The Butterfly in the Quantum World Indubala I Satija, 2016-09-06 *Butterfly in the Quantum World* by Indu Satija, with contributions by Douglas

Hofstadter, is the first book ever to tell the story of the Hofstadter butterfly, a beautiful and fascinating graph lying at the heart of the quantum theory of matter. The butterfly came out of a simple-sounding question: What happens if you immerse a crystal in a magnetic field? What energies can the electrons take on? From 1930 onwards, physicists struggled to answer this question, until 1974, when graduate student Douglas Hofstadter discovered that the answer was a graph consisting of nothing but copies of itself nested down infinitely many times. This wild mathematical object caught the physics world totally by surprise, and it continues to mesmerize physicists and mathematicians today. The butterfly plot is intimately related to many other important phenomena in number theory and physics, including Apollonian gaskets, the Foucault pendulum, quasicrystals, the quantum Hall effect, and many more. Its story reflects the magic, the mystery, and the simplicity of the laws of nature, and Indu Satija, in a wonderfully personal style, relates this story, enriching it with a vast number of lively historical anecdotes, many photographs, beautiful visual images, and even poems, making her book a great feast, for the eyes, for the mind and for the soul.

POWER7 and POWER7+ Optimization and Tuning Guide

Brian Hall, Mala Anand, Bill Buros, Miso Cilimdžić, Hong Hua, Judy Liu, John MacMillan, Sudhir Maddali, K Madhusudanan, Bruce Mealey, Steve Munroe, Francis P O'Connell, Sergio Reyes, Raul Silvera, Randy Swanberg, Brian Twichell, Brian F Veale, Julian Wang, Yaakov Yaari, IBM Redbooks, 2013-03-04 This IBM® Redbooks® publication provides advice and technical information about optimizing and tuning application code to run on systems that are based on the IBM POWER7® and POWER7+™ processors. This advice is drawn from application optimization

efforts across many different types of code that runs under the IBM AIX® and Linux operating systems, focusing on the more pervasive performance opportunities that are identified, and how to capitalize on them. The technical information was developed by a set of domain experts at IBM. The focus of this book is to gather the right technical information, and lay out simple guidance for optimizing code performance on the IBM POWER7 and POWER7+ systems that run the AIX or Linux operating systems. This book contains a large amount of straightforward performance optimization that can be performed with minimal effort and without previous experience or in-depth knowledge. This optimization work can:

- Improve the performance of the application that is being optimized for the POWER7 system
- Carry over improvements to systems that are based on related processor chips
- Improve performance on other platforms

The audience of this book is those personnel who are responsible for performing migration and implementation activities on IBM POWER7-based servers, which includes system administrators, system architects, network administrators, information architects, and database administrators (DBAs).

IBM Power Systems SR-IOV: Technical Overview and Introduction Scott Vetter, Shivaji D Bhosale, Alexandre Bicas Caldeira, Bartłomiej Grabowski, Chuck Graham, Alexander D Hames, Volker Haug, Marc-Eric Kahle, Cesar Diniz Maciel, Manjunath N Mangalur, Monica Sanchez, IBM Redbooks, 2017-01-12

This IBM® Redpaper™ publication describes the adapter-based virtualization capabilities that are being deployed in high-end IBM POWER7+™ processor-based servers. Peripheral Component Interconnect Express (PCIe) single root I/O virtualization (SR-IOV) is a virtualization technology on IBM Power Systems servers. SR-IOV allows multiple logical partitions (LPARs) to

share a PCIe adapter with little or no run time involvement of a hypervisor or other virtualization intermediary. SR-IOV does not replace the existing virtualization capabilities that are offered as part of the IBM PowerVM® offerings. Rather, SR-IOV compliments them with additional capabilities. This paper describes many aspects of the SR-IOV technology, including: A comparison of SR-IOV with standard virtualization technology Overall benefits of SR-IOV Architectural overview of SR-IOV Planning requirements SR-IOV deployment models that use standard I/O virtualization Configuring the adapter for dedicated or shared modes Tips for maintaining and troubleshooting your system Scenarios for configuring your system This paper is directed to clients, IBM Business Partners, and system administrators who are involved with planning, deploying, configuring, and maintaining key virtualization technologies.

Socio-Life Science and the COVID-19 Outbreak

Makoto Yano, Fumihiko Matsuda, Anavaj

Sakuntabhai, Shigeru Hirota, 2022 This open access

book presents the first step towards building

socio-life science, a field of science

investigating humans in such a way that both

social and life-scientific factors are integrated.

