**Construction Accounting & Financial Management** Stephen Peterson, 2013-10-03 For all courses in construction accounting and construction finance, and for courses in engineering economics taught in construction management programs. This book helps construction professionals and construction management students master the principles of financial management, and adapt and apply them to the challenge of profitably managing construction companies. It integrates content that has traditionally been taught through separate accounting, finance, and engineering economics texts. Students learn how to account for a construction company's financial resources; how to manage its costs, profits, and cash flows; how to evaluate different sources of funding a company's cash needs; and how to quantitatively analyze financial decisions. Readers gain hands-on experience through 220 example problems and over 390 practice problems, many of them based on situations actually encountered by the author. This edition adds more than 100 new discussion questions, and presents financial equations and accounting transactions more visually to support more intuitive learning.

*Transportation Decision Making* Kumares C. Sinha, Samuel Labi, 2011-09-09 This pioneering text provides a holistic approach to decisionmaking in transportation project development and programming, which can help transportation professionals to optimize their investment choices. The authors present a proven set of methodologies for evaluating transportation projects that ensures that all costs and impacts are taken into consideration. The text's logical organization gets readers started with a solid foundation in basic principles and then progressively builds on that foundation. Topics covered include: Developing performance measures for evaluation, estimating travel demand, and costing transportation projects Performing an economic efficiency evaluation that accounts for such factors as travel time, safety, and vehicle operating costs Evaluating a project's impact on economic development and land use as well as its impact on society and culture Assessing a project's environmental impact, including air quality, noise, ecology, water resources, and aesthetics Evaluating alternative projects on the basis of multiple performance criteria Programming transportation investments so that resources can be optimally allocated to meet facility-specific and system-wide goals Each chapter begins with basic definitions and concepts followed by a methodology for impact assessment. Relevant legislation is discussed and available software for performing evaluations is presented. At the end of each chapter, readers are provided resources for detailed investigation of particular topics. These include Internet sites and publications of international and domestic agencies and research institutions. The authors also provide a companion Web site that offers updates, data for analysis, and case histories of project evaluation and decisionmaking. Given that billions of dollars are spent each year on transportation systems in the United States alone, and that there is a need for thorough and rational evaluation and decision making for cost-effective system preservation and improvement, this text should be on the desks of all transportation planners, engineers, and educators. With exercises in every chapter, this text is an ideal coursebook for the subject of transportation systems analysis and evaluation.

Anticipatory Policymaking Rob A. DeLeo, 2015-09-16 Public policy analysts and political pundits alike tend to describe the policymaking process as a reactive sequence in which government develops solutions for clearly evident and identifiable problems. While this depiction holds true in many cases, it fails to account for instances in which public policy is enacted in anticipation of a potential future problem. Whereas traditional policy concerns manifest themselves through ongoing harms, anticipatory problems are projected to occur sometime in the future, and it is the prospect of their potentially catastrophic impact that generates intense speculation and concern in the present. *Anticipatory Policymaking: When Government Acts to Prevent Problems and Why It Is So Difficult* provides an in depth examination of the complex process through which United States government institutions anticipate emerging threats. Using contemporary debates over the risks associated with nanotechnology, pandemic influenza, and global warming as case study material, Rob A. DeLeo highlights the distinctive features of proactive governance. By challenging the pervasive assumption of reactive policymaking, DeLeo provides a dynamic approach for conceptualizing the political dimensions of anticipatory policy change.

Measuring Effectiveness in Humanitarian and Development Aid Andre M. N. Renzaho, 2007 Donor countries are currently scaling up their aid programmes in response to strategies proposed through the Millennium Development Goals. Recent positive research on the impact of foreign development aid has led to increased expectations on the part of donor countries. Research suggests that per capita income growth over the last decade would have been lower in the absence of aid, and also that public sector expenditure on health and education in developing countries would not have been as great without aid inflows. However, there still remain many significant gaps

in knowledge on aid allocation and effectiveness. This book addresses a number of these gaps, and provides many new and important analytical insights into aid. Among the topics covered are the interface between aid allocation and perceptions of aid effectiveness, the inter-recipient concentration of aid from non-government organizations, the year-on-year volatility of aid, impacts of aid on public sector fiscal aggregates, and evaluation of the country-level impacts of aid. The book is an essential companion for professionals engaged in aid policy reforms and also for scholars in the areas of development economics, international finance and economics.

