**Academic E-Books** Suzanne M. Ward,Robert S. Freeman,Judith M. Nixon,2015-11-15 Academic E-Books: Publishers, Librarians, and Users provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

**Criminal Liability for Serious Traffic Offences** Alwin van Dijk,Hein Wolswijk,2017-12-17 The criminal law on serious traffic offenses presents legislators with numerous controversial issues. One such issue is when severe consequences are matched with low moral culpability. How should the law deal with a driver who kills someone because she failed to see the person when looking? Another controversial issue concerns highly culpable behavior that remains without serious consequences. How should the law cope with a driver who nearly kills someone when overtaking recklessly? The traffic context generates many hard cases that call the outermost boundaries of general doctrinal concepts like intent, negligence, or causation into question. This book contains an international collection of essays on criminal liability for serious traffic offenses. With a focus on England/Wales, the Netherlands, France, Germany, and Spain, the book reveals that there are enormous differences in both drafting and interpretation of serious traffic offenses. Additionally, it elaborates on the role of culpability and harm in sentencing, traffic-psychological insights relevant to accident causation, and the concept of conditional intent in relation to extremely dangerous traffic behavior.