Because humans are both living and social

creatures, a human action can never be understood

fully without knowing both the biological traits

of a person and the social scientific environments

in which he exists. With this consideration, the

editors of this book have initiated a research

project promoting a deeper and more integrated

understanding of human behavior and human health.

This book aims to show what can, and could be,

achieved through our interdisciplinary project.

One important product is the newly formed three-

party collaboration between Pasteur Institut,

Kyoto University, and the Research Institute of

Economy, Trade and Industry. Covering many

different fields, including medicine,

epidemiology, anthropology, economics, sociology,

demography, geography, and policy, researchers in

these institutes, and many others, present their

studies on the COVID-19 pandemic. Although based

on different methodologies, the studies show the

importance of behavioral change and governmental

policy in the fight against a huge pandemic. The

book explains the unique genome cohort-panel data

that the project builds to study social and life

scientific aspects of humans.

Portfolio Inflows Eclipsing Banking Inflows:

Alternative Facts? Mr. Eugenio M Cerutti, Mr. Gee Hee

Hong, 2018-02-16 Superficial examination of

aggregate gross cross-border capital inflow data

suggests that there was no substitution between

portfolio inflows and bank loans in recent years. However, our novel analysis of disaggregate inflows (both by types of instrument and borrower) shows interesting heterogeneity. There has been substitution of bank loans for portfolio debt securities not only in the case of corporate and sovereign borrowers in advanced countries, but also sovereign borrowers in emerging countries. In the case of corporate borrowers in emerging markets, the relationship corresponds to complementarity across types of gross capital inflows, especially during periods of positive capital gross inflows after the global financial crisis. A large part of these patterns does not seem to be driven by a common phenomenon across countries associated with the global financial cycle, but rather by country-specific factors.

Contaminants in Drinking and Wastewater Sources Manish Kumar, Daniel D. Snow, Ryo Honda, Santanu Mukherjee, 2020-06-29 This volume takes a multidisciplinary approach to study and evaluate the global human vulnerability to the exposure of contaminants of emerging concern (CECs) in the natural environment. It provides a comprehensive resource on structurally diverse groups of chemical compounds that have adverse effects on the aquatic environment. It explores the global strength, environmental status, chemical risk assessment and management strategies of CECs with relevant modern techniques. The principle focus is on concurrent emerging water quality issues. It defines the impacts of the environmental exposure of trace concentrations of CECs and/or their metabolites and discusses possible technological advances to combat the emerging pollutants. It will be useful to researchers, multi-stakeholder expert groups, policymakers, and graduate students.

Modern Technologies and Their Influence in Fermentation Quality Santiago Benito, 2020-05-20

During the last few years, industrial fermentation technologies have advanced in order to improve the quality of the final product. Some examples of those modern technologies are the biotechnology developments of microbial materials, such as *Saccharomyces* and non-*Saccharomyces* yeasts or lactic bacteria from different genera. Other technologies are related to the use of additives and adjuvants, such as nutrients, enzymes, fining agents, or preservatives and their management, which directly influence the quality and reduce the risks in final fermentation products. Other technologies are based on the management of thermal treatments, filtrations, pressure applications, ultrasounds, UV, and so on, which have also led to improvements in fermentation quality in recent years. The aim of the issue is to study new technologies able to improve the quality parameters of fermentation products, such as aroma, color, turbidity, acidity, or any other parameters related to improving sensory perception by the consumers. Food safety parameters are also included.

Extraordinary Partnerships Christine Henseler, 2020-05-01 This inspirational and hopeful collection demonstrates that the arts and humanities are entering a renaissance that stands to change the direction of our communities. Community leaders, artists, educators, scholars, and professionals from many fields show how they are creating responsible transformations through partnership in the arts and humanities. The diverse perspectives that come together in this book teach us how to perceive our lives and our disciplines through a broader context. The contributions exemplify how individuals, groups, and organizations use artistic and humanistic principles to explore new structures and novel ways of interacting to reimagine society. They refresh and reinterpret the ways in which we have

traditionally assigned space and value to the arts and humanities.

Wi-FiTM, BluetoothTM, ZigbeeTM and WiMaxTM Houda Labiod, Hossam Afifi, Costantino de Santis, 2007-08-30 The book provides a complete and detailed description of the recent wireless technologies including Wi-Fi, Bluetooth, ZigBee and WiMAX. These technologies are considered to be important topics in the telecommunication industry in the next decade. Some critical subjects are particularly developed such as security, quality of service, roaming and power conservation. The book also includes some chapters on practical aspects.

Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary Truth and Reconciliation Commission of Canada, 2015-07-22

This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to emotional, psychological and often physical abuse. In this setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide. The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions,

and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology for these events to true reconciliation that can be embraced by all Canadians.
