Special Topics in Information Technology Angelo Geraci,2021-02-26 This open access book presents thirteen outstanding doctoral dissertations in Information Technology from the Department of Electronics, Information and Bioengineering, Politecnico di Milano, Italy. Information Technology has always been highly interdisciplinary, as many aspects have to be considered in IT systems. The doctoral studies program in IT at Politecnico di Milano emphasizes this interdisciplinary nature, which is becoming more and more important in recent technological advances, in collaborative projects, and in the education of young researchers. Accordingly, the focus of advanced research is on pursuing a rigorous approach to specific research topics starting from a broad background in various areas of Information Technology, especially Computer Science and Engineering, Electronics, Systems and Control, and Telecommunications. Each year, more than 50 PhDs graduate from the program. This book gathers the outcomes of the thirteen best theses defended in 2019-20 and selected for the IT PhD Award. Each of the authors provides a chapter summarizing his/her findings, including an introduction, description of methods, main achievements and future work on the topic. Hence, the book provides a cutting-edge overview of the latest research trends in Information Technology at Politecnico di Milano, presented in an easy-to-read format that will also appeal to non-specialists.

Catastrophe Containment And Relief Trust–Approval Of Grant Assistance For Debt Service Relief International Monetary Fund,2020-04-15 This paper proposes that the Executive Board determine that the global COVID-19 pandemic constitutes a Qualifying Public Health Disaster (QPHD) under the Catastrophe Containment (CC) Window of the Catastrophe Containment and Relief Trust (CCRT), in line with the new QPHD test approved by the Board on March 26. The CCRT has sufficient financial resources for an initial tranche of grant assistance for debt service relief covering eligible debt falling due from all CCRT-eligible members through October 13, 2020. Fundraising efforts continue to secure the financial resources needed to commit future such tranches for CCRT debt service relief, up to a cap of two years. Staff considers that the 25 members requesting CCRT assistance qualify for immediate CCRT relief.

Advanced Technologies for Solar Photovoltaics Energy Systems Saad Motahhir,Ali M. Eltamaly,2021-04-26 This book presents a detailed description, analysis, comparison of the latest research and developments in photovoltaic energy. Discussing everything from semiconductors to system integration, and applying various advanced technologies to stand alone and electric utility interfaced in normal and abnormal operating conditions of PV systems, this book provides a thorough introduction to the topic. This book brings together research from around the world, covering the use of technologies such as embedded systems, the Internet of things and blockchain technologies for PV systems for different applications including controllers, solar trackers and cooling systems. The book is of interest to electronic and mechanical engineers, researchers and students in the field of photovoltaics.

Urban Inequality and Segregation in Europe and China Gwilym Pryce,Ya Ping Wang,Yu Chen,Jingjing Shan,Houkai Wei,2021-11-16 This open access book explores new research directions in social inequality and urban segregation. With the goal of fostering an ongoing dialogue between scholars in Europe and China, it brings together an impressive team of international researchers to shed light on the entwined processes of inequality and segregation, and the implications for urban development. Through a rich collection of empirical studies at the city, regional and national levels, the book explores the impact of migration on cities, the related problems of social and spatial segregation, and the ramifications for policy reform. While the literature on both segregation and inequality has traditionally been dominated by European and North American studies, there is growing interest in these issues in the Chinese context. Economic liberalization, rapid industrial restructuring, the enormous growth of cities, and internal migration, have all reshaped the country profoundly. What have we learned from the European and North American experience of segregation and inequality, and what insights can be gleaned to inform the burgeoning interest in these issues in the Chinese context? How is China different, both in terms of the nature and the consequences of segregation inequality, and what are the implications for future research and policy? Given the continued rise of China's significance in the world, and its recent declaration of war on poverty, this book offers a timely contribution to scholarship, identifying the core insights to be learned from existing research, and providing important guidance on future directions for policy makers and researchers.

Food Price Volatility and Its Implications for Food Security and Policy Matthias Kalkuhl,Joachim von Braun,Maximo Torero,2016-04-12 This book provides fresh insights into concepts, methods and new research findings on the causes of excessive food price volatility. It also discusses the implications for food security and

policy responses to mitigate excessive volatility. The approaches applied by the contributors range from on-the-ground surveys, to panel econometrics and innovative high-frequency time series analysis as well as computational economics methods. It offers policy analysts and decision-makers guidance on dealing with extreme volatility.

Segregation by Design Jessica Trounstein, 2018-11-15 Segregation by Design draws on more than 100 years of quantitative and qualitative data from thousands of American cities to explore how local governments generate race and class segregation. Starting in the early twentieth century, cities have used their power of land use control to determine the location and availability of housing, amenities (such as parks), and negative land uses (such as garbage dumps). The result has been segregation - first within cities and more recently between them. Documenting changing patterns of segregation and their political mechanisms, Trounstein argues that city governments have pursued these policies to enhance the wealth and resources of white property owners at the expense of people of color and the poor. Contrary to leading theories of urban politics, local democracy has not functioned to represent all residents. The result is unequal access to fundamental local services - from schools, to safe neighborhoods, to clean water.

