Carcass management guidelines Miller, L.P., Miknis, R.A. and Flory, G.A.,2020-12-28 Animal disease outbreaks pose many challenges for response authorities that can impact livelihoods, food security, and the environment. Proper disposal of animal carcasses that die or are culled during the outbreak is a key component of a successful response to a disease outbreak because it helps prevent or mitigate the further spread of pathogens and in case of zoonotic disease, to further protect human health. The practical guidelines presented hereby provide carcass and related waste management considerations and recommended procedures for use by Veterinary Services and other official response authorities when developing animal disease outbreak containment and eradication plans. The guidelines apply to animal disease outbreaks of varying sizes, whether the outbreak is isolated to a single premise or spans a region to cover numerous premises. However, they are focused on small to medium-sized holdings in countries without access to engineered landfills, rendering plants or controlled incinerators. The guidelines are written in the spirit of “keep it simple and doable”, considering the limited human and financial resources that many countries are constrained with. Its presentation and practical approach ensure that countries will find it very useful for their emergency operation procedures toolbox. Further, the guidelines directly contribute to the one-health approach by protecting the health of animals, humans, and the environment.

Eurasian Disunion Janusz Bugajski,Margarita Assenova,2016 Eurasian Disunion: Russia's Vulnerable Flanks examines the impact of Moscow's neo-imperial project on the security of several regions bordering the Russian Federation, analyses the geopolitical aspects of Kremlin ambitions, and makes recommendations for the future role of NATO, the EU, and the United States in the Wider Europe. Russia's attack on Ukraine and the dismemberment of its territory is not an isolated operation. It constitutes one component of a broader strategic agenda to rebuild a Moscow-centered bloc designed to compete with the West. The acceleration of President Vladimir Putin's neo-imperial project has challenged the security of several regions that border the Russian Federation and focused attention on the geopolitical aspects of Kremlin ambitions. This book is intended to generate a more informed policy debate on the dangers stemming from the restoration of a Russian-centered pole of power or sphere of influence in Eurasia. It focuses on five vulnerable flanks bordering the Russian Federation--the Baltic and Nordic zones, East Central Europe, Southeast Europe, South Caucasus, and Central Asia. It examines several pivotal questions, including the strategic objectives of Moscow's expansionist ambitions; Kremlin tactics and capabilities; the impact of Russia's assertiveness on the national security of neighbors; the responses of vulnerable states to Russia's geopolitical ambitions; the impact of prolonged regional turmoil on the stability of the Russian Federation and the survival of the Putinist regime; and the repercussions of heightened regional tensions for U.S., NATO, and EU policy toward Russia and toward unstable regions bordering the Russian Federation.

Confinement and Ethnicity Jeffery F. Burton,Mary M. Farrell,Lord,Richard W. Lord,2011-07-01 Confinement and Ethnicity documents in unprecedented detail the various facilities in which persons of Japanese descent living in the western United States were confined during World War II: the fifteen “assembly centers” run by the U.S. Army’s Wartime Civil Control Administration, the ten “relocation centers” created by the War Relocation Authority, and the internment camps, penitentiaries, and other sites under the jurisdiction of the Justice and War Departments. Originally published as a report of the Western Archeological and Conservation Center of the National Park Service, it is now reissued in a corrected edition, with a new Foreword by Tetsuden Kashima, associate professor of American ethnic studies at the University of Washington. Based on archival research, field visits, and interviews with former residents, Confinement and Ethnicity provides an overview of the architectural remnants, archeological features, and artifacts remaining at the various sites. Included are numerous maps, diagrams, charts, and photographs. Historic images of the sites and their inhabitants -- including several by Dorothea Lange and Ansel Adams -- are combined with photographs of present-day settings, showing concrete foundations, fence posts, inmate-constructed drainage ditches, and foundations and parts of buildings, as well as inscriptions in Japanese and English written or scratched on walls and rocks. The result is a unique and poignant treasure house of information for former residents and their descendants, for Asian American and World War II historians, and for anyone interested in the facts about what the authors call these “sites of shame.”

Remittance Markets in Africa Sanket Mohapatra,Dilip Ratha,2011-01-01 Remittances sent by African migrants have become an important source of external finance for countries in the Sub-Saharan African region. In many African countries, these flows are larger than foreign direct investment and portfolio debt and equity flows. In some cases, they are similar in size to official aid from multilateral and bilateral donors. Remittance markets in Africa, however, remain less developed than other regions. The share of informal or unrecorded remittances is among the highest for Sub-Saharan African countries. Remittance costs tend to be significantly higher in Africa both for sending remittances from outside the region and for within-Africa (South-South) remittance corridors. At the same time, the remittance landscape in Africa is rapidly changing with the introduction of new remittance technologies, in particular mobile money transfers and branchless banking. This book presents findings of surveys of remittance service providers conducted in eight Sub-Saharan African countries and in three key destination countries. It looks at issues relating to costs, competition, innovation and regulation, and discusses policy options for leveraging remittances for development in Africa.

Hrotsvit of Gandersheim Katharina M Wilson,2023-12-14 Selection of the works of Hrotsvit, the first-known woman dramatist, containing legends, dramas, and epics. Hrotsvit of Gandersheim (c.935 - c.975), almost certainly of noble Saxon parentage, was a canoness of the Saxon imperial abbey of Gandersheim, living and working there during its time of greatest material prosperity and cultural and intellectual pre-eminence. Her importance cannot be overestimated: she is the first poet of Saxony; the first known dramatist of Christianity (indeed the first known woman dramatist of any time); and a woman displaying erudition and wit in an essentially patriarchal age, a female author in a literary field dominated by men who insisted on re-evaluating and redrawing the literary depiction of women. Discovered in the late fifteenth century, her extraordinary oeuvre, written in medieval Latin, comprises a wide variety of genres: eight legends, six dramas, and two epics, organised into three books. The present volume contains a selection of Hrotsvit's works in English translation, together with an interpretative essay, critical introduction, and scholarly apparatus. Professor KATHARINA WILSON teaches at the University of Georgia.

With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems
