Tradition and Modernity. Changing the Images of Women in Selected Fiction by Manju Kapur and Anita Nair Sasikala Alagiri,2017-12 Along with a range of socio-cultural, political and economic concerns, the focus on 'self' has been an inevitable assertion of writers during the last quarter of the twentieth century. Individualistic in tone, the contemporary women novelists are trying to portray realistically the predicament of modern women torn between the forces of tradition and modernity, their sense of frustration and alienation, the emotional and psychological turmoil and complexities of man-women relationships and subtleties of feminine consciousness against the persistent patriarchal social set-up. Cognizant of the evils originating from patriarchy, a positive sense of feminine identity has been recognized by them and the result is the emergence of a new woman in Indian society and its concept in the Indian English novel which has assumed a strident posture in the contemporary writings by women. The shift from submission to assertion, acquiescence to resistance and obedience to rebellion, however, has not been abrupt and effortless. Women are still in the process of negotiation with different limiting factors and thresholds of patriarchy to claim their due space and affirm their identity. The present study is an attempt to critically investigate the negotiations with cultural norms by the women characters in the selected novels by the contemporary novelists, namely Manju Kapur and Anita Nair. Almost all the women characters, major and minor, from the selected novels have been considered and positioned as per their ideological leanings and convictions under two thematic chapters namely "Women in the Clutches of Traditional Norms," and "Tradition to Modernity." The major issues around which the novels move - education, marriage, gendered space and mother-daughter relationships - are taken up to put them within the contemporary social conditions in which women characters live. The present book is divided into five chapters to make a critical and analytical study of the select novels of these contemporary Indian women writers in English. The present work is focused on five selected novels: Manju Kapur's "Difficult Daughters", "Home" and "Custody" and Anita Nair's "Ladies Coupé" and "Mistress".

The Senate Intelligence Committee Report on Torture (Academic Edition) Senate Select Committee On Intelligence, 2020-02-18 The study edition of book the Los Angeles Times called, The most extensive review of U.S. intelligence-gathering tactics in generations. This is the complete Executive Summary of the Senate Intelligence Committee's investigation into the CIA's interrogation and detention programs -- a.k.a., The Torture Report. Based on over six million pages of secret CIA documents, the report details a covert program of secret prisons, prisoner deaths, interrogation practices, and cooperation with other foreign and domestic agencies, as well as the CIA's efforts to hide the details of the program from the White House, the Department of Justice, the Congress, and the American people. Over five years in the making, it is presented here exactly as redacted and released by the United States government on December 9, 2014, with an introduction by Daniel J. Jones, who led the Senate investigation. This special edition includes: • Large, easy-to-read format. • Almost 3,000 notes formatted as footnotes, exactly as they appeared in the original report. This allows readers to see obscured or clarifying details as they read the main text. • An introduction by Senate staffer Daniel J. Jones who led the investigation and wrote the report for the Senate Intelligence Committee, and a forward by the head of that committee, Senator Dianne Feinstein.

The Web Application Hacker's Handbook Dafydd Stuttard, Marcus Pinto, 2011-03-16 This book is a practical guide to discovering and exploiting security flaws in web applications. The authors explain each category of vulnerability using real-world examples, screen shots and code extracts. The book is extremely practical in focus, and describes in detail the steps involved in detecting and exploiting each kind of security weakness found within a variety of applications such as online banking, e-commerce and other web applications. The topics covered include bypassing login mechanisms, injecting code, exploiting logic flaws and compromising other users. Because every web application is different, attacking them entails bringing to bear various general principles, techniques and experience in an imaginative way. The most successful hackers go beyond this, and find ways to automate their bespoke attacks. This handbook describes a proven methodology that combines the virtues of human intelligence and computerized brute force, often with devastating results. The authors are professional penetration testers who have been involved in web application security for nearly a decade. They have presented training courses at the Black Hat security conferences throughout the world. Under the

alias PortSwigger, Dafydd developed the popular Burp Suite of web application hack tools.

