Innovation and Entrepreneurship Charles H. Matthews,Ralph Brueggemann,2015-03-12 This book presents a new model, the competency framework, for students, innovators, entrepreneurs, managers, and anyone who wants to better understand the dynamic world of innovation and entrepreneurship. Focused on both the individual and strategic organizational level, this book is about people and the competencies each person needs to learn to be successful in creating a more dynamic future. Matthews and Brueggemann's framework for innovation and entrepreneurship competencies empowers individuals to excel at innovation and new venture creation. It provides a practical guide and clear and concise understanding of the knowledge, skills, attitudes, and experiences that are needed to increase imagination, creativity, innovation and new venture creation capability. Innovation and Entrepreneurship will be attractive for students of entrepreneurship, innovation, management and cross-disciplinary classes, such as design thinking. Presented in a modular format, Innovation & Entrepreneurship informs the future direction of people and technology, as well as the educational systems producing the next generation of innovators and entrepreneurs. Based on extensive academic research, this book is organized into two sections: Twelve innovation elements and twelve competency categories. The elements are the foundation and the competency categories are the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives.

What Works for Africa's Poorest Children David Lawson,Diego Angemi,1920-03-16 While there has been substantial progress in reducing global poverty in recent years, hundreds of millions of vulnerable children remain trapped in extreme poverty. This is especially the case on the African continent, where children account for the majority and growing proportion of the population. Despite rapid economic growth in several African countries, as well as significant achievements in both development and humanitarian interventions, a staggering number of African children remain vulnerable to extreme levels of deprivation. Existing challenges notwithstanding, a number of social policies and programmes proved successful in alleviating the burden of child poverty and deprivation. In addition to being vitally important in promoting and protecting children's rights, these social policies and programmes embody the international community's commitment to achieve the Social Development Goals (SDGs) and ensuring no one is left behind. What Works for Africa's Poorest Children? From Measurement to Action identifies the social policies and programmes that are most effective in supporting Africa's poorest and most vulnerable children, and examines the key features underpinning their documented success. It provides cutting edge examples on how we can identify child poverty and deprivation, analyses innovative ultra-poor child sensitive programmes, and provides new public financing and governance rights suggestions for child poverty elimination.

Smart Intelligent Computing and Applications Suresh Chandra Satapathy,Vikrant Bhateja,J. R. Mohanty,Siba K. Udgata,2019-09-26 This book gathers high-quality papers presented at the Third International Conference on Smart Computing and Informatics (SCI 2018-19), which was organized by the School of Computer Engineering and School of Computer Application, Kalinga Institute of Industrial Technology, Bhubaneswar, India, on 21-22 December, 2018. It includes advanced and multi-disciplinary research on the design of smart computing and informatics. Thematically, the book broadly focuses on several innovation paradigms in system knowledge, intelligence and sustainability that can help to provide realistic solutions to various problems confronting society, the environment, and industry. The respective papers offer valuable insights into the how emerging computational and knowledge transfer approaches can be used to deliver optimal solutions in science, technology and healthcare.

Organ Manufacturing Xiaohong Wang,2015 This is the first time that human organs, such as the heart, liver, kidney, stomach, uterus, skin, lung, pancreas and breast can be manufactured automatically and precisely for clinical transplantation, drug screening and metabolism model establishment. Headed by Professor Xiaohong Wang (also the founder and director) in the Center of Organ Manufacturing, Department of Mechanical Engineering, Tsinghua University, this group has focused on organ manufacturing for over ten years. A series of technical bottleneck problems, such as vascular and nerve system establishment in a construct, multiple cell types and material system incorporation, and stem cell sequential engagement, have been overcome one by one. Two technical approaches have been exploited extensively. One is multiple nozzle rapid prototyping (RP), additive manufacturing (AM), or three-dimension (3D) printing. The other is combined mold systems. More than 110 articles and 40 patents with a series of theories and practices have been published consequently. In the future, all the failed organs (including the brain) in the human body can be substituted easily like a small accessory part in a car. Everyone can get benefit from these techniques, which ultimately means that the lifespan of humans, therefore, can be greatly prolonged from this time point. This book examines the progress made in the field and the developments made by these researchers (and authors) in the field.