Building Cities Eduardo Rojas, 2010 This volume provides a synthesis of the lessons learned and challenges confronted in implementing neighbourhood improvement programs in the Latin American and Caribbean (LAC) region. It provides a wide panorama of the most complex problems that the cities of the LAC region currently face and shows possibilities for solutions.

The Year's Best Science Fiction: Nineteenth Annual Collection Gardner Dozois, 2002-07-23 The twenty-first century has so far proven to be exciting and wondrous and filled with challenges we had never dreamed. New possibilities previously unimagined appear almost daily . . . and science fiction stories continue to explore those possibilities with delightful results: Collected in this anthology are such compelling stories as: On K2 with Kanakaredes by Dan Simmons. A relentlessly paced and absorbing tale set in the near future about three mountain climbers who must scale the face of K2 with some very odd company. The Human Front by Ken MacLeod. In this compassionate coming-of-age tale the details of life are just a bit off from things as we know them-and nothing is as it appears to be. Glacial by Alastair Reynolds. A fascinating discovery on a distant planet leads to mass death and a wrenching mystery as spellbinding as anything in recent short fiction. The twenty-six stories in this collection imaginatively takes us far across the universe, into the very core of our beings, to the realm of the gods, and the moment just after now. Included here are the works of masters of the form and of bright new talents, including: Eleanor Arnason Chris Beckett Michael Blumlein Michael Cassutt Brenda W. Clough Paul Di Filippo Andy Duncan Carolyn Ives Gilman Jim Grimsley Simon Ings James Patrick Kelly Leigh Kennedy Nancy Kress Ian R. MacLeod Ken MacLeod Paul J. McAuley Maureen F. McHugh Robert Reed Alastair Reynolds Geoff Ryman William Sanders Dan Simmons Allen M. Steele Charles Stross Michael Swanwick Howard Waldrop Supplementing the stories are the editor's insightful summation of the year's events and a lengthy list of honorable mentions, making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart.

IBM PowerVM Virtualization Managing and Monitoring Scott Vetter, Sergio Guilherme Bueno, Martin Capka, Ingo Dimmer, Tatum Farmer, Rafael Folco, Cesar Diniz Maciel, KyoungHun Min, Stephen Tremain, Steve Wallace, IBM Redbooks, 2014-06-30 IBM® PowerVM® virtualization technology is a combination of hardware and software that supports and manages the virtual environments on POWER5-, POWER5+, IBM POWER6®, and IBM POWER7®-based systems. PowerVM is available on IBM Power Systems™, and IBM BladeCenter® servers as optional Editions, and is supported by the IBM AIX®, IBM i, and Linux operating systems. You can use this set of comprehensive systems technologies and services to aggregate and manage resources by using a consolidated, logical view. Deploying PowerVM virtualization and IBM Power Systems offers you the following benefits: Lower energy costs through server consolidation Reduced cost of your existing infrastructure Better management of the growth, complexity, and risk of your infrastructure This IBM Redbooks® publication is an extension of IBM PowerVM Virtualization Introduction and Configuration, SG24-7940. It provides an organized view of best practices for managing and monitoring your PowerVM environment concerning virtualized resources managed by the Virtual I/O Server.

Mills' Atlas Robert Mills, 1980 This reprint edition of MILLS' ATLAS has an especially prepared history and introduction to these maps as well as considerable history about Robert Mills, the man and architect, prepared by Mr. Gene Waddell, formerly Director of the South Carolina Historical Society, Charleston. These maps, originally 23 29 in size, have been conveniently reduced in size to 11 17 and folded to fit into an exquisitely gold-stamped simulated leather cover for book shelf or coffee table. The Districts for which maps are included are: Abbeville, Barnwell, Beaufort, Charleston, Chesterfield, Chester, Colleton, Darlington, Edgefield, Fairfield, Greenville, Georgetown, Horry, Kershaw, Lancaster, Laurens, Lexington, Marion, Marlborough, Newberry, Orangeburg, Pendleton, Richland, Spartanburg, Sumter, Union, Williamsburg and York.