Armageddon 2419 A.D. Philip Francis Nowlan, 2017-05-02 The groundbreaking novella that gave rise to science fiction's original space hero, Buck Rogers. In 1927, World War I veteran Anthony Rogers is working for the American Radioactive Gas Corporation investigating strange phenomena in an abandoned coal mine when suddenly there's a cave-in. Trapped in the mine and surrounded by radioactive gas, Rogers falls into a state of suspended animation . . . for nearly five hundred years. Waking in the year 2419, he first saves the beautiful Wilma Deering from attack and then discovers what has befallen his country: The United States has descended into chaos after Asian powers conquered the world with advanced weaponry centuries before. All that's left are ragtag gangs battling for survival against their brutal overlords. But when Rogers shows them how to band together and fight for more than mere survival, he sparks a revolution that will decide the fate of the future world. This ebook has been professionally proofread to ensure accuracy and readability on all devices.

The Science of Environmental Pollution Frank R. Spellman, 2021-06-17 This new edition of The Science of Environmental Pollution presents common-sense approaches and

practical examples based on scientific principles, models, and observations, but keeps the text lively and understandable for scientists and non-scientists alike. It addresses the important questions regarding environmental pollution: What is it? What is its impact? What are the causes and how can we mitigate them? But more than this, it stimulates new ways to think about the issues and their possible solutions. This fourth edition has been updated throughout, and greatly expands its coverage of endocrine disruptors and includes all new information on persistent forever chemicals. Environmental issues continue to attract attention at all levels. Some sources say that pollution is the direct cause of climate change; others deny that the possibility even exists. This text sorts through the hyperbole, providing concepts and guidelines that not only aid in understanding the issues, but equip readers with the scientific rationale required to make informed decisions. Features: Updated throughout, and contains a new chapter on the effects of endocrine disruptors in the environment. Provides an introduction to air, soil, and water pollution sources and remediation. Addresses pressing issues such as global climate change, rising sea levels, polluted air, increased weather phenomena, and the state of potable water worldwide. Supplies a vital information source for policy-makers involved in decisions concerning environmental management. Includes case studies, examples, and study questions. The Science of Environmental Pollution is suitable for students taking undergraduate-level courses dealing with the environment and related pollution issues. It will also serve as a useful reference for environmental managers, politicians, legal experts, and interested general readers.

Microcontroller Basics Burkhard Kainka, 2005 Microcontrollers have become an indispensable part of modern electronics. They make things possible that vastly exceed what could be done previously. Innumerable applications show that almost nothing is impossible. There's thus every reason to learn more about them, but that raises the question of where to find a good introduction to this fascinating technology. The answer is easy: this Microcontroller Basics book, combined with the 89S8252 Flash Board project published by Elektor Electronics. However, this book offers more than just a basic introduction. It clearly explains the technology using various microcontroller circuits and programs written in several different programming languages. Three microcontrollers from the 8051 family are used in the sample applications, ranging from the simple 89C2051 to the AN2131, which is designed to support USB applications. The programming tools include assemblers, Basic-52 and BASCOM-51, and several C compilers. Every reader can thus find the programming environment most suitable to his or her needs. In the course of the book, the reader gradually develops increased competence in converting his or her ideas into microcontroller circuitry. All of the sample programs can be downloaded from the Elektor Electronics website. That has the added advantage that the latest versions are always available.

New Frontiers of Molecular Epidemiology of Infectious Diseases Serge

Morand, François Beaudeau, Jacques Cabaret, 2011-09-08 Molecular epidemiology has recently broadened its focuses due to the development of molecular tools but also by incorporating advances of other fields such as mathematical epidemiology, molecular ecology, population genetics and evolution. Facing new risks of emerging and re-emerging infectious diseases that are threats for humans and their livestock, the objectives of

molecular epidemiology include: - the development of molecular tools, genotyping and gene expression - the incorporation of concepts and results of population genetics of infectious diseases - the integration of recent advances in theoretical epidemiology and evolutionary ecology of diseases - a better understanding of transmission for the development of risk factors analyses. This book will demonstrate how the latest developments in molecular tools and in epidemiology can be integrated with studies of host-pathogen interactions. Besides a strong theoretical component, there will also be an emphasis on applications in the fields of epidemiology, public health, veterinary medicine, and health ecology. Students and researchers in the fields of epidemiology, animal and human health, evolutionary ecology, parasitology are the main potential readers of the book, as well as a broader audience from veterinary medicine and conservation.

Chart No. 1 Nima,2010 Chart Number One is essential to correct and accurate use of nautical charts. More than a chart, it is a book that defines the symbols, abbreviations and terms used on charts. It also provides important information about buoys, light visibility (range) and aids to navigation. This new and improved edition from Paradise Cay is a complete and accurate high quality reproduction of information provided by NOAA and NIMA.
