*Manual of Museum Planning* Barry Lord,Gail Dexter Lord,Lindsay Martin,2012-03-29 The Manual of Museum Planning has become the definitive text for museum professionals and others who are concerned with the planning, renovation, or expansion of a public gallery or museum. This third edition features new sections on operations and implementation as well as revised sections on planning for visitors, collections, and the building itself.

Introduction to Museum Work George Ellis Burcaw,1995 Long regarded as one the leading texts in museology, Introduction to Museum Work is now thoroughly revised and updated. While citing recent changes in the museum world, the third edition of Burcaw's classic work retains its useful philosophical orientation and convenient summary format. All the basics of museology are here-the central issues are discussed and definitions are given for all the terms museum workers need to know. Every chapter includes practical exercises making Burcaw's book ideal for the classroom or for novice museum workers. Accepted by the Documentation Center of the International Conference of Museums as exemplary of museum training, Introduction to Museum Work is used as a basic text in museum studies all over the world. *Bio Art* William Myers,2015-10-06 A visually striking, authoritative survey of the crossover between art and biotechnology by an expert in the field In an era of fast-paced technological progress and with the impact of humans on the environment increasing, the concept of “nature” itself seems called into question. Bio Art explores the work of “bio artists,” those who work with living organisms and life processes to address the possibilities and dangers posed by biotechnological advancement. A contextual introduction traces the roots of bio artistic practice, followed by four thematic chapters: Altering Nature, Experimental Identity and Mediums, Visualizing Scale and Scope, and Redefining Life. The chapters cover the key areas in which biotechnology has had an impact on today’s world, including ecology, biomedicine, designer genomes, and changing approaches to evolutionary theory, and include profiles of the work of sixty artists, collectives, and organizations from around the world. Interviews with eight leading bio artists and technologists provide deeper insight into the ideas and methods of this new breed of creative practitioners.
