Frontiers in Water-Energy-Nexus—Nature-Based Solutions, Advanced Technologies and Best Practices for Environmental Sustainability Vincenzo Naddeo,Malini Balakrishnan,Kwang-Ho Choo,2019-09-18 This volume includes selected contributions presented during the 2nd edition of the international conference on WaterEnergyNEXUS which was held in Salerno, Italy in November 2018. This conference was organized by the Sanitary Environmental Engineering Division (SEED) of the University of Salerno (Italy) in cooperation with Advanced Institute of Water Industry at Kyungpook National University (Korea) and with The Energy and Resources Institute, TERI (India). The initiative received the patronage of UNESCO – World Water Association Programme (WWAP) and of the International Water Association (IWA) and was organized with the support of Springer (MENA Publishing Program), Arab Water Council (AWC), Korean Society of Environmental Engineering (KSEE) and Italian Society of Sanitary Environmental Engineering Professors (GITISA). With the support of international experts invited as plenary and keynote speakers, the conference aimed to give a platform for Euro-Mediterranean countries to share and discuss key topics on such water-energy issues through the presentation of nature-based solutions, advanced technologies and best practices for a more sustainable environment. This volume gives a general and brief overview on current research focusing on emerging Water-Energy-Nexus issues and challenges and its potential applications to a variety of environmental problems that are impacting the Euro-Mediterranean zone and surrounding regions. A selection of novel and alternative solutions applied worldwide are included. The volume contains over about one hundred carefully refereed contributions from 44 countries worldwide selected for the conference. Topics covered include (1) Nexus framework and governance, (2) Environmental solutions for the sustainable development of the water sector, (3) future clean energy technologies and systems under water constraints, (4) environmental engineering and management, (5) Implementation and best practices Intended for researchers in environmental engineering, environmental science, chemistry, and civil engineering. This volume is also an invaluable guide for industry professionals working in both water and energy sectors.

Operator Handbook Joshua Picolet,2020-03-18 The Operator Handbook takes three disciplines (Red Team, OSINT, Blue Team) and combines them into one complete reference guide. The book contains 123 individual cheat sheet references for many of the most frequently used tools and techniques by practitioners. Over 400 pages of content to assist the most seasoned cybersecurity veteran or someone just getting started in the career field. The goal of combining all disciplines into one book was to remove the artificial barriers that only certain knowledge exists within a Team. The reality is today's complex digital landscape demands some level of knowledge in all areas. The Operator culture should mean a well-rounded team member no matter the Team you represent. All cybersecurity practitioners are Operators. The Blue Team should observe and understand Red Team tactics, Red Team should continually push collaboration with the Blue Team, and OSINT should continually work to peel back evidence of evil doers scattered across disparate data sources. In the spirit of having no separation, each reference is listed in alphabetical order. Not only does this remove those team separated notions, but it also aids in faster lookup. We've all had the same experience where we knew there was an NMAP Cheat Sheet but did it fall under Networking, Windows, or Tools? In the Operator Handbook it begins with N so flip to the N's section. Also almost every topic is covered in How to exploit X and How to defend X perspectives. Tools and topics covered: Cloud (AWS, Azure, GCP), Windows, macOS, Linux, Android, iOS, DevOps (Docker, Kubernetes), OSINT, Ports, Forensics, Malware Resources, Defender tools, Attacker tools, OSINT tools, and various other supporting tools (Vim, iptables, nftables, etc...). This handbook was truly meant to be a single source for the most common tool and techniques an Operator can encounter while on the job. Search Copy Paste L33t.

Creative Writing in the Digital Age Michael Dean Clark,2015-01-29 Creative Writing in the Digital Age explores the vast array of opportunities that technology provides the Creative Writing teacher, ranging from effective online workshop models to methods that blur the boundaries of genre. From social media tools such as Twitter and Facebook to more advanced software like Inform 7, the book investigates the benefits and potential challenges these technologies present instructors in the classroom. Written with the everyday instructor in mind, the book includes practical classroom lessons that

can be easily adapted to creative writing courses regardless of the instructor's technical expertise.

