many pages to the debacle along the Afghanistan-Pakistan border, where Pakistan harbors extremists conducting the insurgency in Afghanistan. Both the documents selected by Lovelace and his insightful commentary

describe how the U.S., under advice from Special Envoy Dick Holbrooke, has changed its approach to the problem by treating Afghanistan and Pakistan as one party instead of two. Volume 103 (Global Issues) also examines the complex issue of China's possible assistance to terrorists overseas. For example, some weapons used against coalition forces in Afghanistan originate from China, despite China's promise to help the U.S. in its war against terror. Lovelace and the documents he presents also assess India's measured, thoughtful reaction to allegations that Pakistan facilitated the November terrorist attacks in Mumbai. The volume also alerts readers to disturbing developments in South America, where such groups as FARC in Colombia and The Shining Path in Peru have persisted in their profit-seeking campaigns of violence, despite those countries' general success in diminishing their power.

*The Death of A Thousand Cuts* Jarol B. Manheim, 2000-11-01 A corporate campaign is an organized assault on the reputation of a company that has offended some interest group. Although corporate campaigns often involve political, economic, and legal tactics, they are centered around the media, where protagonists attempt to redefine the image--and undermine the reputation--of the target company. It is a strategy most frequently employed by unions but is also employed by special interests, such as environmental or human rights groups. Sometimes it is even employed by one corporation against another. It is a rapidly growing phenomenon that is still unknown to the general public, to most academics and journalists, and is rarely understood by the corporations that find themselves on the firing line. *The Death of a Thousand Cuts* argues and demonstrates that corporate campaigns are a distinctive phenomenon whose manifestations are today ubiquitous in both the marketplace and the media. This volume examines, in considerable detail, the history, strategy, tactics, effects, consequences, and likely future directions of the corporate campaign and of its nonlabor-based cousin, the anticorporate campaign. The book is based on ample sources and methods, among them an extensive review and analysis of media coverage, news releases, previous scholarship, union publications, campaign materials, interviews and conversations with individuals who have experienced corporate campaigns, public presentations by labor leaders and others, correspondence, Internet postings, case law summaries, documents, videotapes, and other materials. Through original data and interpretation, this book adds context and integration to these materials thus giving them new meaning. Key features of this outstanding new book include: \* A thorough and clear explanation of what a corporate campaign is and how it differs from other more mundane public relations campaigns. \* A detailed examination of strategies and tactics that includes their historical development. Some of the more high profile target companies in recent years include Coca-Cola, Microsoft, Caterpillar, Campbell's Soup, Federal Express, General Dynamics, Home Depot, International Paper, K-Mart, Nike, Texaco, Walmart, Starbucks, and UPS. \* Hundreds of examples that help explain such contemporary events as the anti-sweatshop movement on college campuses, the living wage movement, and the protests against the World Trade Organization, International Monetary Fund, and World Bank. \* A lengthy appendix contains abbreviated descriptions of nearly 200 corporate campaigns waged by labor unions and various advocacy groups since the idea of the corporate campaign was first developed in the 1960's.

*Online News-Prompted Public Spheres in China* Xuanzi Xu, 2022-10-25 This book argues that there are constant formations of online public spheres in present-day China, prompted by never-ending news. It contends that these publics are chronic, although individually they are usually transient. They are networked, which enables them to go viral in hours, and they may engender unexpected consequences. These features explain why online public spheres survive in China even though censorship and information manipulation are pervasively and strategically maneuvered to guide or manufacture "public opinion". The book also proposes that there are deeply entangled structural factors bolstering China's online news-prompted public spheres: the continuous flow of news information, the countless public spaces facilitated by China's digital infrastructure and the rise of rights-conscious netizens. Pushing forward a new way of conceptualizing the idea of public spheres, this book contends clearly that public spheres are most often sparked by chronic news in today's media-saturated societies. Delving into the life cycles of public spheres, it goes beyond static analysis of individual

public spheres and instead studies their five qualities, which, except for the networked quality, have never been systematically addressed in scholarship.

*Encyclopedia of Chromatography 2004 Update Supplement* Jack Cazes, 2004-08-11 In step with novel technologies and methodologies that have reshaped chromatography in recent years, this supplement reviews developments in HPLC, TLC, SFC, CCC, and other areas-presenting 50 authoritative entries filled with practical information vital to applications from biotechnology to environmental science to clinical pathology.