The Future of the Internet Jonathan Zittrain,2009-05-28 In The Future of the Internet: And How to Stop It Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we could lose everything.

Customizing and Extending IBM Content Navigator Wei-Dong Zhu,Tomas Barina,Yi Duan,Nicole Hughes,Marcel Kostal,Chad Lou,Brett Morris,Rainer Mueller-Maechler,Ron Rathgeber,Jana Saalfeld,Jian Xin Zhang,Jie Zhang,IBM Redbooks,2015-04-13 IBM® Content Navigator provides a unified user interface for your Enterprise Content Management (ECM) solutions. It also provides a robust development platform so you can build customized user interface and applications to deliver value and an intelligent, business-centric experience. This IBM Redbooks® publication guides you through the Content Navigator platform, its architecture, and the available programming interfaces. It describes how you can configure and customize the user interface with the administration tools provided, and how you can customize and extend Content Navigator using available development options with sample code. Specifically, the book shows how to set up a development environment, and develop plug-ins that add an action, service, and feature to the user interface. Customization topics include implementing request and response filters, external data services (EDS), creating custom step processors, and using Content Navigator widgets in other applications. This book also covers mobile development, viewer customization, component deployment, and debugging and troubleshooting. This book is intended for IT architects, application designers and developers working with IBM Content Navigator and IBM ECM products. It offers a high-level description of how to extend and customize IBM Content Navigator and also more technical details of how to do implementations with sample code.

How To Watch Television Ethan Thompson,Jason Mittell,2013-09-16 Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How

to Watch Television brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, *How to Watch Television* is designed to engender classroom discussion among television critics of all backgrounds.

Parents of Missionaries Cheryl Savageau, Diane Stortz, 2012-01-05 As a parent of a missionary you may feel that missing your child and your grandchildren signals a lack of faith. But proclaiming the gospel and making disciples was not meant to eclipse the loving family bonds God ordained. Whether you're the parent of a missionary recruit or a parent of an experienced missionary, you'll benefit from the authors' research and personal experience as they present a comprehensive plan for understanding missionary life, navigating the holidays, grandparenting long-distance and saying good-bye well. Combining a counselor's professional insight and a parent's personal journey, plus ideas and stories from dozens of missionaries and POMs, *Parents of Missionaries* is a valuable tool for missions mobilizers and educators as well as parents. The POM experience amounts to a journey through change, pain and adjustment. Wherever you are on that journey, this resource will encourage you and help you thrive and stay connected with your children and grandchildren serving cross-culturally. Not only can you survive as a parent of a missionary—you can thrive.

GMPLS Adrian Farrel, Igor Bryskin, 2005-12-20 The last two years have seen significant developments in the standardization of GMPLS and its implementation in optical and other networks. *GMPLS: Architecture and Applications* brings you completely up to date, providing the practical information you need to put the growing set of GMPLS-supported services to work and manage them effectively. This book begins by defining GMPLS's place in a transport network, leveraging your knowledge of MPLS to give you an understanding of this radically new control plane technology. An overview of GMPLS protocols follows, but the real focus is on what comes afterwards: in-depth examinations of the architectures underpinning GMPLS in real-world network environments and current and emerging GMPLS applications. This one-of-a-kind resource delivers immensely useful information for software architects, designers and programmers, hardware developers, system testers, and network operators--and also for managers and other decision-makers. Written by two industry researchers at the forefront of the development of GMPLS. Provides a practical look at GMPLS protocols for signaling, routing, link and resource management, and traffic engineering. Delves deep into the world of GMPLS applications, including traffic engineering, path computation, layer one VPNs, point-to-multipoint connectivity, service management, and resource protection. Explores three distinct GMPLS control plane architectures: peer, overlay, and hybrid, and explains the GMPLS UNI and NNIs. Explains how provisioning challenges can be met in multi-region networks and details the provisioning systems and tools relied on by the GMPLS control plane, along with the standard MIB modules used to manage a GMPLS system.

