David T. Courtwright

Financial Inclusion in Emerging Markets Ananda

S., Dharmendra Singh, 2021-10-04 This book discusses ideas for stakeholders to develop strategies to access and use financial products and services such as deposits, loans, and fund transfer mechanism, insurance, payment services, and intermediaries, distribution channels at economical prices in order to cater to the needs of the poor and underprivileged people. Financial inclusion ensures ease of access, availability, and usage of the financial products and services to all the sections of the society. The book will help in recognizing the role of financial inclusion as one of the main drivers in reducing income inequality and thus supporting sustainable economic growth of the countries, especially of an emerging economy. The book provides conceptual and practical ideas from the practitioners, best practices from the experts, and empirical views from the researchers on the best practices and how to mitigate the challenges and issues plaguing the development of the financial inclusion.

5th International Conference on Biomedical Engineering in

Vietnam Vo Van Toi, Tran Ha Lien Phuong, 2014-11-18 This volume presents the proceedings of the Fifth International Conference on

the Development of Biomedical Engineering in Vietnam which was held from June 16-18, 2014 in Ho Chi Minh City. The volume reflects the progress of Biomedical Engineering and discusses problems and solutions. It aims at identifying new challenges, and shaping future directions for research in biomedical engineering fields including medical instrumentation, bioinformatics, biomechanics, medical imaging, drug delivery therapy, regenerative medicine and entrepreneurship in medical devices.

Emerging Topics in Management Studies Patrícia Moura e Sá, 2020-08-02 Presently, Management has witnessed vast advancements, clearly becoming an area of trans and interdisciplinary knowledge. It has widened its scope from traditional business areas – such as marketing, strategy, management control, accounting and finance, taxation or operations – to other spaces, namely deepening bridges with behavioural sciences, engineering, health, or energy, fostering both quantitative models and methods. Management thinking at the Faculty of Economics of the University of Coimbra (FEUC) has followed these trends, enabling students with the essential skills supporting the practice of the profession, both in business and public sector organisations. This book features topical trends of

research in Management studies, in which FEUC professors are involved, together with international peers, evidencing the openness of the Faculty to the world. Numerous of the subjects addressed relate to challenges that organisations are already facing or will have to deal with shortly. Therefore, the book not only presents innovative research questions, but it also delivers a practical perspective. Thus, organisations will certainly find here some support to better manage those issues in practice.

Advances in Simulation and Digital Human Modeling Daniel N Cassenti, Sofia Scataglini, Sudhakar L. Rajulu, Julia L.

Wright, 2020-06-27 This book presents the latest advances in modeling and simulation for human factors research. It reports on cutting-edge simulators such as virtual and augmented reality, multisensory environments, and modeling and simulation methods used in various applications, including surgery, military operations, occupational safety, sports training, education, transportation and robotics. Based on two AHFE 2020 Virtual Conferences such as the AHFE 2020 Virtual Conference on Human Factors and Simulation and the AHFE 2020 Virtual Conference on Digital Human Modeling and Applied Optimization, held on July 16–20, 2020, the book serves as a timely reference guide for researchers

and practitioners developing new modeling and simulation tools for analyzing or improving human performance. It also offers a unique resource for modelers seeking insights into human factors research and more feasible and reliable computational tools to foster advances in this exciting field.

Advances in Signal Processing and Intelligent Recognition

Systems Sabu M. Thampi, Rajesh M. Hegde, Sri Krishnan, Jayanta Mukhopadhyay, Vipin Chaudhary, Oge Marques, Selwyn Piramuthu, Juan M. Corchado, 2020-04-30 This book constitutes the refereed proceedings of the 5th International Symposium on Advances in Signal Processing and Intelligent Recognition Systems, SIRS 2019, held in Trivandrum, India, in December 2019. The 19 revised full papers and 8 revised short papers presented were carefully reviewed and selected from 63 submissions. The papers cover wide research fields including information retrieval, human-computer interaction (HCI), information extraction, speech recognition.

Telematics and Computing Miguel Felix Mata-Rivera, Roberto

Zagal-Flores, Cristian Barría-Huidobro, 2019-10-24 This book constitutes the thoroughly refereed proceedings of the 8th International Congress on Telematics and Computing, WITCOM

2019, held in Merida, Mexico, in November 2019. The 31 full papers presented in this volume were carefully reviewed and selected from 78 submissions. The papers are organized in topical sections: GIS & climate change; telematics & electronics; artificial intelligence & machine learning; software engineering & education; internet of things; and informatics security.

