Segregation by Design Jessica Trounstein, 2018-11-15 Segregation by Design draws on more than 100 years of quantitative and qualitative data from thousands of American cities to explore how local governments generate race and class segregation. Starting in the early twentieth century, cities have used their power of land use control to determine the location and availability of housing, amenities (such as parks), and negative land uses (such as garbage dumps). The result has been segregation - first within cities and more recently between them. Documenting changing patterns of segregation and their political mechanisms, Trounstein argues that city governments have pursued these policies to enhance the wealth and resources of white property owners at the expense of people of color and the poor. Contrary to leading theories of urban politics, local democracy has not functioned to represent all residents. The result is unequal access to fundamental local services - from schools, to safe neighborhoods, to clean water.

WIC Nutrition Risk Criteria Institute of Medicine, Committee on Scientific Evaluation of WIC Nutrition Risk Criteria, 1996-06-10 This book reviews the scientific basis for nutrition risk criteria used to establish eligibility for participation in the U.S. Department of Agriculture's Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). The volume also examines the specific segments of the WIC population at risk for each criterion, identifies gaps in the scientific knowledge base, formulates recommendations regarding appropriate criteria, and where applicable, recommends values for determining who is at risk for each criterion. Recommendations for program action and research are made to strengthen the validity of nutrition risk criteria used in the WIC program.

Guide to Psychological Assessment with Hispanics Lorraine T. Benuto, 2012-09-19 This book focuses on diversity, culture, and ethnicity as they relate to psychological assessment of Hispanics. It is a how-to guide for clinicians, researchers, and instructors working with Hispanic clients. Each chapter contains an overview of cultural considerations needed for assessing the Hispanic client followed by a specific exploration of the assessment measures available and the research that has been conducted on these measures with Hispanic participants. An exploration of the strengths and limitations of each assessment measure is included. Considering that ethnocultural minority individuals who are of Hispanic/Latino origin make up the largest ethnocultural minority group in the United States, guidelines for working with this population are a must. Given that a large subset of this percentage is composed of immigrants many of whom do not speak English or who have learned English as a second language, special considerations for effective psychological assessment are necessary. This book fills a gap in the scientific literature by consolidating the research on psychological assessment with Hispanic samples into one comprehensive volume and providing simple recommendations for the psychological assessment of Hispanic clients. An exploration of the general psychological assessment domains (e.g., personality, intelligence) is included with references to research on the major assessment measures used in the field. A more specific exploration of psychodiagnostic assessment measures follows, including the assessment of mood disorders, anxiety disorders, sexual dysfunction, psychosis, etc. Several chapters are dedicated to specialized assessment, including neuropsychological assessment, forensic assessment, and school-based assessment, overall creating the most comprehensive, up-to-date, research-based compendium of psychological assessment measures for use with Hispanic clients.

Disability in Higher Education Nancy J. Evans, Ellen M. Broido, Kirsten R. Brown, Autumn K. Wilke, 2017-03-06 Create campuses inclusive and supportive of disabled students, staff, and faculty Disability in Higher Education: A Social Justice Approach examines how disability is conceptualized in higher education and ways in which students, faculty, and staff with disabilities are viewed and served on college campuses. Drawing on multiple theoretical frameworks, research, and experience creating inclusive campuses, this text offers a new framework for understanding disability using a social justice lens. Many institutions focus solely on legal access and accommodation, enabling a system of exclusion and oppression. However, using principles of universal design, social justice, and other inclusive practices, campus environments can be transformed into more inclusive and equitable settings for all constituents. The authors consider the experiences of students, faculty, and staff with disabilities and offer strategies for addressing ableism within a variety of settings, including classrooms, residence halls, admissions and orientation, student organizations, career development, and counseling. They also expand traditional student affairs understandings of disability issues by including chapters on technology, law, theory, and disability services. Using social justice principles, the discussion spans the entire college experience of individuals with disabilities, and avoids any single-issue focus such as physical accessibility or classroom accommodations. The book will help readers: Consider issues in addition to access and accommodation Use principles of universal design to benefit students and employees in academic, cocurricular, and employment

settings Understand how disability interacts with multiple aspects of identity and experience. Despite their best intentions, college personnel frequently approach disability from the singular perspective of access to the exclusion of other important issues. This book provides strategies for addressing ableism in the assumptions, policies and practices, organizational structures, attitudes, and physical structures of higher education.
