Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Lowe,Rhea Brathwaite,María José Jarquín,Jordan Kyle,Tira Greene,Mark Regis,Diego Arisi,Martín Ardanaz,Lenin Balza,Ramón Espinasa,Raul Alberto Jimenez Mori,Pablo Valverde Martínez,2014-10-31 During the last decade, the Latin American and Caribbean region has experienced unprecedented natural resources abundance. This book highlights how transparency can help realize the benefits and reduce negative externalities associated with the extractive industries in the region. A central message is that high-quality and well-managed information is critical to ensure the transparent and effective governance of the sector. The insights from experiences in the region can help policymakers design and implement effective regulatory reforms and adopt international standards that contribute to this goal. This is particularly important at a time when the recent boom experienced by extractives in the region may be coming to an end.

The Licit Life of Capitalism Hannah Appel,2019-12-13 The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.

Best Practices in Data Cleaning Jason W. Osborne,2013 Many researchers jump straight from data collection to data analysis without realizing how analyses and hypothesis tests can go profoundly wrong without clean data. This book provides a clear, step-by-step process of examining and cleaning data in order to decrease error rates and increase both the power and replicability of results. Jason W. Osborne, author of Best Practices in Quantitative Methods (SAGE, 2008) provides easily-implemented suggestions that are research-based and will motivate change in practice by empirically demonstrating, for each topic, the benefits of following best practices and the potential consequences of not following these guidelines. If your goal is to do the best research you can do, draw conclusions that are most likely to be accurate representations of the population(s) you wish to

speak about, and report results that are most likely to be replicated by other researchers, then this basic guidebook will be indispensable.

Europe and Its Immigrants in the 21st Century Demetrios G. Papademetriou,2006 European policymakers are attempting to develop immigration policies that meet economic needs and promote greater competitiveness and growth —without undermining the social models so valued by their electorates. To succeed, they must take into account aging populations, high and persistent levels of overall unemployment, even higher levels of unemployment among immigrants and ethnic minorities, and sector- and location-specific labor mismatches and shortfalls. Europe and Its Immigrants in the 21st Century examines many of the critical issues facing European economies and societies with regard to immigration. The authors juxtapose these issues with those facing the traditional countries of immigration (Australia, Canada, New Zealand, and the United States) and offers policy recommendations to address them. Among other topics, this book examines options for immigrant selection and managing all forms of migration better (including irregular migration), and offers recommendations for immigrant and minority integration policies at the EU, national, and local levels - where most integration work takes place. Contributors include Wolfgang Lutz (Vienna Institute for Demography), Klaus Zimmerman (Institute for the Study of Labor/DIW, Berlin), Louka Katseli (OECD), Grete Brochman (Institute for Social Research, University of Oslo), Heaven Crawley (AMRE Consulting), Demetrios G. Papademetriou (Migration Policy Institute), Sarah Spencer (COMPAS, University of Oxford), Brian Ray (University of Ottawa), Rinus Pennix (University of Amsterdam), Jorge Gaspar (University of Lisbon), Lucinda Fonseca (Centro de Estudos Geográficos), Kathleen Newland (Migration Policy Institute), Doris Meissner (Migration Policy Institute), T.
