Hoosiers and the American Story Madison, James H., Sandweiss, Lee Ann, 2014-10-01 A supplemental textbook for middle and high school students, *Hoosiers and the American Story* provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

Public Sector Debt Statistics International Monetary Fund, 2011-12-08 The global financial crisis of recent years and the associated large fiscal deficits and debt levels that have impacted many countries underscores the importance of reliable and timely government statistics and, more broadly, public sector debt as a critical element in countries' fiscal and external sustainability. Public Sector Debt Statistics is the first international guide of its kind, and its primary objectives are to improve the quality and timeliness of key debt statistics and promote a convergence of recording practices to foster international comparability and as a reference for national compilers and users for compiling and disseminating these data. Like other statistical guides published by the IMF, this one was prepared in consultation with countries and international agencies, including the nine organizations of the Inter-Agency Task Force on Finance Statistics (TFFS). The guide's preparation was based on the broad range of experience of our institutions and benefitted from consultation with national compilers of government finance and public sector debt statistics. The guide's concepts are harmonized with those of the System of National Accounts (2008) and the Balance of Payments and International Investment Position Manual, Sixth Edition.

Noise and Military Service Institute of Medicine, Medical Follow-up Agency, Committee on Noise-Induced Hearing Loss and Tinnitus Associated with Military Service from World War II to the Present, 2006-01-20 The Institute of Medicine carried out a study mandated by Congress and sponsored by the Department of Veterans Affairs to provide an assessment of several issues related to noise-induced hearing loss and tinnitus associated with service in the Armed Forces since World War II. The resulting book, *Noise and Military Service: Implications for Hearing Loss and Tinnitus*, presents findings on the presence of hazardous noise in military settings, levels of noise exposure necessary to cause hearing loss or tinnitus, risk factors for noise-induced hearing loss and tinnitus, the timing of the effects of noise exposure on hearing, and the adequacy of military hearing conservation programs and audiometric testing. The book stresses the importance of conducting hearing tests (audiograms) at the beginning and end of military service for all military personnel and recommends several steps aimed at improving the military services' prevention of and surveillance for hearing loss and tinnitus. The book also identifies research needs, emphasizing topics specifically related to military service.

Vibrant and Healthy Kids National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood Development: A Health Equity Approach, 2019-12-27 Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. *Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity* builds upon and updates research from *Communities in Action: Pathways to Health Equity* (2017) and *From Neurons to Neighborhoods: The Science of Early Childhood Development* (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

Effective Succession Planning William Rothwell, 2010-04-21 William Rothwell honored with the ASTD Distinguished Contribution Award in Workplace Learning and Performance. The definitive guide to a timely and timeless topic-- now fully revised and updated. As baby boomers continue to retire en masse from executive suites, managerial offices, and specialized or technical jobs, the question is—who will take their places? The book has been fully updated to address challenges brought on by sea changes such as globalization, recession, technology, and the aftereffects of the terror attacks. It features new sections on identifying and assessing competencies and future needs; management vs. technical succession planning; and ethics and conduct; and new chapters on integrating recruitment and retention strategies with succession planning programs. This edition incorporates the results of two extensive new surveys, and includes a Quick Start guide to help begin immediate implementation as well as a CD-ROM packed with assessments, checklists, customizable guides, and other practical tools.

Combating Desertification with Plants D. Pasternak, Arnold Schlissel, 2012-12-06 The conference Combating Desertification with Plants was held in Beer Sheva, Israel, from November 2-5, 1999, and was attended by 70 participants from 30 countries and/or international organisations. Desertification - the degradation of soils in drylands - is a phenomenon occurring in scores of countries around the globe. The number of people (in semiarid regions) affected by the steady decline in the productivity of their lands is in the hundred millions. The measures required to halt and reverse the process of desertification fall into many categories - policy, institutional, sociological-anthropological, and technical. Although technical solutions are not currently in vogue, the conference organizers felt that perhaps the pendulum had swung too far in the direction of participatory approaches. Hence IPALAC - The International Program for Arid Land Crops - whose function is to serve as a catalyst for optimizing the contribution of plant germplasm to sustainable development in desertification-prone regions - felt the time was opportune for providing a platform for projects where the plant-driven approach to development finds expression. Some 45 papers were delivered at the conference, falling into the categories of this volume: Overview, Potential Germplasm for Arid Lands, Introduction, Domestication and Dissemination of Arid Land Plants, Land Rehabilitation, and Mechanisms of Plant Transfer. The conference was funded by UNESCO (Division of Ecological Sciences), the Ministry of Foreign Affairs of Finland, and MASHAV, Israel's Center for International Development Cooperation.