**Coming to Terms with Nature** Leo Panitch, Colin Leys, 2006-11 Can capitalism come to terms with the environment? How do market forces impact on the biosphere? What is the significance of the impasse over the Kyoto protocol? How far has socialist thought developed to help us understand the environmental dilemma? Has it got answers? Can capitalism come to terms with the environment? How do market forces impact on the biosphere? What is the significance of the impasse over the Kyoto protocol? How far has socialist thought developed to help us understand the environmental dilemma? Has it answers? How can class and environmental politics be brought together? What are the shortcomings Green parties and 'green commerce'?

**Policing in Hong Kong** Kam C. Wong, 2016-04-22 This book is one of the first to document the challenges and opportunities facing the Hong Kong police force following the reversion of political authority from the UK to China in 1997. Thematically organized and oriented towards those issues of greatest concern to the public, such as police accountability, assaults on police, police deployment, surveillance powers, and policing across borders, it provides a detailed discussion of these and other contemporary issues. The opening chapter sets the work within historical context while the final chapter provides a comparison of policing in Hong Kong with public security in the PRC. The book will be of value to students and researchers working in the area of comparative policing, and comparative criminal justice, as well as police professionals, and policy-makers.

*Clean Rail Transportation Options* Ibrahim Dincer, Janette Hogerwaard, Calin Zamfirescu, 2015-09-18 This book will assess and compare several options for ammonia co-fueling of diesel locomotives with integrated heat recovery, multigeneration (including on-board hydrogen fuel production from ammonia), and emission reduction subsystems from energy, exergy, and environmental perspectives. Economic considerations will be presented to compare the cost of the proposed systems for different scenarios such as carbon-tax rates, diesel fuel cost and ammonia cost. Fossil fuel consumption and the associated negative environmental impact of their combustion is a significant global concern that requires effective, practical, and sustainable solutions. From a Canadian perspective, the Transportation Sector contributes more than 25% of national greenhouse gas emissions due to fossil fuel combustion, largely due to road vehicles (cars, light and heavy duty trucks). This is a complex and critical challenge to address, particularly in urban areas with high population density. There is a need to develop alternative energy solutions for mass passenger and freight transportation systems that will reduce both the traffic-volume of road vehicles as well as the emissions from the mass transportation systems. The book will be helpful to students in senior-level undergraduate and graduate level courses related to energy, thermodynamics, thermal sciences, combustion, HVAC&R, etc. The quantitative comparative assessment of such alternative energy systems provided by this book will be useful for researchers and professionals interested sustainable development.

*Gender and the Information Revolution in Africa* International Development Research Centre (Canada), 2000 Gender and the Information Revolution in Africa

Cyberprotest Wim van de Donk, Brian D. Loader, Paul G. Nixon, Dieter Rucht, 2004-08-02 Ever since the anti-globalisation protests in Seattle in 1999 the adoption of new information and communications technologies (ICTs) by social movement activists has offered the prospect for the development of global cyberprotest. The Internet with its transnational many-to-many communication facility offers a revolutionary potential for social movements to

go online and circumvent the 'official' messages of political and commercial organisations and the traditional media, by speaking directly to the citizens of the world. Furthermore the use of electronic mail (e-mail), mailing lists, websites, electronic forums and other online applications provide powerful media tools for co-ordinating the activity of often physically dispersed movement actors. Moreover, ICTs may also contribute to the important function of social movements of shaping collective identity and countering the claims and arguments of established political interests. A growing body of literature during the last decades of the twentieth century attests to the significant impact SMs have had upon the restructuring of the political landscape. Most of that literature addresses the more traditional actors and institutions (e.g. parliaments, political parties, bureaucracy etc.). Less attention has been devoted to those manifestations of political action that are concentrated around social movements and all kinds of more or less institutionalised and sustainable forms of citizen mobilisation. This book is a collection of cases that take a critical look into the way ICTs are finding their way into the world of social movements

**Sport and the Law** Deborah Healey, 2010-10 Sport and the Law (4th Edition) explains the law as it applies to sporting organisations and sportspeople, describing key legal concepts in simple terms and covering issues such as negligence, defamation, doping, the responsibilities of club administrators and more. This new edition uses examples from recent events and the Beijing Olympics to ex...
