**Satellite-based Applications on Climate Change** John Qu, Alfred Powell, M.V.K. Sivakumar, 2013-03-19 Climate and other environmental changes are drawing unprecedented concern and attention from national governments, international organizations and local communities. Global warming has left noticeable impacts on the environment and the ecosystems it supports (including humans), and has important implications for sustainable economic and social development in the future. Satellite observations of climate and environmental change have become an increasingly important tool in recent years in helping to shape the response of international communities to this critical global challenge. The book presents the latest advances in satellite-based remote sensing of the Earth's environment - ranging from applications in climate and atmospheric science to hydrology, oceanography, hydrology, geomorphology, ecology and fire studies. Introductory chapters also cover key technical aspects such as instrumentation, calibration, data analysis, and GIS tools for decision-making.

**Use of the Normalized Difference Vegetation Index (NDVI) to Assess Land Degradation at Multiple Scales** Genesis T. Yengoh, David Dent, Lennart Olsson, Anna E. Tengberg, Compton J. Tucker III, 2015-11-11 This report examines the scientific basis for the use of remotely sensed data, particularly Normalized Difference Vegetation Index (NDVI), primarily for the assessment of land degradation at different scales and for a range of applications, including resilience of agro-ecosystems. Evidence is drawn from a wide range of investigations, primarily from the scientific peer-reviewed literature but also non-journal sources. The literature review has been corroborated by interviews with leading specialists in the field. The report reviews the use

of NDVI for a range of themes related to land degradation, including land cover change, drought monitoring and early warning systems, desertification processes, greening trends, soil erosion and salinization, vegetation burning and recovery after fire, biodiversity loss, and soil carbon. This SpringerBrief also discusses the limits of the use of NDVI for land degradation assessment and potential for future directions of use. A substantial body of peer-reviewed research lends unequivocal support for the use of coarse-resolution time series of NDVI data for studying vegetation dynamics at global, continental and sub-continental levels. There is compelling evidence that these data are highly correlated with biophysically meaningful vegetation characteristics such as photosynthetic capacity and primary production that are closely related to land degradation and to agroecosystem resilience.

**Essentials of Blood Product Management in Anesthesia Practice** Corey S. Scher, Alan David Kaye, Henry Liu, Seth Perelman, Sarah Leavitt, 2021-03-12 This comprehensive book is written to inform and improve outcomes of patients in need of blood management during surgical procedures. Information is presented in an accessible format, allowing for immediate use in clinical practice. Beginning with an overview of the history of blood transfusions, early chapters present the foundational information needed to comprehend information in later chapters. Nuanced procedures, drugs, and techniques are covered, including new biologicals to assist clotting and blood substitutes. Further discussions focus on potential complications seen in blood transfusions, such as diseases of the coagulation system, pathogen transmissions, and acute lung injuries. Chapters also examine the complexities of treating specific demographics, of which include the

geriatric patient and patients suffering from substance abuse. Essentials of Blood Product Management in Anesthesia Practice is an invaluable guide for anesthesiologists, surgeons, trauma physicians, and solid organ transplant providers.

*Hearing Impairment and Disability* Ariel Tenenbaum, Joav Merrick, Mohd N. Zakaria, 2020 Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be

of interest to our readers--

*The Calvinist Copernicans* R. H. Vermij, 2002 When it was published in 1543, Copernicus's new astronomy had an enormous impact on intellectual life in early modern Europe, but the reception of his new ideas differed fundamentally from one country to another. Rienk Vermij discusses how—unlike in Roman Catholic lands—discussion in the heavily Calvinist Dutch Republic was initially dominated by humanist scholars who judged Copernicus's work on its mathematical merits. Yet even in this environment, it could not escape eventual philosophical, religious, and political controversies. This book shows how Copernicus's astronomy changed from an alternative cosmology into an established worldview in the Dutch Republic.

of the European Central Bank (ECB) at the heart of the European System of Central Banks (ESCB), along with the national central banks of the 27 European Union Member States. Since not all Member States have adopted the euro as their currency, the term Eurosystem is used to describe the entity composed of the ECB and the national central banks of those Member States that have adopted the euro, currently 16. Most of the tasks conferred upon the ESCB by the Treaty on European Union are handled by the Eurosystem.

**Evidence-Based Practice: Toward Optimizing Clinical Outcomes** Xenia Maria Caldeira Brant, Francesco Chiappelli, Negoita Neagos, Oluwadayo O. Oluwadara, Manisha Harish Ramchandani, 2010-06-17 Health care is witnessing an explosion of fundamental, clinical and translational research evidence. The emerging paradigm of evidence-based health care rests on the judicious integration of the patient needs/wants, the provider's expertise, and the best available research evidence in the treatment plan. The purpose of this book is to discuss the promise and the limitations of incorporating the best available evidence in clinical practice. It seeks to characterize and define how best available research evidence can be used in clinical practice and to what respect it applies to current public health issues.
