The Nature Fix: Why Nature Makes Us Happier, Healthier, and More Creative Florence

Williams,2017-02-07 Highly informative and remarkably entertaining. —Elle From forest trails in Korea, to islands in Finland, to eucalyptus groves in California, Florence Williams investigates the science behind nature's positive effects on the brain. Delving into brand-new research, she uncovers the powers of the natural world to improve health, promote reflection and innovation, and strengthen our relationships. As our modern lives shift dramatically indoors, these ideas—and the answers they yield—are more urgent than ever.

Greening the Industrial Facility Thomas

Graedel, Jennifer Howard-Grenville, 2006-04-09 This textbook and reference fills a critical gap in literature on the comprehensive environmental impacts of industrial organizations. Nineteen chapters examine individual industrial sectors inherent potential to pollute. The text goes on to analyze new technologies and practices for transforming environmentally degrading effects of industry, and shows how managers can navigate these changes and move their organizations towards long-term environmental sustainability.

Odours in Wastewater Treatment Richard M.

Stuetz, Franz-Bernd Frechen, 2001-03-01 Wastewater treatment works have the potential to generate unpleasant odours, which can result in annoyance and consequently have a detrimental effect on a local population. As a result 'odour control and prevention' has become an important consideration both in the management of existing facilities and in the design and gaining of planning consent for new works. *Odours in Wastewater Treatment* provides readers with a detailed discussion on the basic principles involved in the formation of volatile compounds in wastewater treatment. Accounts are given of recent developments in the sampling and measurement of odours, practical examples in the prediction and dispersion of odorous emissions are offered and an overview of the technologies currently used to contain and treat odorous compounds presented. Contents Introduction Odours associated with wastewater treatment Odour sampling and measurement Assessment and prediction of nuisance odours Odour control and treatment

ADME Processes in Pharmaceutical Sciences Alan

Talevi, Pablo A. M. Quiroga, 2018-11-30 Absorption, Distribution, Metabolism and Excretion (ADME) processes and their relationship with the design of dosage forms and the success of pharmacotherapy form the basis of this upper level undergraduate/graduate textbook. As an introduction oriented to pharmacy students, it is also written for scientist from different fields outside of pharmaceutics. (e.g. material scientist, material engineers, medicinal chemists) who might be working in a positions in pharmaceutical companies or whose work might benefit from basic training in the ADME concepts and some biological background. Pedagogical features such as objectives, keywords, discussion questions, summaries and case studies add valuable teaching tools. This book will provide not only general knowledge on ADME processes but also an updated insight on some hot topics such as drug transporters, multi-drug resistance related to pharmacokinetic phenomena, last generation pharmaceutical carriers (nanopharmaceuticals), in vitro and in vivo bioequivalence studies, biopharmaceuticals, pharmacogenomics, drug-drug and food-drug interactions, and in silico and in vitro prediction of ADME properties. In comparison with other similar textbooks, around half of the volume would be focused on the relationship between expanding scientific fields and ADME processes. Each of these burgeoning fields has a separate chapter in the second part of the volume, and was written with leading experts on the correspondent topic, including scientists and academics from USA and UK (Duquesne University School of Pharmacy, Indiana University School of Medicine, University of Utah College of Pharmacy, University of Maryland, University of Bath). Additionally, each of the initial chapters dealing with the generalities of drug absorption, distribution, metabolism and excretion

would include relevant, classic examples related to each topic with appropriate illustrations (e.g. importance of active absorption of levodopa, implications in levodopa administration, drug drug interactions and food drug interactions emerging from the active uptake; intoxication with paracetamol as a result of glutathione depletion, CYP induction and its relationship with acute liver failure caused by paracetamol, etc). ADME Processes and Pharmaceutical Sciences is written as a core textbook for ADME processes, pharmacy, pharmacokinetics, drug delivery, biopharmaceutics, drug disposition, drug design and medicinal chemistry courses.

