**Bangladesh's Economic and Social Progress** Munim Kumar Barai, 2020-03-31 This book evaluates Bangladesh's impressive economic and social progress, more often referred to as a 'development surprise'. In doing so, the book examines the gap in existing explanations of Bangladesh's development and then offers an empirically informed analysis of a range of distinctive factors, policies, and actions that have individually and collectively contributed to the progress of Bangladesh. In an inclusive way, the book covers the developmental role, relation, and impact of poverty reduction, access to finance, progress in education and social empowerment, reduction in the climatic vulnerability, and evolving sectoral growth activities in the agriculture, garments, and light industries. It also takes into account the important role of the government and NGOs in the development process, identifies bottlenecks and challenges to Bangladesh's future development path and suggests measures to overcome them. By providing an inclusive narrative to theorize Bangladesh's development, which is still missing in the public discourse, this book posits that Bangladesh per se can offer a development model to other developing countries.

Beautiful Visualization Julie Steele, Noah Iliinsky, 2010-04-23 Visualization is the graphic presentation of data -- portrayals meant to reveal complex information at a glance. Think of the familiar map of the New York City subway system, or a diagram of the human brain. Successful visualizations are beautiful not only for their aesthetic design, but also for elegant layers of detail that efficiently generate insight and new understanding. This book examines the methods of two dozen visualization experts who approach their projects from a variety of perspectives -- as artists, designers, commentators, scientists, analysts, statisticians, and more. Together they demonstrate how visualization can help us make sense of the world. Explore the importance of storytelling with a simple visualization exercise Learn how color conveys information that our brains recognize before we're fully aware of it Discover how the books we buy and the people we associate with reveal clues to our deeper selves Recognize a method to the madness of air travel with a visualization of civilian air traffic Find out how researchers investigate unknown phenomena, from initial sketches to published papers Contributors include: Nick Bilton, Michael E. Driscoll, Jonathan Feinberg, Danyel Fisher, Jessica Hagy, Gregor Hochmuth, Todd Holloway, Noah Iliinsky, Eddie Jabbour, Valdean Klump, Aaron Koblin, Robert Kosara, Valdis Krebs, JoAnn Kuchera-Morin et al., Andrew Odewahn, Adam Perer, Anders Persson, Maximilian Schich, Matthias Shapiro, Julie Steele, Moritz Stefaner, Jer Thorp, Fernanda Viegas, Martin Wattenberg, and Michael Young.

**Emerging Energetic Materials: Synthesis, Physicochemical, and Detonation Properties** Dabir S. Viswanath, Tushar K. Ghosh, Veera M. Boddu, 2018-01-02 This book summarizes science and technology of a new generation of high-energy and insensitive explosives. The objective is to provide professionals with comprehensive information on the synthesis and the physicochemical and detonation properties of the explosives. Potential technologies applicable for treatment of contaminated wastestreams from manufacturing facilities and environmental matrices are also included. This book provides the reader an insight into the depth and breadth of theoretical and empirical models and experimental techniques currently being developed in the field of energetic materials. It presents the latest research by DoD engineers and scientists, and some of DoD's academic and industrial researcher partners. The topics explored and the simulations developed or modified for the purposes of energetics may find application in other closely related fields,

such as the pharmaceutical industry. One of the key features of the book is the treatment of wastewaters generated during manufacturing of these energetic materials.

**Mobilizing the Past for a Digital Future** Erin Walcek Averett, Jody Michael Gordon, Derek B Counts, 2016-10-19 Mobilizing the Past is a collection of 20 articles that explore the use and impact of mobile digital technology in archaeological field practice. The detailed case studies present in this volume range from drones in the Andes to iPads at Pompeii, digital workflows in the American Southwest, and examples of how bespoke, DIY, and commercial software provide solutions and craft novel challenges for field archaeologists. The range of projects and contexts ensures that Mobilizing the Past for a Digital Future is far more than a state-of-the-field manual or technical handbook. Instead, the contributors embrace the growing spirit of critique present in digital archaeology. This critical edge, backed by real projects, systems, and experiences, gives the book lasting value as both a glimpse into present practices as well as the anxieties and enthusiasm associated with the most recent generation of mobile digital tools. This book emerged from a workshop funded by the National Endowment for the Humanities held in 2015 at Wentworth Institute of Technology in Boston. The workshop brought together over 20 leading practitioners of digital archaeology in the U.S. for a weekend of conversation. The papers in this volume reflect the discussions at this workshop with significant additional content. Starting with an expansive introduction and concluding with a series of reflective papers, this volume illustrates how tablets, connectivity, sophisticated software, and powerful computers have transformed field practices and offer potential for a radically transformed discipline.

Handbook of Self-Regulation of Learning and Performance Dale H. Schunk, Barry Zimmerman, 2011-05-15 Self-regulated learning (or self-regulation) refers to the process whereby learners personally activate and sustain cognitions, affects, and behaviours that are systematically oriented toward the attainment of learning goals. This is the first volume to integrate into a single volume all aspects of the field of self-regulation of learning and performance: basic domains, applications to content areas, instructional issues, methodological issues, and individual differences. It draws on research from such diverse areas as cognitive, educational, clinical, social, and organizational psychology. Distinguishing features include: Chapter Structure - To ensure uniformity and coherence across chapters, each chapter author addresses the theoretical ideas underlying their topic, research evidence bearing on these ideas, future research directions, and implications for educational practice. International - Because research on self-regulation is increasingly global, a significant number of international contributors are included (see table of contents). Readable - In order to make the book accessible to students, chapters have been carefully edited for clarity, conciseness, and organizational consistency. Expertise - All chapters are written by leading researchers from around the world who are highly regarded experts on their particular topics and are active contributors to the field.

*Lands of the Future* Echi Christina Gabbert, Fana Gebresenbet, John G. Galaty, Günther Schlee, 2021-01-15 Rangeland, forests and riverine landscapes of pastoral communities in

Eastern Africa are increasingly under threat. Abetted by states who think that outsiders can better use the lands than the people who have lived there for centuries, outside commercial interests have displaced indigenous dwellers from pastoral territories. This volume presents case studies from Eastern Africa, based on long-term field research, that vividly illustrate the struggles and strategies of those who face dispossession and also discredit ideological false modernist tropes like 'backwardness' and 'primitiveness'.

**Encyclopedia of Archival Science** Luciana Duranti, Patricia C. Franks, 2015-06-17