Proceedings of International Conference on Thermofluids

Shripad Revankar, Swarnendu Sen, Debjyoti Sahu, 2020-11-21 This book presents selected and peer-reviewed proceedings of the International Conference on Thermofluids (KIIT Thermo 2020). It focuses on the latest studies and findings in the areas of fluid dynamics, heat transfer, thermodynamics, and combustion. Some of the topics covered in the book include electronic cooling, HVAC system analysis, inverse heat transfer, combustion, nano-fluids, multiphase flow, high-speed flow, and shock waves. The book includes both experimental and numerical studies along with a few review chapters from experienced researchers, and is expected to lead to new research in this important area. This book is of interest to students, researchers as well as practitioners working in the areas of fluid dynamics, thermodynamics, and combustion.

Data Driven Approach Towards Disruptive Technologies T P

Singh,Ravi Tomar,Tanupriya Choudhury,Thinagaran

Perumal,Hussain Falih Mahdi,2022-04-07 This book is a compilation of peer-reviewed papers presented at the International Conference on Machine Intelligence and Data Science Applications, organized by the School of Computer Science, University of Petroleum & Energy Studies, Dehradun, India, during 4–5 September 2020. The book addresses the algorithmic aspect of machine intelligence which includes the framework and optimization of various states of algorithms. Variety of papers related to wide applications in various fields like data-driven industrial IoT, bioinformatics, network and security, autonomous computing and various other aligned areas. The book concludes with interdisciplinary applications like legal, health care, smart society, cyber-physical system and smart agriculture. All papers have been carefully reviewed. The book is of interest to computer science engineers, lecturers/researchers in machine intelligence discipline and engineering graduates.

Corporate Sustainability Susana Garrido Azevedo,João Carlos O. Matias,2017 The current logic of the market economy consists of extracting, producing, consuming and discarding. The efforts made to reduce the negative environmental impacts and promote

recycling are not sufficient to offset the undesirable effects of this system described as take, make and dispose. However, this linear approach to production and consumption, which prioritizes economic goals at the expense of environmental and social goals, has reached its physical limit. The negative effects caused by this model threaten not only the stability of economies, but also the integrity of ecosystems, which are essential for human survival. More than ever, companies are pressured to adopt more sustainable models derived from the intensification of certain trends, such as: the increasing dependence on fossil fuels; the poor management of natural resources; climate change, which is caused mainly by the increasing emissions of greenhouse gases; and the competitiveness featured by an ever expanding global market. These trends are in line with the European 2020 Strategy, which sets out a number of objectives designed to ensure within this time-frame a change in current models regarding the impact on natural capital. The circular economy defends the same principles of sustainability, and both share the same concerns. The circular economy aims to eradicate waste not just from manufacturing processes, but systematically throughout the life cycles and uses of products, and their components contributing to make organisations

and the economy more sustainable. This book presents a scientific perspective about sustainability and the circular economy, describing different approaches, focusing on different sectors and exploring various methodologies. Welcome to the world of the circular economy and sustainability.

The Antitrust Paradox Robert Bork, 2021-02-22 The most important book on antitrust ever written. It shows how antitrust suits adversely affect the consumer by encouraging a costly form of protection for inefficient and uncompetitive small businesses.

Evidence-Based Counterterrorism Policy Cynthia Lum, Leslie W. Kennedy, 2011-11-06 In the past eight years, there has been a massive increase in government spending on counterterrorism intervention development and implementation. Given this increase, there are two evidence-based policy questions that are important to address: Is there evidence that any of these programs are effective – in other words, can they be shown to be linked to reducing terrorism, terrorist recruiting, or to improving the response and management of terrorist events? Do these interventions have secondary or collateral effects that may be costly, harmful, illegal, beneficial, or otherwise? As Lum and Kennedy discovered in an evaluation research on counterterrorism interventions, only a

minuscule number of empirical studies of terrorism exist and there is an almost complete absence of evaluation research on counter-terrorism strategies. This is startling given the enormous increases in the development and use of counter-terrorism programs, as well as spending on counter-terrorism activity. Even more disconcerting was the nature of the evaluations we did find; some programs were shown to either have no discernible effect on terrorism or lead to increases in terrorism. The emphasis of the need for empirical research in evaluating interventions and informing policy cannot be overstated, and is the primary goal of Evidence-Based Counterterrorism Policy.

Proceedings of 2nd International Conference on Communication, Computing and Networking C. Rama Krishna,Maitreyee Dutta,Rakesh Kumar,2018-09-07 The book provides insights from the 2nd International Conference on Communication, Computing and Networking organized by the Department of Computer Science and Engineering, National Institute of Technical Teachers Training and Research, Chandigarh, India on March 29–30, 2018. The book includes contributions in which researchers, engineers, and academicians as well as industrial professionals from around the globe presented

their research findings and development activities in the field of Computing Technologies, Wireless Networks, Information Security, Image Processing and Data Science. The book provides opportunities for the readers to explore the literature, identify gaps in the existing works and propose new ideas for research.

