Fostering freedom online: the role of Internet intermediaries MacKinnon, Rebecca, Hickok, Elonnai, Bar, Allon, Lim, Hae-in, 2015-01-29 Internet intermediaries play a unique role in linking authors of content and audiences. They may either protect or jeopardize end user rights to free expression, given their role in capturing, storing, searching, sharing, transferring and processing large amount of information, data and user-generated content. This research aims to identify principles for good practices and processes that are consistent with international standards for free expression that Internet intermediaries may follow in order to protect the human rights of end users online.

**Think Bayes** Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

**Federal Fumbles** James Lankford,2017-02-27 Many of the photos were removed due to copyright restrictions. Welcome to the first annual release of the Federal Fumbles report! Our national debt is careening toward \$19 trillion (yes, that is a 19 followed by 12 zeros), and federal regulations are expanding at a record pace. Meanwhile families struggle to get home loans, and small businesses struggle to make ends meet. States are constantly handed unfunded mandates and executive fiats that they are forced to implement with minimal direction and no way to pay for them. I present this report as a demonstration of ways we can cut back on wasteful federal spending and burdensome regulations to help families, small businesses, and our economy begin to get out from under the weight of federal stagnation. Cited here are not only prime examples of wasteful spending, but also federal departments or agencies that regulate outside the scope of the federal government's constitutional role. I firmly believe my staff and I have the obligation to solve the troubles of our nation, not just complain, which is why for every problem identified, you will also find a recommended solution. There is a way to eliminate wasteful, ineffective, or duplicative program spending; develop oversight methods to prevent future waste; and find ways to get us back on track.

*From Environmental to Ecological Law* Kirsten Anker,Peter D. Burdon,Geoffrey Garver,Michelle Maloney,Carla Sbert,2020-12-30 This book increases the visibility, clarity and understanding of ecological law. Ecological law is emerging as a field of law founded on systems thinking and the need to

integrate ecological limits, such as planetary boundaries, into law. Presenting new thinking in the field, this book focuses on problem areas of contemporary law including environmental law, property law, trusts, legal theory and First Nations law and explains how ecological law provides solutions. Written by ecological law experts, it does this by 1) providing an overview of shortcomings of environmental law and other areas of contemporary law, 2) presenting specific examples of these shortcomings, 3) explaining what ecological law is and how it provides solutions to the shortcomings of contemporary law, and 4) showing how society can overcome some key challenges in the transition to ecological law. Drawing on a diverse range of case study examples including Indigenous law, ecological restoration and mining, this volume will be of great interest to students, scholars and policymakers of environmental and ecological law and governance, political science, environmental ethics and ecological and degrowth economics.

**Eden's Bridge** David B. Doty, 2012-01-01 Eden's Bridge: The Marketplace in Creation and Mission explores a biblically based theology of the marketplace implicit in the creation narrative of Genesis 1-2. The thesis validates the calling and ministry of all marketplace Christians. David Doty invites readers to rethink and redirect the purposes of vocation, trade, and profit toward the purposes of God's Kingdom, as they were revealed in the beginning and are to be restored in Christ's reign. This book is eye-opening and inviting as it explores how God is moving to reclaim the marketplace for His Kingdom, and His redeeming purposes for the world of commerce. The marketplace holds untold potential if business is conducted according to God's plan: poverty can be eradicated, abundant living can be shared among all people, and shalom can prevail. Eden's Bridge offers hope for recovering from the recent collapse of the global economic system by envisioning a new view of how wealth is made and how the marketplace is yet to serve God's purposes in His mission to the world.

