*Secure Messaging Scenarios with WebSphere MQ* T.Rob Wyatt, Glenn Baddeley, Neil Casey, Long Nguyen, Jørgen H. Pedersen, Morten Sætra, IBM Redbooks, 2013-04-02 The differences between well-designed security and poorly designed security are not always readily apparent. Poorly designed systems give the appearance of being secure but can over-authorize users or allow access to non-users in subtle ways. The problem is that poorly designed security gives a false sense of confidence. In some ways, it is better to knowingly have no security than to have inadequate security believing it to be stronger than it actually is. But how do you tell the difference? Although it is not rocket science, designing and implementing strong security requires strong foundational skills, some examples to build on, and the capacity to devise new solutions in response to novel challenges. This IBM® Redbooks® publication addresses itself to the first two of these requirements. This book is intended primarily for security specialists and IBM WebSphere® MQ administrators that are responsible for securing WebSphere MQ networks but other stakeholders should find the information useful as well. Chapters 1 through 6 provide a foundational background for WebSphere MQ security. These chapters take a holistic approach positioning WebSphere MQ in the context of a larger system of security controls including those of adjacent platforms' technologies as well as human processes. This approach seeks to eliminate the simplistic model of security as an island, replacing it instead with the model of security as an interconnected and living system. The intended audience for these chapters includes all stakeholders in the messaging system from architects and designers to developers and operations. Chapters 7 and 8 provide technical background to assist in preparing and configuring the scenarios and chapters 9 through 14 are the scenarios themselves. These chapters provide fully realized example configurations. One of the requirements for any scenario to be included was that it must first be successfully implemented in the team's lab environment. In addition, the advice provided is the cumulative result of years of participation in the online community by the authors and reflect real-world practices adapted for the latest security features in WebSphere MQ V7.1 and WebSphere MQ V7.5. Although these chapters are written with WebSphere MQ administrators in mind, developers, project leaders, operations staff, and architects are all stakeholders who will find the configurations and topologies described here useful. The third requirement mentioned in the opening paragraph was the capacity to devise new solutions in response to novel challenges. The only constant in the security field is that the technology is always changing. Although this book provides some configurations in a checklist format, these should be considered a snapshot at a point in time. It will be up to you as the security designer and implementor to stay current with security news for the products you work with and integrate fixes, patches, or new solutions as the state of the art evolves.

*The Dhandho Investor* Mohnish Pabrai, 2011-01-06 A comprehensive value investing framework for the individual investor In a straightforward and accessible manner, *The Dhandho Investor* lays out the powerful framework of value investing. Written with the intelligent individual investor in mind, this comprehensive guide distills the Dhandho capital allocation framework of the business savvy Patels from India and presents how they can be applied successfully to the stock market. The Dhandho method expands on the groundbreaking principles of value investing expounded by Benjamin Graham, Warren Buffett, and Charlie Munger. Readers will be introduced to important value investing concepts such as Heads, I win! Tails, I don't lose that much!, Few Bets, Big Bets, Infrequent Bets, Abhimanyu's dilemma, and a detailed treatise on using the Kelly Formula to invest in undervalued stocks. Using a light, entertaining style, Pabrai lays out the Dhandho framework in an easy-to-use format. Any investor who adopts the framework is bound to improve on results and soundly beat the markets and most professionals.

**Irrationality** Stuart Sutherland,2007 Why do qualified professional make wrong decisions that cause enormous harm to others? And why do you sit through a boring play just because the tickets were expensive? Drawing on a mass of intriguing research, Stuart Sutherland analyses the causes of irrationality, demonstrating that the trait is present in all of us.

*Benchmarking, Measuring, and Optimizing* Wanling Gao,Jianfeng Zhan,Geoffrey Fox,Xiaoyi Lu,Dan Stanzione,2020-06-09 This book constitutes the refereed proceedings of the Second International Symposium on Benchmarking, Measuring, and Optimization, Bench 2019, held in Denver, CO, USA, in November 2019. The 20 full papers and 11 short papers presented were carefully reviewed and selected from 79 submissions. The papers are organized in topical sections named: Best Paper Session; AI Challenges on Cambircon using AIBenc; AI Challenges on RISC-V using AIBench; AI Challenges on X86 using AIBench; AI Challenges on 3D Face Recognition using AIBench; Benchmark; AI and Edge; Big Data; Datacenter; Performance Analysis; Scientific Computing.

