The Care of Books John Willis Clark,1901

Abundant Harvests John Dietler, Heather Gibson, James M. Potter, 2015 This book is no longer in print, but is available for download as a free e-book through SWCA, Inc. Mission San Gabriel Arcángel was known as the Pride of the Missions due to its legendary agricultural productivity and its prominence in Southern California as a center of commerce and social interaction during the mission period (1771-1834). This volume, SWCA Anthropological Research Paper No. 11, reports on the first archaeological data recovery undertaken at the mission. Working within the mission's garden area, the study revealed more than 300,000 artifacts and 45 archaeological features, including a large granary, a reservoir complex, and one of the first industrial properties on the West Coast: Chapman's Mill and Millrace. Using archaeological results to critically examine historical narratives, the project examined the economic and social organization of the mission through detailed analyses of the public architecture and everyday materials left behind by Native American residents in the productive heart of the community, including animal bones, plant remains, ceramics, and tools. These studies revealed a dynamic and resilient native population that, despite clear hardships, was well-supplied with domesticated meat and locally gathered plant foods. The architectural remains clearly demonstrate the stepwise process through which a European worldview was molded to the unfamiliar California landscape, where self-taught engineers developed techniques of harnessing water that enabled the population explosion that came to characterize the Los Angeles Basin in succeeding decades. Lavishly illustrated and richly detailed, the volume is a resource for archaeologists, historians, and mission scholars alike.

Persian Gardens & Garden Pavilions Donald N. Wilber, 1994-06-15 This Persian gardening book showcases classic gardens and pavilions and presents gardening advice for the aspiring amateur landscaper looking to add an Eastern flair to his or her yard. The garden has always had a special meaning for Persian (Iran). The Persian garden, with its flowing pools, fountains, waterways, rows of tall trees, rich arrays of fruit trees and flowers, and cool pavilions, has represented an image of paradise. Persian Gardens & Garden Pavilions is both a comprehensive survey and an appreciation of this Persian tradition of gardens and garden pavilions. The text traces the historical development of Persian gardens, describes their basic features, presents existing examples, and discusses the literature and tradition behind them. The 119 illustrations include detailed plans and photographs of surviving gardens and their pavilions made on the spot, as well as a comprehensive collection of paintings, lithographs, and drawings of the nineteenth century executed both by Persian artists and by European travelers and emissaries of the period. The author points out, the gardeners who read this book should come across many details and ideas that can be incorporated into their own kinds of gardens.

Vibrant and Healthy Kids National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood Development: A Health Equity Approach, 2019-12-27 Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. *Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity* builds upon and updates research from *Communities in Action: Pathways to Health Equity* (2017) and *From Neurons to Neighborhoods: The Science of Early Childhood Development* (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

Evolving IP Marketplace Suzanne Michael, 2011-05-01 This report recommends improvements to two areas of patent law policies affecting how well a patent gives notice to the public of what technology is protected and remedies for patent infringement. The report provides valuable insights on how courts can reform the patent system to best serve consumers. It recognizes that patents play a critical role in encouraging innovation, but it also observes that some strategies by patent holders risk distorting competition and deterring innovation. This is especially true for activity driven by poor patent notice, and by remedies that do not align the compensation received by patent holders for infringement with the economic value of their patented inventions. This is a print on demand report.

Ensuring Quality to Gain Access to Global Markets Martin Kellermann, 2019-04-09 In a modern world with rapidly growing international trade, countries compete less based on the availability of natural resources, geographical advantages, and lower labor costs and more on factors related to firms' ability to enter and compete in new markets. One such factor is the ability to demonstrate the quality and safety of goods and services expected by consumers and confirm compliance with international standards. To assure such compliance, a sound quality infrastructure (QI) ecosystem is essential. Jointly developed by the World Bank Group and the National Metrology Institute of Germany, this guide is designed to help development partners and governments analyze a country's quality infrastructure ecosystems and provide recommendations to design and implement reforms and enhance the capacity of their QI institutions.