Geragogics Celia M. Berdes, Grace D. Dawson, 1992 In this new book, a variety of European researchers and scholars present their most current and interesting research in the field of geragogics--the European term for gerontological education and educational gerontology. These professionals forward the concept of geragogics to open readers' minds and eyes to streams of geragogics research that have often been neglected in the U.S. Geragogics examines the history, scope, principles, and practice of geragogics, and defines some of the kinds of work that are being conducted in the field in Europe. It suggests new and exciting areas for research and promotes a new integration of gerontological education and educational gerontology, encouraging readers to move beyond the disciplinary and research conventions which have limited exploitation of the field. This state-of-the-art report on European research makes an exciting and informative volume. Along with a comprehensive overview of the field of geragogics, chapters in this book cover topics such as: the effects of participation in third age universities motivations for continuing education in old age measuring the working ability of aging workers driving education for the elderly educational approaches to serving elderly immigrants comparative life values of European and American elderly Academics and researchers in gerontological education and educational gerontology and professionals involved in international aging, European immigrant elderly, and programs of education and employment for the elderly will find this book a valuable addition to the literature. Geragogics is a thought-provoking journey through fields and perspectives often ignored in the United States.

India in Space: Between Utility and Geopolitics Marco Aliberti, 2018-01-17 This book presents the renewing strategic vision and progressive diversification of the Indian space programme at the nexus socio-economic development, commerce and geopolitics. It disentangles India's evolving rationales for engaging in space from a wide range of perspectives and provides novel and in-depth assessment of the domestic, regional and international factors influencing the pace and directions of the country's space programme. The study hence includes an extensive analysis of India's path forward, including a reflection on the long-term evolution of its civil, military and commercial space efforts, as well as considerations on the toolbox India has at its disposal, on the prospected adaptation of the space ecosystem, and on the implications these evolutions may generate both domestically and internationally. A central part of this final analysis is more specifically devoted to elaborating on the prospects and opportunities for European stakeholders, with the goal of identifying possible domains of closer and mutually beneficial Europe-India space cooperation and sorting out possible elements for a comprehensive European long-term strategy towards India.

Landscape and Sustainability John Benson, Maggie Roe, 2007-08-07 This unique book addresses the issue of sustainability from the point of view of landscape architecture, dealing with professional practices of planners, designers and landscape managers. This second edition contains updated and new material reflecting developments during the last five years and comprehensively addresses the relationship between landscape architecture and

sustainability. Much in the text is underpinned by landscape ecology, in contrast to the idea of landscape as only appealing to the eye or aspiring cerebrally to be fine art. Landscape and Sustainability establishes that the sustainability agenda needs a new mindset among professionals: the driving question must always be ‘is it sustainable?’ Developing theory into practice, from the global to the local scale and from issues of policy and planning through to detailed design and implementation and on to long-term maintenance and management, the contributors raise and re-examine a complex array of research, policy and professional issues and agendas to contribute to the necessary ongoing debate about the future of both landscape and sustainability.

Clean Surplus Richard P. Brief, K. V. Peasnell, 2013-09-13 First published in 1996. The relationship between the present discounted value of future cash flows and discounted excess earnings should be viewed as a mathematical property of a double-entry book[1]keeping system based on clean surplus. The purpose of this anthology is to facilitate future research by highlighting these historical developments and by showing how more recent theoretical and empirical research fits into the earlier history. The book is divided into four sections: historical overview; analytical properties of clean surplus; the theory of the clean surplus equation; and empirical implications.

OECD Studies on SMEs and Entrepreneurship The Digital Transformation of SMEs OECD, 2021-02-03 Despite potentially tremendous benefits, small and medium-sized enterprises (SMEs) lag in the digital transformation. Emerging technologies, as diverse as they are, offer a range of applications for them to improve performance and overcome the size-related limitations they face in doing business. However, SMEs must be better prepared, and stakes are high. SMEs make the most of the industrial fabric in many countries and regions, they create jobs (most jobs sometimes) and are the cement of inclusive and sustainable societies.

OECD SME and Entrepreneurship Outlook 2019 OECD, 2019-05-20 The new OECD SME and Entrepreneurship Outlook presents the latest trends in performance of small and medium-sized enterprises (SMEs) and provides a comprehensive overview of business conditions and policy frameworks for SMEs and entrepreneurs. This year’s edition provides comparative evidence on business dynamism, productivity growth, wage gaps and export trends by firm size across OECD countries and emerging economies.

Transport for Tourism Stephen Page, 1999-10 Transport for Tourism provides a novel and stimulating assessment of the effects of tourism travel and the challenge this poses for transport planners, providers and policy makers in the 1990s. Unique in addressing the relationship between transport and tourism at an introductory level, the book covers key topics such as the role of government policy, supply and demand relationships, quality control systems, health and sustainability, and environmental impact. A range of international case studies—including transport in Bermuda, Singapore airways, British airways and Japanese transport systems—provide insight into these issues. The interdisciplinary approach ensures a holistic treatment of this important topic.