**Frontiers in Protein Structure, Function, and Dynamics** Dev Bukhsh Singh,Timir Tripathi,2020-07-02 This book discusses a broad range of basic and advanced topics in the field of protein structure, function, folding, flexibility, and dynamics. Starting with a basic introduction to protein purification, estimation, storage, and its effect on the protein structure, function, and dynamics, it also discusses various experimental and computational structure determination approaches; the importance of molecular interactions and water in protein stability, folding and dynamics; kinetic and thermodynamic parameters associated with protein-ligand binding; single molecule techniques and their applications in studying protein folding and aggregation; protein quality control; the role of amino acid sequence in protein aggregation; muscarinic acetylcholine receptors, antimuscarinic drugs, and their clinical significances. Further, the book explains the current understanding on the therapeutic importance of the enzyme dopamine beta hydroxylase; structural dynamics and motions in molecular motors; role of cathepsins in controlling degradation of extracellular matrix during disease states; and the important structure-function relationship of iron-binding proteins, ferritins. Overall, the book is an important guide and a comprehensive resource for understanding protein structure, function, dynamics, and interaction.

*Contaminants in Drinking and Wastewater Sources* Manish Kumar,Daniel D. Snow,Ryo Honda,Santanu Mukherjee,2020-06-29 This volume takes a multidisciplinary approach to study and evaluate the global human vulnerability to the exposure of contaminants of emerging concern (CECs) in the natural environment. It provides a comprehensive resource on structurally diverse groups of chemical compounds that have adverse effects on the aquatic environment. It explores the global strength, environmental status, chemical risk assessment and management strategies of CECs with relevant modern techniques. The principle focus is on concurrent emerging water quality issues. It defines the impacts of the environmental exposure of trace concentrations of CECs and/or their metabolites and discusses possible technological advances to combat the emerging pollutants. It will be useful to researchers, multi-stakeholder expert groups, policymakers, and graduate students.

**Advances in Computational and Bio-Engineering** S. Jyothi,D. M. Mamatha,Suresh Chandra Satapathy,K. Srujan Raju,Margarita N. Favorskaya,2020-07-19 This book gathers state-of-the-art research in computational engineering and bioengineering to facilitate knowledge exchange between various scientific communities. Computational engineering (CE) is a relatively new discipline that addresses the development and application of computational models and simulations often coupled with high-performance computing to solve complex physical problems arising in engineering analysis and design in the context of natural phenomena. Bioengineering (BE)

is an important aspect of computational biology, which aims to develop and use efficient algorithms, data structures, and visualization and communication tools to model biological systems. Today, engineering approaches are essential for biologists, enabling them to analyse complex physiological processes, as well as for the pharmaceutical industry to support drug discovery and development programmes.

The Hole in the Universe K. C. Cole,2012-07-18 “A compelling, enjoyable, and widely accessible exploration of one of the most fundamental scientific issues of our age” (Brian Greene, author of *The Elegant Universe*). In *The Hole in the Universe*, an award-winning science writer “provides an illuminating slant on physics and mathematics by exploring the concept of nothing” (*Scientific American*). Welcome to the world of cutting-edge math, physics, and neuroscience, where the search for the ultimate vacuum, the point of nothingness, the ground zero of theory, has rendered the universe deep, rich, and juicy. Every time scientists and mathematicians think they have reached the ultimate void, something new appears: a black hole, an undulating string, an additional dimension of space or time, repulsive anti-gravity, universes that breed like bunnies. Cole’s exploration at the edge of everything is “as playfully entertaining as it is informative” (*San Jose Mercury News*). “A strong and sometimes mind-blowing introduction to the edges of modern physics.” —*Salon.com* “Comprising an expansive set of topics from the history of numbers to string theory, the big bang, even Zen, the book’s chapters are broken into bite-sized portions that allow the author to revel in the puns and awkwardness that comes with trying to describe a concept that no one has fully grasped. It is an amorphous, flowing, mind-bending discussion, written in rich, graceful prose. As clear and accessible as Hawking’s *A Brief History of Time*, this work deserves wide circulation, not just among science buffs.” —*Publishers Weekly*, starred review “Here we have the definitive book about nothing, and who would think that nothing could be so interesting . . . not only accessible but compelling reading.” —*St. Louis Post-Dispatch*

