*Motion Deblurring* A. N. Rajagopalan, Rama Chellappa, 2014-05-08 Comprehensive guide to the restoration of images degraded by motion blur, encompassing algorithms and architectures, with novel computational photography methods.

*Electronic and Experimental Music* Thomas B. Holmes, Thom Holmes, 2002 The second edition of a classic text on the history of electronic music, this book has been thoroughly updated to present material on home computers and the Internet, as well as enlarged sections on history and theoretical issues.

*Post Cinematic Affect* Steven Shaviro, 2010 Post-Cinematic Affect is about what it feels like to live in the affluent West in the early 21st century. Specifically, it explores the structure of feeling that is emerging today in tandem with new digital technologies, together with economic globalization and the financialization of more and more human activities. The 20th century was the age of film and television; these dominant media shaped and reflected our cultural sensibilities. In the 21st century, new digital media help to shape and reflect new forms of sensibility. Movies (moving image and sound works) continue to be made, but they have adopted new formal strategies, they are viewed under massively changed conditions, and they address their spectators in different ways than was the case in the 20th century. The book traces these changes, focusing on four recent moving-image works: Nick Hooker's music video for Grace Jones' song Corporate Cannibal; Olivier Assayas' movie Boarding Gate, starring Asia Argento; Richard Kelly's movie Southland Tales, featuring Justin Timberlake, Dwayne Johnson, and other pop culture celebrities; and Mark Nevelndine and Brian Taylor's Gamer.

**Interactive Storytelling** Rebecca Rouse, Hartmut Koenitz, Mads Haahr, 2018-11-26 This book constitutes the refereed proceedings of the 11th International Conference on Interactive Digital Storytelling, ICIDS 2018, held in Dublin, Ireland, in December 2018. The 20 revised full papers and 16 short papers presented together with 17 posters, 11 demos, and 4 workshops were carefully reviewed and selected from 56, respectively 29, submissions. The papers are organized in the following topical sections: the future of the discipline; theory and analysis; practices and games; virtual reality; theater and performance; generative and assistive tools and techniques; development and analysis of authoring tools; and impact in culture and society.

Avatamsaka Buddhism in East Asia Robert M. Gimello, Frédéric Girard, Imre Hamar, 2012 The volume about Avatamsaka Buddhism in East Asia is the result of a symposium organized in France in 2008. 15 contributions reflect the ways of manifestation and of expression of Huayan doctrines in several geographical regions and at different periods. Compared with previous valuable studies, the present volume intends to open broader perspectives, to give the opportunity to develop opened problematics, based on primary sources, textual and iconological. The Avatamsaka doctrines have developed particular ways of expression and paradigms on the Chinese soil, as a sinized Buddhism, they may be said to have achieved a philosophical revolution in the history of Mahayana: the Absolute is not the goal of the philosophical and soteriological inquiry, but its point of departure. The world is not only an illusion to be transcended but a manifestation of this very Absolute. The Avatamsaka can be seen as the backbone of influential currents, the Chan or Zen, the Tiantai or Tendai, the Ritualistic Buddhism, the Pure Land teachings, as well as the Song studies. The renewal of problematics on history of religion in the Far East region, as the so-called combined scheme simultaneously philosophical (exoteric) and ritualist (esoteric), gives a meaning to the approach of Avatamsaka current as common denominator linked from China till the Qitan region to Korea and Japan.

**Upgrading and Repairing PCs** Scott Mueller, 2000 Upgrading and Repairing PCs, Linux Edition addresses Linux-specific hardware issues that do not arise with Windows or DOS. Based on Upgrading and Repairing PCs, 11th Edition, this book covers Linux information such as system requirements, installation and setup, drive partitioning, kernel parameters, memory, and compatibility between Linux and components and components with each other. While Windows has a slick installation that automatically determines most of the hardware in a PC, Linux users still must struggle to identify, configure, and install the hardware in their PCs. This book is an essential reference to understand how your PC hardware works, how it interacts with Linux, and how to troubleshoot, repair, and upgrade the components in a Linux system.

**Housing, Land, and Property Rights in Post-Conflict United Nations and Other Peace Operations** Scott Leckie, 2009 This book is about the UN's role in housing, land, and property rights in countries after violent conflict.

**The World of Khubilai Khan** James C. Y. Watt, 2010 Published in conjunction with an exhibition held at the Metropolitan Museum of Art, New York, Sept. 28, 2010-Jan. 2, 2011.

**Interactive Digital Narrative** Hartmut Koenitz, Gabriele Ferri, Mads Haahr, Diğdem Sezen, Tonguç İbrahim Sezen, 2015-04-10 The book is concerned with narrative in digital media that changes according to user input-Interactive Digital Narrative (IDN). It provides a broad overview of current issues and future directions in this multi-disciplinary field that includes humanities-based and computational perspectives. It assembles the voices of leading researchers and practitioners like Janet Murray, Marie-Laure Ryan, Scott Rettberg and Martin Rieser. In three sections, it covers history, theoretical perspectives and varieties of practice including narrative game design, with a special focus on changes in the power relationship between audience and author enabled by interactivity. After discussing the historical development of diverse forms, the book presents theoretical standpoints including a semiotic perspective, a proposal for a specific theoretical framework and an inquiry into the role of artificial intelligence. Finally, it analyses varieties of current practice from digital poetry to location-based applications, artistic experiments and expanded remakes of older narrative game titles.