MoneyBall Medicine Harry Glorikian, Malorye Allison Branca, 2017-11-20 How can a smartwatch help patients with diabetes manage their disease? Why can't patients find out prices for surgeries and other procedures before they happen? How can researchers speed up the decade-long process of drug development? How will Precision Medicine impact patient care outside of cancer? What can doctors, hospitals, and health systems do to ensure they are maximizing high-value care? How can healthcare entrepreneurs find success in this data-driven market? A revolution is transforming the \$10 trillion healthcare landscape, promising greater transparency, improved efficiency, and new ways of delivering care. This new landscape presents tremendous opportunity for those who are ready to embrace the data-driven reality. Having the right data and knowing how to use it will be the key to success in the healthcare market in the future. We are already starting to see the impacts in drug development, precision medicine, and how patients with rare diseases are diagnosed and treated. Startups are launched every week to fill an unmet need and address the current problems in the healthcare system. Digital devices and

artificial intelligence are helping doctors do their jobs faster and with more accuracy. *MoneyBall Medicine: Thriving in the New Data-Driven Healthcare Market*, which includes interviews with dozens of healthcare leaders, describes the business challenges and opportunities arising for those working in one of the most vibrant sectors of the world's economy. Doctors, hospital administrators, health information technology directors, and entrepreneurs need to adapt to the changes effecting healthcare today in order to succeed in the new, cost-conscious and value-based environment of the future. The authors map out many of the changes taking place, describe how they are impacting everyone from patients to researchers to insurers, and outline some predictions for the healthcare industry in the years to come.

Integrative Pediatric Oncology Alfred Längler, Patrick J. Mansky, Georg Seifert, 2012-12-13 This book covers a broad spectrum of complementary and alternative medicine (CAM) practices employed in pediatric oncology worldwide, with a special focus on the methods widely used in Western countries. It is a scientifically based, practice-oriented handbook that will meet the needs of pediatric oncologists working in medical practices and hospitals. An introductory section includes a comparative overview of current CAM use in pediatric oncology in different countries. Commonly used CAM methods are then discussed in a series of chapters that provide a theoretical description of the method in question, followed by more practically oriented information, including scientific data if applicable. Special attention is paid to the issue of how to integrate each method into conventional pediatric oncology. The closing parts of the book consider aspects of CAM requiring further development, such as institutional research, and provide a road map on establishing

integrative pediatric oncology worldwide.

Community Resilience to Sectarian Violence in Baghdad Ami C. Carpenter, 2013-10-04 The recent conflict in Iraq evolved from an insurgency against the interim U.S. led government (the Coalition Provisional Authority or CPA) into a sectarian civil war. Violence became widespread, especially in areas of Baghdad City such as Sadr City, Al Amiriyah, and Al Adhamiya. However, a number of multiethnic neighborhoods in Baghdad successfully prevented sectarian attitudes and behaviors from taking hold. Four communities stand out in their self-organization to prevent the escalation of violence. This book looks at what makes these communities different

from other areas within Baghdad. In-depth interviews in Sunni-dominant, Shia-dominant and Mixed neighborhoods generated a few key insights about conflict-resilience, or the capacity to prevent structural changes associated with conflict escalation. Key factors turned out to be the organization of non-sectarian self-defense groups, place attachment, collective efficacy, active intervention to de-escalate tensions, and also the presence of local religious leaders who forbid sectarian attacks. The continuity or strength of interpersonal relationships supported by the integrated physical structure of these neighborhoods and internal versus tribal conflict resolution mechanisms played a role as well. This volume examines the characteristics of the communities that have successfully prevented the rise of violence, and how they are able to maintain qualities of resilience to violent conflict.

The Arma Christi in Medieval and Early Modern Material Culture Lisa H. Cooper, Andrea Denny-Brown, 2016-12-05 The Arma Christi, the cluster of objects associated with Christ's Passion, was one of the most familiar iconographic devices of European medieval and early modern culture. From the weapons used to torment and sacrifice the body of Christ sprang a reliquary tradition that produced active and contemplative devotional practices, complex literary narratives, intense lyric poems, striking visual images, and innovative architectural ornament. This collection displays the fascinating range of intellectual possibilities generated by representations of these medieval 'objects,' and through the interdisciplinary collaboration of its contributors produces a fresh view of the multiple intersections of the spiritual and the material in the Middle Ages and Renaissance. It also includes a new and authoritative critical edition of the Middle English Arma Christi poem known as 'O Vernicle' that takes

account of all twenty surviving manuscripts. The book opens with a substantial introduction that surveys previous scholarship and situates the Arma in their historical and aesthetic contexts. The ten essays that follow explore representative examples of the instruments of the Passion across a broad swath of history, from some of their earliest formulations in late antiquity to their reformulations in early modern Europe. Together, they offer the first large-scale attempt to understand the arma Christi as a unique cultural phenomenon of its own, one that resonated across centuries in multiple languages, genres, and media. The collection directs particular attention to this array of implements as an example of the potency afforded material objects in medieval and early modern culture, from the glittering nails of the Old English poem *Elene* to the coins of the Middle English poem 'Sir Penny,' from garments and dice on Irish tomb sculptures to lanterns and ladders in Hieronymus Bosch's panel painting of St. Christopher, and from the altar of the Sistine Chapel to the printed prayer books of the Reformation.

