China's Belt and Road Initiative Wenxian Zhang, Ilan Alon, Christoph Lattemann, 2018-05-24 Since

the introduction of the One Belt, One Road initiative (OBOR), first proposed in late 2013, international scholars have begun to study this new policy and its implications in the global age. While OBOR provides new opportunities for China in terms of regional cooperation and global development, many also raise concerns about China's intentions of using economic means to achieve strategic and foreign policy objectives. Hailing from the West and the East, the authors reflect on the wide-ranging impacts of OBOR on specific countries, regions, economic policies, and geopolitical considerations. Including both theoretical research and empirical studies that explore opportunities and challenges related to OBOR, this edited volume will allow readers to gain a more comprehensive understanding of this ambitious undertaking and its long-term impact on the rest of the world.

This book provides a complete step-by-step approach for holistic Oracle tuning and it is the accumulated knowledge from tuning thousands of Oracle databases. Incorporating the principles of artificial intelligence, Oracle10g has developed a sophisticated mechanism for capturing and tracking database performance over time periods. This new complexity has introduced dozens of new v\$ and DBA views, plus dozens of Automatic Workload Repository (AWR) tables. The AWR and its interaction with the Automatic Database Diagnostic Monitor (ADDM) is a revolution in database tuning. By understanding the internal workings of the AWR tables, the senior DBA can develop time-series tuning models to predict upcoming outages and dynamically change the instance to accommodate the impending resource changes.
