Eurasian Disunion Janusz Bugajski, Margarita Assenova, 2016 *Eurasian Disunion: Russia's Vulnerable Flanks* examines the impact of Moscow's neo-imperial project on the security of several regions bordering the Russian Federation, analyses the geopolitical aspects of Kremlin ambitions, and makes recommendations for the future role of NATO, the EU, and the United States in the Wider Europe. Russia's attack on Ukraine and the dismemberment of its territory is not an isolated operation. It constitutes one component of a broader strategic agenda to rebuild a Moscow-centered bloc designed to compete with the West. The acceleration of President Vladimir Putin's neo-imperial project has challenged the security of several regions that border the Russian Federation and focused attention on the geopolitical aspects of Kremlin ambitions. This book is intended to generate a more informed policy debate on the dangers stemming from the restoration of a Russian-centered pole of power or sphere of influence in Eurasia. It focuses on five vulnerable flanks bordering the Russian Federation--the Baltic and Nordic zones, East Central Europe, Southeast Europe, South Caucasus, and Central Asia. It examines several pivotal questions, including the strategic objectives of Moscow's expansionist ambitions; Kremlin tactics and capabilities; the impact of Russia's assertiveness on the national security of neighbors; the responses of vulnerable states to Russia's geopolitical ambitions; the impact of prolonged regional turmoil on the stability of the Russian Federation and the survival of the Putinist regime; and the repercussions of heightened regional tensions for U.S., NATO, and EU policy toward Russia and toward unstable regions bordering the Russian Federation.

Carcass management guidelines Miller, L.P., Miknis, R.A. and Flory, G.A., 2020-12-28 Animal disease outbreaks pose many challenges for response authorities that can impact livelihoods, food security, and the environment. Proper disposal of animal carcasses that die or are culled during the outbreak is a key component of a successful response to a disease outbreak because it helps prevent or mitigate the further spread of pathogens and in case of zoonotic disease, to further protect human health. The practical guidelines presented hereby provide carcass and related waste management considerations and recommended procedures for use by Veterinary Services and other official response authorities when developing animal disease outbreak containment and eradication plans. The guidelines apply to animal disease outbreaks of varying sizes, whether the outbreak is isolated to a single premise or spans a region to cover numerous premises. However, they are focused on small to medium-sized holdings in countries without access to engineered landfills, rendering plants

or controlled incinerators. The guidelines are written in the spirit of “keep it simple and doable”, considering the limited human and financial resources that many countries are constrained with. Its presentation and practical approach ensure that countries will find it very useful for their emergency operation procedures toolbox. Further, the guidelines directly contribute to the one-health approach by protecting the health of animals, humans, and the environment.

Confinement and Ethnicity Jeffery F. Burton,Mary M. Farrell,Lord,Richard W. Lord,2011-07-01 Confinement and Ethnicity documents in unprecedented detail the various facilities in which persons of Japanese descent living in the western United States were confined during World War II: the fifteen “assembly centers” run by the U.S. Army’s Wartime Civil Control Administration, the ten “relocation centers” created by the War Relocation Authority, and the internment camps, penitentiaries, and other sites under the jurisdiction of the Justice and War Departments. Originally published as a report of the Western Archeological and Conservation Center of the National Park Service, it is now reissued in a corrected edition, with a new Foreword by Tetsuden Kashima, associate professor of American ethnic studies at the University of Washington. Based on archival research, field visits, and interviews with former residents, Confinement and Ethnicity provides an overview of the architectural remnants, archeological features, and artifacts remaining at the various sites. Included are numerous maps, diagrams, charts, and photographs. Historic images of the sites and their inhabitants -- including several by Dorothea Lange and Ansel Adams -- are combined with photographs of present-day settings, showing concrete foundations, fence posts, inmate-constructed drainage ditches, and foundations and parts of buildings, as well as inscriptions in Japanese and English written or scratched on walls and rocks. The result is a unique and poignant treasure house of information for former residents and their descendants, for Asian American and World War II historians, and for anyone interested in the facts about what the authors call these “sites of shame.”

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Hrotsvit of Gandersheim Katharina M Wilson, 2023-12-14 Selection of the works of Hrotsvit, the first-known woman dramatist, containing legends, dramas, and epics. Hrotsvit of Gandersheim (c.935 - c.975), almost certainly of noble Saxon parentage, was a canoness of the Saxon imperial abbey of Gandersheim, living and working there during its time of greatest material prosperity and cultural and intellectual pre-eminence. Her importance cannot be overestimated: she is the first poet of Saxony; the first known dramatist of Christianity (indeed the first known woman dramatist of any time); and a woman displaying erudition and wit in an essentially patriarchal age, a female author in a literary field dominated by men who insisted on re-evaluating and redrawing the literary depiction of women. Discovered in the late fifteenth century, her extraordinary oeuvre, written in medieval Latin, comprises a wide variety of genres: eight legends, six dramas, and two epics, organised into three books. The present volume contains a selection of Hrotsvit's works in English translation, together with an interpretative essay, critical introduction, and scholarly apparatus. Professor KATHARINA WILSON teaches at the University of Georgia.

Sherpa Hospitality as a Cure for Frostbite Mark Horrell, 2021-12-01 The heroic story of how Sherpas stood up and took control of their destiny Ever since Europeans started exploring the world's highest mountains and trying to reach their summits in the early 20th century, Sherpas have been an integral part of mountaineering expeditions to the Himalayas. In this anthology curated from his popular *Footsteps on the Mountain* blog, Mark Horrell explores the evolution of Sherpa mountaineers, from the porters of early expeditions to the superstar climbers of the present day. Writing with trademark warmth and humour, he starts by bringing to life the Sherpa characters of the early days, describing their customs and superstitions, and putting their contributions and achievements into context. In the deeply personal second section of the book, he covers some of the

conflicts of the 21st century, when a series of high-profile controversies highlighted the tensions between Sherpas and western climbers on Everest. He was a witness to a devastating avalanche in the Khumbu Icefall that killed 16 Nepali mountain workers and led to a labour dispute, and he describes the events that followed from a commercial client's perspective. In the final section of the book, he brings the story up to date and looks to the future, as Sherpas have moved out of the limelight of westerners, running successful mountaineering expedition companies and becoming celebrated climbers in their own right. It's uncommon to come across stories that look beneath the surface to investigate deeper issues while remaining accessible and humorous. Sherpa Hospitality achieves this. Alex Roddie