Information and Communication Technologies in Tourism 2020

Julia Neidhardt, Wolfgang Wörndl, 2019-12-16 Gathering the outcomes of the 27th annual international eTourism conference ENTER2020, this book presents new research, innovative systems and industry case studies on the application of Information and Communication Technologies (ICT) in travel and tourism. It shares the latest findings discussed at the conference and highlights various topics within the field, including social media, destination marketing, recommender systems and decision-making, virtual and augmented reality, technology in tourism, and research on hotels and activities. Readers will find a wealth of state-of-the-art insights and ideas on how information and communication technologies can be applied in travel and tourism.

Computational Intelligence in Pattern Recognition Asit Kumar

Das, Janmenjoy Nayak, Bighnaraj Naik, Soumi Dutta, Danilo Pelusi, 2021-09-04 This book features high-quality research papers

presented at the 3rd International Conference on Computational Intelligence in Pattern Recognition (CIPR 2021), held at the Institute of Engineering and Management, Kolkata, West Bengal, India, on 24 – 25 April 2021. It includes practical development experiences in various areas of data analysis and pattern recognition, focusing on soft computing technologies, clustering and classification algorithms, rough set and fuzzy set theory, evolutionary computations, neural science and neural network systems, image processing, combinatorial pattern matching, social network analysis, audio and video data analysis, data mining in dynamic environments, bioinformatics, hybrid computing, big data analytics and deep learning. It also provides innovative solutions to the challenges in these areas and discusses recent developments.

Contemporary Case Studies on Fashion Production, Marketing and Operations Pui-Sze Chow, Chun-Hung Chiu, Amy C. Y. Yip, Ailie K. Y. Tang, 2017-12-04 This book adopts a case study based research approach to examine the contemporary issues in the fashion industry. It documents real-world practices in fashion business from production, marketing to operations. Founded on an extensive review of literature, these case studies discuss the challenges that are pertinent to the current business environment in

this important industry, provide benchmarks and generate insights to practitioners as well as suggest future directions to researchers. The book serves as a nexus of the theories and the industrial practices that advances knowledge for both the academia and the private sector in fashion business.

Proceedings of 3rd International Conference on Computing Informatics and Networks Ajith Abraham,Oscar Castillo,Deepali Virmani,2021-03-14 This book is a collection of high-quality peer-reviewed research papers presented in the Third International Conference on Computing Informatics and Networks (ICCIN 2020) organized by the Department of Computer Science and Engineering (CSE), Bhagwan Parshuram Institute of Technology (BPIT), Delhi, India, during 29–30 July 2020. The book discusses a wide variety of industrial, engineering and scientific applications of the emerging techniques. Researchers from academic and industry present their original work and exchange ideas, information, techniques and applications in the field of artificial intelligence, expert systems, software engineering, networking, machine learning, natural language processing and high-performance computing.

Financial Modeling Simon Benninga,Benjamin Czaczkes,2000

Too often, finance courses stop short of making a connection between textbook finance and the problems of real-world business. Financial Modeling bridges this gap between theory and practice by providing a nuts-and-bolts guide to solving common financial problems with spreadsheets. The CD-ROM contains Excel* worksheets and solutions to end-of-chapter exercises. 634 illustrations.

The Conversational Interface Michael McTear,Zoraida Callejas,David Griol,2016-05-19 This book provides a comprehensive introduction to the conversational interface, which is becoming the main mode of interaction with virtual personal assistants, smart devices, various types of wearable, and social robots. The book consists of four parts. Part I presents the background to conversational interfaces, examining past and present work on spoken language interaction with computers. Part II covers the various technologies that are required to build a conversational interface along with practical chapters and exercises using open source tools. Part III looks at interactions with smart devices, wearables, and robots, and discusses the role of emotion and personality in the conversational interface. Part IV examines methods for evaluating conversational interfaces and discusses

future directions.

The Age of Addiction David T. Courtwright, 2019-05-06 We live in an age of addiction, from compulsive gaming and shopping to binge eating and opioid abuse. What can we do to resist temptations that insidiously and deliberately rewire our brains? Nothing, David Courtwright says, unless we understand the global enterprises whose “limbic capitalism” creates and caters to our bad habits.

Sams Teach Yourself E-Banking Today Brian Dixon, Mary Dixon, Brian Nixon, 2000 *Sams Teach Yourself e-Banking Today* is a comprehensive tutorial of this emerging online trend. The reader will be taught the best practices of online banking. They will learn how to compare services and fees and determine which online bank is right for them. The book will explain the security risks of online banking in clear, friendly terms. It will teach the reader how to take control of their money by employing the information available on the Internet. The book will also show the reader how to link popular software packages like Quicken and MS Money to their online bank.

Embark on a breathtaking journey through nature and adventure with Explore with is mesmerizing ebook, Witness the Wonders in **Stocks Gadget Windows 8 A 2493.htm** . This immersive experience, available for download in a PDF format (Download in PDF: *), transports you to the heart of natural marvels and thrilling escapades. Download now and let the adventure begin!