**Azerbaijan: Moving Toward More Diversified, Resilient, and Inclusive Development** Aimee Hampel-Milagrosa, Aziz Haydarov, Kym Anderson, Jasmin Sibal, Edimon Ginting, 2020-08-01 Azerbaijan has set the course for the economy to reduce its dependence on oil by promoting new drivers of growth. By 2025, under the government's Strategic Road Maps, a more diversified economy should take shape led by three sectors: agriculture, tourism, and manufacturing. Bold reforms need to strengthen areas of the economy that could otherwise impede this transition, and policy makers must resolutely stay on the reform path. The core message of this publication is diversification toward non-oil sources of growth alongside efforts to reduce macroeconomic risks and the high cost of finance, make the education system responsive to the needs of the labor market, close infrastructure gaps, and help economically significant state-owned enterprises become more efficient.

*World Drug Report 2021 (Set of 5 Booklets)* United Nations Office on Drugs and Crime, 2022-01-19 As in previous reports, the 2021 World Drug Report (WDR) aims to improve the understanding of the world's drug problem and to contribute towards fostering greater international cooperation for countering its impact on health, governance and security. Also, to the extent possible, the WDR contributes to the monitoring and reporting of SDGs. This edition includes an updated overview of recent trends on production, trafficking and consumption for non-medical purposes of key controlled substances. It further maintains a global overview of the baseline data and estimates on drug demand and supply and provides an analysis of the market for the different drugs.

*The impact of disasters and crises on agriculture and food security: 2021* Food and Agriculture Organization of the United Nations, 2021-03-17 On top of a decade of exacerbated disaster loss, exceptional global heat, retreating ice and rising sea levels, humanity and our food security face a range of new and unprecedented hazards, such as megafires, extreme weather events, desert locust swarms of magnitudes previously unseen, and the COVID-19 pandemic. Agriculture underpins the livelihoods of over 2.5 billion people – most of them in low-income developing countries – and remains a key driver of development. At no other point in history has agriculture been faced with such an array of familiar and unfamiliar risks, interacting in a

hyperconnected world and a precipitously changing landscape. And agriculture continues to absorb a disproportionate share of the damage and loss wrought by disasters. Their growing frequency and intensity, along with the systemic nature of risk, are upending people's lives, devastating livelihoods, and jeopardizing our entire food system. This report makes a powerful case for investing in resilience and disaster risk reduction – especially data gathering and analysis for evidence informed action – to ensure agriculture's crucial role in achieving the future we want.

Brian Eno Eric Enno Tamm,1995-08-22 Musician, composer, producer: Brian Eno is unique in contemporary music. Best known in recent years for producing U2's sensational albums, Eno began his career as a synthesizer player for Roxy Music. He has since released many solo albums, both rock and ambient, written music for film and television soundtracks, and collaborated with David Bowie, David Byrne, Robert Fripp, and classical and experimental composers. His pioneering ambient sound has been enormously influential, and without him today's rock would have a decidedly different sound. Drawing on Eno's own words to examine his influences and ideas, this book—featuring a new afterword and an updated discography and bibliography—will long remain provocative and definitive.

*Cataclysmic Cosmic Events and How to Observe Them* Martin Mobberley,2009-03-01 In the Victorian era – or for non-British readers, the mid-to-late nineteenth century – amateur astronomy tended to center on Solar System objects. The Moon and planets, as well as bright comets, were the key objects of interest. The brighter variable stars were monitored, but photography was in its infancy and digital imaging lay a century in the future. Today, at the start of the twenty-first century, amateurs are better equipped than any professionals of the mid-twentieth century, let alone the nineteenth. An amateur equipped with a 30-cm telescope and a CCD camera can easily image objects below magnitude 20 and, from very dark sites, 22 or 23. Such limits would have been within the realm of the 100- and 200-inch reflectors on Mount Wilson and Mount Palomar in the 1950s, but no other observatories. However, even those telescopes took hours to reach such limits, and then the photographic plates had to be developed, fixed, and examined by eye. In the modern era digital images can be obtained in minutes and analyzed 'on the fly' while more images are being downloaded. Developments can be e-mailed to other interested amateurs in real time, during an observing session, so that when a cataclysmic event takes place amateurs worldwide know about it. As recently as the 1980s, even professional astronomers could only dream of such instantaneous communication and processing ability.