Information and Communication Technology Linawati, Made Sudiana Mahendra, Erich J. Neuhold, A Min Tjoa, Il-sun You, 2014-03-25 This book constitutes the refereed proceedings of the Second IFIP TC 5/8 International Conference on Information and Communication Technology, ICT-Eur Asia 2014, with the collocation of Asia ARES 2014 as a special track on Availability, Reliability and Security, held in Bali, Indonesia, in April 2014. The 70 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers have been organized in the following topical sections: applied modeling and simulation; mobile computing; advanced urban-scale ICT applications; semantic web and knowledge management; cloud computing; image processing; software engineering; collaboration technologies and systems; e-learning; data warehousing and data mining; e-government and e-health; biometric and bioinformatics systems; network security; dependable systems and applications; privacy and trust management; cryptography; multimedia security and dependable systems and applications.

Ancient Israel: What Do We Know and How Do We Know It? Lester L. Grabbe, 2017-02-23 In *Ancient Israel* Lester L. Grabbe sets out to summarize what we know through a survey of sources and how we know it by a discussion of methodology and by evaluating the evidence. The most basic question about the history of ancient Israel, how do we know what we know, leads to the fundamental questions of Grabbe's work: what are the sources for the history of Israel and how do we evaluate them? How do we make them 'speak' to us through the fog of centuries? Grabbe focuses on original sources, including inscriptions, papyri, and archaeology. He examines the problems involved in historical methodology and deals with the major issues surrounding the use of the biblical text when writing a history of this period. *Ancient Israel* provides an enlightening overview and critique of current scholarly debate. It can therefore serve as a 'handbook' or reference-point for those wanting a catalogue of original sources, scholarship, and secondary studies. Grabbe's clarity of style makes this book eminently accessible not only to students of biblical studies and ancient history but also to the interested lay reader. For this new edition the entire text has been reworked to take account of new archaeological discoveries and theories. There is a major expansion to include a comprehensive coverage of David and Solomon and more detailed information on specific kings of Israel throughout. Grabbe has also added material on the historicity of the Exodus, and provided a thorough update of the material on the later bronze age.

The Religion of Israel Yehezkel Kaufmann, 2003

Canaan and Israel in Antiquity: A Textbook on History and Religion K. L. Noll, 2013-03-14 This comprehensive classic textbook represents the most recent approaches to the biblical world by surveying Palestine's social, political, economic, religious and ecological changes from Palaeolithic to Roman eras. Designed for beginners with little knowledge of the ancient world, and with copious illustrations and charts, it explains how and why academic study of the past is undertaken, as well as the differences between historical and theological scholarship and the differences between ancient and modern genres of history writing. Classroom tested chapters emphasize the authenticity of the Bible as a product of an ancient culture, and the many problems with the biblical narrative as a historical source. Neither maximalist nor minimalist' it is sufficiently general to avoid confusion and to allow the assignment of supplementary readings such as biblical narratives and ancient Near Eastern texts. This new edition has been fully revised, incorporating new graphics and English translations of Near Eastern inscriptions. New material on the religiously diverse environment of Ancient Israel taking into account the latest archaeological discussions brings this book right up to date.

What Works for Africa's Poorest? David Lawson, Lawrence Ado-Kofie, David Hulme, 2017 Well-designed microfinance can help poor people improve their lives but generally such programmes do not reach the poorest. As a result, NGOs and donors have started to mount programmes explicitly targeting the extreme poor, the poorest and the ultra-poor.
