Find out how! \*Track a Protocol through a Binary and Recover its Message Structure Trace execution flow from a read event, determine the structure of a protocol, determine if the protocol has any undocumented messages, and use IDA Pro to determine the functions that process a particular message. \*Develop IDA Scripts and Plug-ins Learn the basics of IDA scripting and syntax, and write IDC scripts and plug-ins to automate even the most complex tasks.

*Low-Temperature Thermochronology*: Peter W. Reiners,Todd A. Ehlers,2018-12-17 Volume 58 of Reviews in Mineralogy and Geochemistry presents 22 chapters covering many of the important modern aspects of thermochronology. The coverage of the chapters ranges widely, including historical perspective, analytical techniques, kinetics and calibrations, modeling approaches, and interpretational methods. In general, the chapters focus on intermediate- to low-temperature thermochronometry, though some chapters cover higher temperature methods such as monazite U/Pb closure profiles, and the same theory and approaches used in low-temperature thermochronometry are generally applicable to higher temperature systems. The widely used low- to medium-temperature thermochronometric systems are reviewed in detail in these chapters, but while there are numerous chapters reviewing various aspects of the apatite (U-Th)/He system, there is no chapter singularly devoted to it, partly because of several previous reviews recently published on this topic.

**Sustainability Through Innovation in Product Life Cycle Design** Mitsutaka Matsumoto,Keijiro Masui,Shinichi Fukushima,Shinsuke Kondoh,2016-09-19 This book consists of chapters based on selected papers presented at the EcoDesign2015 symposium (9th International Symposium on Environmentally Conscious Design and Inverse Manufacturing). The symposium, taking place in Tokyo in December 2015, has been leading the research and practices of eco-design of

products and product-related services since it was first held in 1999. The proceedings of EcoDesign2011 were also published by Springer. Eco-design of products and product-related services (or product life cycle design) are indispensable to realize the circular economy and to increase resource efficiencies of our society. This book covers the state of the art of the research and the practices in eco-design, which are necessary in both developed and developing countries. The chapters of the book, all of which were peer-reviewed, have been contributed by authors from around the world, especially from East Asia, Europe, and Southeast Asia. The features of the book include (1) coverage of the latest topics in the field, e.g., global eco-design management, data usage in eco-design, and social perspectives in eco-design; (2) an increased number of authors from Southeast Asian countries, with a greater emphasis on eco-design in emerging economies; (3) high-quality manuscripts, with the number of chapters less than half of that of the previous book.

**Supply Chain Risk** George A. Zsidisin, Bob Ritchie, 2008-09-08 Risk is of fundamental importance in this era of the global economy. Supply chains must into account the uncertainty of demand.

Moreover, the risk of uncertain demand can cut two ways: (1) there is the risk that unexpected demand will not be met on time, and the reverse problem (2) the risk that demand is over estimated and excessive inventory costs are incurred. There are other risks in unreliable vendors, delayed shipments, natural disasters, etc. In short, there are a host of strategic, tactical and operational risks to business supply chains. Supply Chain Risk: A Handbook of Assessment, Management, and Performance will focus on how to assess, evaluate, and control these various risks.

**To Save Heaven and Earth** Jennie E. Burnet, 2023-01-15 In *To Save Heaven and Earth*, Jennie E. Burnet considers people who risked their lives in the 1994 Rwandan genocide of Tutsi to try and save those targeted for killing. Many genocide perpetrators were not motivated by political ideology, ethnic hatred, or prejudice. By shifting away from these classic typologies of genocide studies and focusing instead on hundreds of thousands of discrete acts that unfold over time, Burnet highlights the ways that complex decisions and behaviors emerge in the social, political, and economic processes that constitute a genocide. *To Save Heaven and Earth* explores external factors, such as geography, local power dynamics, and genocide timelines, as well as the internal states of mind and motivations of those who effected rescues. Framed within the interdisciplinary scholarship of genocide studies and rooted in cultural anthropology methodologies, this book presents stories of heroism and of the good done amid the evil of a genocide that nearly annihilated Rwandan Tutsi and decimated the Hutu and Twa who were opposed to the slaughter.