Creating Autoethnographies Tessa

Muncey, 2010-03-25 *Creating Autoethnographies* is an introduction to autoethnography, a form of autobiographical personal narrative that explores the writer's experience of life. The first ever practical text on this increasingly popular research method, it provides a background and considers some of the criticisms of the approach. It is suitable for all social science students, both at postgraduate and also upper level undergraduate stage. The book is structured to mirror the process of writing about experience, from establishing an idea through to the process of writing and the development of creative writing

skills, and provides detailed worked examples of the whole process. The final two chapters are devoted to exploring two cases in which readers can see the principles discussed in action. There are also a wide range of case studies drawn from a wide a range of social science disciplines and exercises throughout the text. In the book, Tessa Muncey identifies a number of trends in social science research, such as the increasing focus on the individual and giving a voice to service users, that are resulting in an increase of interest in narrative research. *Creating Autoethnographies* is a timely contribution to the field. Tessa Muncey is one of the leading names in this field and is the annual organiser and chair of the Mixed Methods Conference.

Patrimony Alan Dean Foster, 2007-10-30 In this Pip & Flinx thriller, Alan Dean Foster displays the brilliance that has made him one of the brightest lights in science fiction. In *Patrimony*, fans will learn more about their favorite redhead—with emerald eyes, uncanny powers, and a poisonous minidrag—than they ever dreamed possible. “I know who your father is . . . Gestalt.” A shocked Flinx hears these dying words from one of the renegade eugenicists whose experiments with humans twenty-odd years ago shocked the galaxy . . . and spawned Flinx. So Flinx and his minidrag, Pip, venture to Gestalt, an out-of-the-way planet perfect for someone who never wants to be found—disregarding the advice of those who think Flinx could make better use of his time locating the ancient, sentient weapons platform that could be the galaxy’s only chance of stopping the exterminating scourge that’s fast approaching. Flinx might agree with them—but the quest for patrimony wins out. (Sorry, galaxy!) Could Gestalt supply the key to Flinx’s shadowy past and strange powers? An eccentric loner in a remote area could be the

father Flinx has never stopped searching for, perhaps the only person who can unravel the mystery of his birth and his amazing, agonizing powers. Unfortunately for Flinx, Gestalt also hosts a resident bounty hunter who's just learned about the stupendous reward offered for a certain dead redhead. Flinx gets a chance to test his adversary's skills when our hero's skimmer is blasted out of the sky and into a raging river in the middle of nowhere—a nowhere of impassable terrain and ravenous, carnivorous beasts. But hey, what's one more impossible challenge for someone who's spent his life defying the odds and escaping the inescapable? Flinx has one thing going for him . . . plenty of experience.

Medical Geology Olle Selinus, Robert B.

Finkelman, Jose A. Centeno, 2010-06-27 Medical Geology is a rapidly growing field concerned with the relationship between natural geological factors and human and animal health, as well as with improving our understanding of the influence of environmental factors on the geographical distribution of health problems. This book brings together the work of geoscientists and medical/public health researchers, which addresses health problems caused, or exacerbated by geological materials (rocks, minerals, atmospheric dust and water) and processes (including volcanic eruptions and earthquakes. Among the environmental health problems discussed in this book are: exposure to toxic levels of trace essential and non-essential elements such as arsenic and mercury; trace element deficiencies; exposure to natural dusts and to radioactivity; naturally occurring organic compounds in drinking water; volcanic emissions, etc. The text also deals with the many health benefits of geologic materials and processes. This wide-ranging volume covers issues in medical geology all over the world with each author covering their respective

region. It provides examples from different continents as well as a state-of-the-art review of the latest developments in the discipline. The authors are all recognized geoscientific and medical experts working in the field. The book is written for a wide variety of specialists from geologists, geochemists, pathologists and medical doctors to veterinarians and biologists.
