Precalculus Jay P. Abramson, Valeree Falduto, Rachael Gross (Mathematics teacher), David Lippman, Melonie Rasmussen, Rick Norwood, Nicholas Belloit, Jean-Marie Magnier, Harold Whipple, Christina Fernandez, 2014-10-23 Precalculus is intended for college-level precalculus students. Since precalculus courses vary from one institution to the next, we have attempted to meet the needs of as broad an audience as possible, including all of the content that might be covered in any particular course. The result is a comprehensive book that covers more ground than an instructor could likely cover in a typical one- or two-semester course; but instructors should find, almost without fail, that the topics they wish to include in their syllabus are covered in the text. Many chapters of OpenStax College Precalculus are suitable for other freshman and sophomore math courses such as College Algebra and Trigonometry; however, instructors of those courses might need to supplement or adjust the material. OpenStax will also be releasing College Algebra and Algebra and trigonometry titles tailored to the particular scope, sequence, and pedagogy of those courses.--Preface.

Bad Data Peter Schryvers, 2020-01-10 Highlights the pitfalls of data analysis and emphasizes the importance of using the appropriate metrics before making key decisions. Big data is often touted as the key to understanding almost every aspect of contemporary life. This critique of information hubris shows that even more important than data is finding the right metrics to evaluate it. The author, an expert in environmental design and city planning, examines the many ways in which we measure ourselves and our world. He dissects the metrics we apply to health, worker productivity, our children's education, the quality of our environment, the effectiveness of leaders, the dynamics of the economy, and the overall well-being of the planet. Among the areas where the wrong metrics have led to poor outcomes, he cites the fee-for-service model of health care, corporate cultures that emphasize time spent on the job while overlooking key productivity measures, overreliance on standardized testing in education to the detriment of authentic learning, and a blinkered focus on carbon emissions, which underestimates the impact of industrial damage to our natural world. He also examines various communities and systems that have achieved better outcomes by adjusting the ways in which they measure data. The best results are attained by those that have learned not only what to measure and how to measure it, but what it all means. By highlighting the pitfalls inherent in data analysis, this illuminating book reminds us that not everything that can be counted really counts.

Suicide Bombers in Iraq Mohammed M. Hafez, 2007 The war in Iraq was supposed to be easy. Instead it has delivered the message that Islamic resistance and martyrdom can defeat the only remaining superpower, just as jihadists drove the Soviet Union from Afghanistan during the 1980s. Now a haven for jihadists, Iraq has entered a civil war whose duration, scope, and magnitude have yet to be determined. The overwhelming majority of suicide attacks in Iraq have targeted Iraqi security forces and Shia civilians, not coalition forces. The perpetrators appear to be largely non-Iraqi volunteers. Many are from Saudi Arabia, but substantial numbers have come from Europe, Syria, Kuwait, Jordan and North Africa. They are foiling U.S. plans to stabilize the country and turn it into a democratic regime and an ally in a region of religious radicalism, entrenched authoritarianism, and hostile states with nuclear ambitions. Understanding the phenomenon of suicide bombing in Iraq is therefore vitally important for U.S. national security, foreign policy in the Muslim world, and the war on terrorism. This study, the first of its kind on the Iraqi insurgency, draws extensively on open-source intelligence and papers of record, primary sources from insurgent groups including online documents and videos, and interviews with U.S. servicemen who have served in Iraq. It examines the history of suicide

bombing in Iraq and many other countries, theoretical perspectives on suicide bombing, the varied factions that comprise the insurgency, the ideology and theology of martyrdom supporting suicide bombers, their national origins and characteristics, and the prospects for a third generation of transnational jihadists forged in the crucible of Iraq.

Fletch Won Gregory Mcdonald,2018-11-20 Young Irwin Maurice Fletcher, a.k.a. Fletch, the eager and inventive new reporter for the News-Tribune, is having a hard time finding his place at the newspaper. After a few mishaps writing questionable headlines and creatively worded obituaries, Managing Editor Frank Jaffe appoints Fletch to the society pages, where he's assigned to cover a generous yet surprising donation to an art museum from a high-powered defense attorney. But before he can secure an interview, the attorney is shot dead in the newspaper's parking lot, no witnesses in sight. To Fletch's chagrin, the story is reassigned to the boorish lead investigative reporter Biff Wilson, and he's placed on a seemingly unrelated story, some society pages fluff piece about an all-women-trainers health club that's rumored to offer a lot of extras. Undeterred by Biff's threatening nature and determined to dig up the dirt on both stories, Fletch collects a cast of engaging characters and strings together the scandalous clues that lead to an eventful and unexpected conclusion.