*A Biographical Dictionary of the Maryland Legislature, 1635-1789* Edward C. Papenfuss, Alan F. Day, David W. Jordan, Gregory A. Stiverson, 2008-11-01 This unique historical and genealogical resource draws on the extraordinarily intact legislative, judicial, religious, and personal records of members of the first Maryland legislature. The two-volume set contains profiles of nearly fifteen hundred men who served in the state's legislature in the first 150 years after Maryland's founding. The major public and private aspects of each legislator's career are quickly discernible: family background, marriage, children, social status, religious affiliation, occupation, other offices held, and military service. Many entries include a brief summary of a legislator's stance on public and private issues. A final category, wealth at death, inventories the legislator's estate and notes any significant changes in wealth between first election and death.

*Feasting Wild* Gina Rae La Cerva, 2020-05-26 A New York Times Book Review Summer Reading Selection "Delves into not only what we eat around the world, but what we once ate and what we have lost since then."—The New York Times Book Review Two centuries ago, nearly half the North American diet was foraged, hunted, or caught in the wild. Today, so-called "wild foods" are becoming expensive luxuries, served to the wealthy in top restaurants. Meanwhile, people who depend on wild foods for survival and sustenance find their lives forever changed as new markets and roads invade the world's last untamed landscapes. In *Feasting Wild*, geographer and anthropologist Gina Rae La Cerva embarks on a global culinary adventure to trace our relationship to wild foods. Throughout her travels, La Cerva reflects on how colonialism and the extinction crisis have impacted wild spaces, and reveals what we sacrifice when we domesticate our foods—including biodiversity, Indigenous and women's knowledge, a vital connection to nature, and delicious flavors. In the Democratic Republic of the Congo, La Cerva investigates the violent "bush meat" trade, tracking elicited delicacies from the rainforests of the Congo Basin to the dinner tables of Europe. In a Danish cemetery, she forages for wild onions with the esteemed staff of Noma. In Sweden—after saying goodbye to a man known only as The Hunter—La Cerva smuggles freshly-caught game meat home to New York in her suitcase, for a feast of "heartbreak moose." Thoughtful, ambitious, and wide-ranging, *Feasting Wild* challenges us to take a closer look at the way we eat today, and introduces an exciting new voice in food journalism. "A memorable, genre-defying work that blends anthropology and adventure."—Elizabeth Kolbert, New York Times bestselling author of *The Sixth Extinction* "A food book with a truly original take."—Mark Kurlansky, New York Times bestselling author of *Salt: A World History* "An intense and illuminating travelogue... offer[ing] a corrective to the patriarchal white gaze promoted by globetrotting eaters like Anthony Bourdain and Andrew Zimmern. La Cerva combines environmental history with feminist memoir to craft a narrative that's more in tune with recent works by Robin Wall Kimmerer, Helen

Macdonald and Elizabeth Rush.”—The Wall Street Journal

*Annual Energy Outlook 2012, with Projections To 2035* Energy Information Administration (U S ),2012-10-04 The projections in the U.S. Energy Information Administration's (EIA's) Annual Energy Outlook 2012 (AEO2012) focus on the factors that shape the U.S. energy system over the long term. Under the assumption that current laws and regulations remain unchanged throughout the projections, the AEO2012 Reference case provides the basis for examination and discussion of energy production, consumption, technology, and market trends and the direction they may take in the future. It also serves as a starting point for analysis of potential changes in energy policies. But AEO2012 is not limited to the Reference case. It also includes 29 alternative cases (see Appendix E, Table E1), which explore important areas of uncertainty for markets, technologies, and policies in the U.S. energy economy. Many of the implications of the alternative cases are discussed in the 'Issues in focus' section of this report. / Key results highlighted in AEO2012 include continued modest growth in demand for energy over the next 25 years and increased domestic crude oil and natural gas production, largely driven by rising production from tight oil and shale resources. As a result, U.S. reliance on imported oil is reduced; domestic production of natural gas exceeds consumption, allowing for net exports; a growing share of U.S. electric power generation is met with natural gas and renewables; and energy-related carbon dioxide emissions remain below their 2005 level from 2010 to 2035, even in the absence of new Federal policies designed to mitigate greenhouse gas (GHG) emissions.--Executive Summary (p. 2).