**The Shadow Factory** James Bamford,2009-07-14 James Bamford has been the preeminent expert on the National Security Agency since his reporting revealed the agency’s existence in the 1980s. Now Bamford describes the transformation of the NSA since 9/11, as the agency increasingly turns its high-tech ears on the American public. *The Shadow Factory* reconstructs how the NSA missed a chance to thwart the 9/11 hijackers and details how this mistake has led to a heightening of domestic surveillance. In disturbing detail, Bamford describes exactly how every American’s data is being mined and what is being done with it. Any reader who thinks America’s liberties are being protected by Congress will be shocked and appalled at what is revealed here.

*Recent Trends in Image Processing and Pattern Recognition* K. C. Santosh,Ravindra S. Hegadi,2019-07-19 This three-volume set constitutes the refereed proceedings of the Second International Conference on Recent Trends in Image Processing and Pattern Recognition (RTIP2R) 2018, held in Solapur, India, in December 2018. The 173 revised full papers presented were carefully reviewed and selected from 374 submissions. The papers are organized in topical sections in the tree volumes. Part I: computer vision and pattern recognition; machine learning and applications; and image processing. Part II: healthcare and medical imaging; biometrics and applications. Part III: document image analysis; image analysis in agriculture; and data mining, information retrieval and applications.

**Visual and Written Culture in Ancient Egypt** John Baines,2007-05-17 A generously illustrated collection of John Baines’s influential writings on the role of writing and the importance of visual culture in ancient Egypt. Investigation of these key topics in a

comparative study of early civilizations is pursued through a number of case studies, and characterized by a radically interdisciplinary approach.

**The Modern American House** Sandy Isenstadt,2014-06-09 Sandy Isenstadt examines how architects, interior designers, and landscape designers worked to enhance spatial perception in middle class houses visually. The desire for spaciousness reached its highest pitch where it was most lacking, in the small, single-family houses that came to be the cornerstone of middle class life in the nineteenth century. In direct conflict with actual dimensions, spaciousness was linked to a tension unique to the middle class - between spatial aspirations and financial limitations. Although rarely addressed in a sustained fashion by theorists, practitioners, or the inhabitants of houses themselves, Isenstadt argues that spaciousness was central to the development of modern American domestic architecture, with explicit strategies for perceiving space being pivotal to modern house design. Through professional endorsement, concern for visual space found its way into discussion of real estate and law.

**Advances and Applications Through Fungal Nanobiotechnology** Ram Prasad,2016-11-08 Fungal nanobiotechnology has emerged as one of the key technologies, and an eco-friendly, as a source of food and harnessed to ferment and preserve foods and beverages, as well as applications in human health (antibiotics, anti-cholesterol statins, and immunosuppressive agents), while industry has used fungi for large-scale production of enzymes, acids, biosurfactants, and to manage fungal disease in crops and pest control. With the harnessing of nanotechnology, fungi have grown increasingly important by providing a greener alternative to chemically synthesized nanoparticles.

**Smart Intelligent Computing and Applications** Suresh Chandra Satapathy,Vikrant Bhateja,J. R. Mohanty,Siba K. Udgata,2019-09-26 This book gathers high-quality papers presented at the Third International Conference on Smart Computing and Informatics (SCI 2018-19), which was organized by the School of Computer Engineering and School of Computer Application, Kalinga Institute of Industrial Technology, Bhubaneswar, India, on 21-22 December, 2018. It includes advanced and multi-disciplinary research on the design of smart computing and informatics. Thematically, the book broadly focuses on several innovation paradigms in system knowledge, intelligence and sustainability that can help to provide realistic solutions to various problems confronting society, the environment, and industry. The respective papers offer valuable insights into the how emerging computational and knowledge transfer approaches can be used to deliver optimal solutions in science, technology and healthcare.