**Discorrelated Images** Shane Denson, 2020-09-18 In Discorrelated Images Shane Denson examines how computer-generated digital images displace and transform the

traditional spatial and temporal relationships that viewers had with conventional analog forms of cinema. Denson analyzes works ranging from the Transformers series and Blade Runner 2049 to videogames and multimedia installations to show how what he calls *discorrelated images*—images that do not correlate with the abilities and limits of human perception—produce new subjectivities, affects, and potentials for perception and action. Denson's theorization suggests that new media theory and its focus on technological development must now be inseparable from film and cinema theory. There's more at stake in understanding *discorrelated images*, Denson contends, than just a reshaping of cinema, the development of new technical imaging processes, and the evolution of film and media studies: *discorrelated images* herald a transformation of subjectivity itself and are essential to our ability to comprehend nonhuman agency.

**Hot Wired Style** Jeffrey Veen,1997 The web has its own language, aesthetics, issues, and problems; yet the infrastructure and rules of web site design are still in their infancy. Here, the author discusses how Web designers should collaborate with editors and engineers, have an acute understanding of the concept of real-time, master hypertext, know their audience, be wary of multimedia, and create sites that emphasize simplicity and clarity and that users can move through quickly. Includes numerous color reproductions of web pages. Annotation copyrighted by Book News, Inc., Portland, OR

**Industries of Architecture** Katie Lloyd Thomas,Tilo Amhoff,Nick Beech,2015-11-06 At a time when the technologies and techniques of producing the built environment are undergoing significant change, this book makes central architecture’s relationship to industry. Contributors turn to historical and theoretical questions, as well as to key contemporary developments, taking a humanities approach to the Industries of Architecture that will be of interest to practitioners and industry professionals, as much as to academic researchers, teachers and students. How has modern architecture responded to mass production? How do we understand the necessarily social nature of production in the architectural office and on the building site? And how is architecture entwined within wider fields of production and reproduction—finance capital, the spaces of regulation, and management techniques? What are the particular effects of techniques and technologies (and above all their inter-relations) on those who labour in architecture, the buildings they produce, and the discursive frameworks we mobilise to understand them?

**The Sixth Station** Linda Stasi,2013-12-01 Some say Demiel ben Yusef is the world's most dangerous terrorist, personally responsible for bombings and riots that have claimed the lives of thousands. Others insist he is a man of peace, a miracle worker, and possibly even the Son of God. His trial in New York City for crimes against humanity attracts scores of protestors, as well as media and religious leaders from around the world. Cynical reporter Alessandra Russo heads to the UN hoping for a piece of the action, but soon becomes entangled in controversy and suspicion when ben Yusef singles her out for attention among all other reporters. As Alessandra begins digging into ben Yusef's past, she is already in more danger than she knows—and when she is falsely accused of murder during her investigation, she is forced to flee New York. On the run from unknown enemies, Alessandra finds herself on the trail of a global conspiracy and a story that could shake the world to its foundations. Is Demiel ben Yusef the Second Coming or the Antichrist? The truth may lie in the secret history of the Holy Family, a group of Templars who defied the church, and a mysterious relic stained with the sacred blood of Christ Himself.

**The Programmer's Job Handbook** Gene Wang,1996 The ideal book for every programmer and software developer, The Programmer's Job Handbook covers what every programmer needs to know to optimize their career. The book covers such topics as where the best jobs are, who pays the most, and what skills are going to be in the greatest demand. It also discusses building the perfect resume and having the perfect interview.

**Understanding Cybercrime** United Nations Publications,2017-07-31 Cyber attacks are on the rise. The media constantly report about data breaches and increasingly sophisticated cybercrime. Even governments are affected. At the same time, it is obvious that technology alone cannot solve the problem. What can countries do? Which issues can be addressed by policies and legislation? How to draft a good law? The report assists countries in understanding what cybercrime is about, what the challenges are in fighting such crime and supports them in drafting policies and laws.

*John Baldessari* Matilda Olof-Ors,2020 By combining and colliding the unexpected, the US artist John Baldessari (1931-2020), created conceptual works that raise questions regarding what art is, how art is made, and what art can look like. After concluding in the 1960s that a photographic image or a text were more adequate expressions of his artistic intentions than painting, John Baldessari's practice took a new direction. Since then, Baldessari has combined subjects from the imagery of popular culture with linguistic examinations, creating works that challenge artistic norms and boundaries. Besides the two essays the book also includes a wide selection of Baldessari's own writings from 1968-2011.