Recent Advances in Computational Terminology Didier Bourigault, Christian Jacquemin, Marie-Claude L'Homme, 2001-06-15 This first collection of selected articles from researchers in automatic analysis, storage, and use of terminology, and specialists in applied linguistics, computational linguistics, information retrieval, and artificial intelligence offers new insights on computational terminology. The recent needs for intelligent information access, automatic query translation, cross-lingual information retrieval, knowledge management, and document handling have led practitioners and engineers to focus on automated term handling. This book offers new perspectives on their expectations. It will be of interest to terminologists, translators, language or knowledge engineers, librarians and all others dependent on the automation of terminology processing in professional practices. The articles cover themes such as automatic thesaurus construction, automatic term acquisition, automatic term translation, automatic indexing and abstracting, and computer-aided knowledge acquisition. The high academic standing of the contributors together with their experience in terminology management results in a set of contributions that tackle original and unique scientific issues in correlation with genuine applications of terminology processing.

Understanding the Global Energy Crisis Richard A. Simmons, Eugene D. Coyle, 2014-03-15 We are facing a global energy crisis caused by world population growth, an escalating increase in demand, and continued dependence on fossil-based fuels for generation. It is widely accepted that increases in greenhouse gas concentration

levels, if not reversed, will result in major changes to world climate with consequential effects on our society and economy. This is just the kind of intractable problem that Purdue University's Global Policy Research Institute seeks to address in the Purdue Studies in Public Policy series by promoting the engagement between policy makers and experts in fields such as engineering and technology. Major steps forward in the development and use of technology are required. In order to achieve solutions of the required scale and magnitude within a limited timeline, it is essential that engineers be not only technologically-adept but also aware of the wider social and political issues that policy-makers face. Likewise, it is also imperative that policy makers liaise closely with the academic community in order to realize advances. This book is designed to bridge the gap between these two groups, with a particular emphasis on educating the socially-conscious engineers and technologists of the future. In this accessibly-written volume, central issues in global energy are discussed through interdisciplinary dialogue between experts from both North America and Europe. The first section provides an overview of the nature of the global energy crisis approached from historical, political, and sociocultural perspectives. In the second section, expert contributors outline the technology and policy issues facing the development of major conventional and renewable energy sources. The third and final section explores policy and technology challenges and opportunities in the distribution and consumption of energy, in sectors such as transportation and the built environment. The book's epilogue suggests some future scenarios in energy distribution and use.

PVC waste treatment in the Nordic countries Anna Fråne,Jurate Miliute-Plepiene,Alexandra Maria Almasi,Anna-Karin Westöö,2019-02-18 The aim of the project was to map PVC waste streams in Denmark, Sweden, Norway and Finland. The available estimates are made occasionally, mostly within the frames of different projects and are not based on any formalized official reporting system or other rigorous accounting scheme. Overall, a large part of PVC waste ends up in mixed waste fractions and is eventually treated in waste-to-energy plants. Landfilling of PVC waste is banned in two countries, but some exceptions exist. Norway is the only country that treats some PVC waste as hazardous waste. The current waste treatment situation in the four Nordic countries is driven by several factors, such as diverse origins of PVC products, some specifics of the Nordic market, rather low focus on PVC waste in policy strategies or plans, technical issues regarding incineration of PVC waste, and the lack of domestic recycling.

MySQL to DB2 Conversion Guide Whei-Jen Chen,Angela Carlson,IBM Redbooks,2009-12-01 Switching database vendors is often considered an exhausting challenge for database administrators and developers. Complexity, total cost, and the risk of downtime are often the reasons that restrain IT decision makers from starting the migration project. The primary goal of this book is to show that, with the proper planning and guidance, converting from MySQL to IBM® DB2® is not only feasible but straightforward. If you picked up this book, you are most likely considering converting to DB2 and are probably aware of several of the advantages of to converting to DB2 data server. In this IBM Redbooks® publication, we discuss in detail how you can take advantage of this industry leading database server. This book is an informative guide that describes how to convert the database system from MySQLT[™] 5.1 to DB2® V9.7 on Linux® and the steps that are involved in enabling the applications to use DB2 instead of MySQL. This guide also presents the best practices in conversion strategy and planning, conversion tools, porting steps, and practical conversion examples. It is intended for technical staff that is involved in a MySQL to DB2 conversion project.

Mars Viorel Badescu,2009-12-07 th th Mars, the Red Planet, fourth planet from the Sun, forever linked with 19 and 20 Century fantasy of a bellicose, intelligent Martian civilization. The romance and excitement of that fiction remains today, even as technologically sophisticated - botic orbiters, landers, and rovers seek to unveil Mars’ secrets; but so far, they have yet to find evidence of life. The aura of excitement, though, is justified for another reason: Mars is a very special place. It is the only planetary surface in the Solar System where humans, once free from the bounds of Earth, might hope to establish habitable, self-sufficient colonies. Endowed with an insatiable drive, focused motivation, and a keen sense of - ploration and adventure, humans will undergo the extremes of physical hardship and danger to push the envelope, to do what has not yet been done. Because of their very nature, there is little doubt that humans will in fact conquer Mars. But even earth-bound extremes, such those experienced by the early polar explorers, may seem like a walk in the park compared to future experiences on Mars.