Celestial Delights Francis Reddy, 2011-11-12 Celestial Delights is essentially a 'TV Guide' for the sky. This will be its third edition. This title, which has aggregated sales of about 20,000 copies to date in its two previous editions and has found a niche with skygazers, is much awaited. Through extensive graphics integrated with an eight-year-long calendar of sky events, it provides a look at don't miss sky events, mostly for naked-eye and binocular observing. The book is organized by ease of observation - lunar phases and the brighter planets come first, while solar eclipses, the aurora, and comets come later. Celestial Delights also includes a hefty dose of sky lore, astronomical history, and clear overviews of current science. It provides a handy reference to upcoming naked-eye events, with information broken out in clear and simple diagrams and tables that are cross-referenced against a detailed almanac for each year covered. Most broad-ranging astronomy field guides focus on stars, constellations, and the deep sky, but tend to ignore planetary events, which are in by far the most widely observable aspects of the changing night sky. Celestial Delights puts a variety of information all in one place, presents it in a friendly way that does not require prior in-depth astronomical knowledge, but provides the context and historical background for understanding events that astronomical computer programs or web sites lack.

**COVID-19 in Manitoba** Andrea Rounce, Karine Levasseur, 2020-11-26 On 12 March 2020 Manitoba confirmed its first case of COVID-19. One week later, a province-wide state of emergency was declared, ushering in a new sense of urgency and rarely used government powers to protect Manitobans from the devastating global reach of the novel coronavirus. The wide-ranging impacts of the pandemic have touched every facet of Manitoba society and provincial responsibility, including health, economic development, social services, and government operations. COVID-19 has challenged the conventional policy-making process—complicating agenda setting and policy formulation, adoption, implementation, and evaluation—while governments have been under pressure to make swift decisions in life-and-death matters. New programs must address urgent and shifting health and economic realities, but also anticipate future waves of COVID-19 and potentially significant repercussions for future governments. COVID-19 in Manitoba: Public Policy Responses to the First Wave seeks to understand how Manitoba fared during the first months of the pandemic, with twenty-seven chapters that address key aspects of the pandemic and discuss how government policy can help lay the foundation for resiliency in the midst a continuing public-health crisis. This open-access volume is an essential resource for citizens and policy-makers alike, as it identifies policy gaps and successes of Manitoba's early COVID response and points to strategies to prepare for future waves of the pandemic.

European Integration and the Governance of Higher Education and Research Alberto Amaral, Guy Neave, Christine Musselin, Peter Maassen, 2009-10-03 The high level Douro seminars are now a well-established tradition in the annual activities promoted by Hedda, a European consortium of nine centres and institutes devoted to research on higher education, and CIPES, its Portuguese associated centre. At the seminars, each member of a small group of invited researchers presents and discusses an original research-based paper that is revised afterwards taking into account the comments of the participating colleagues. The revised papers form the basis for the annual thematic book published by Springer in the book series called Higher Education Dynamics (HEDY). Paying tribute to the regularity of the seminars, it was decided that the volumes originating from the initiative would be collected in a 'series in the series' called the Douro Series. Previous seminars were dedicated to in-depth analyses of different aspects of higher education systems and institutions, including institutional governance, the emergence of managerialism, markets as instruments of public policy, cost-sharing and accessibility of students to higher education and developments in quality assurance. The present volume aims at analysing the change process which the European university is undergoing as a consequence of European integration efforts. In the case of higher education, these have materialised, amongst other things, in the implementation of the Bologna process, while the Lisbon summit also has important consequences for the university. In March 2000, the Lisbon European Council set the goal for the EU to become the most competitive and dynamic knowledge-based society in the world by 2010.

Stand Before Your God Paul Watkins, 1994-09-01 This autobiography follows Paul Watkins's early life and schooling at the Dragon School, Eton and Yale. Born in 1963, Watkins is the author of *The Promise of Light* and *Night Over Day Over Night*, which were both nominated for the Booker Prize.

**Whitethorn Woods** Maeve Binchy, 2009-12-23 'A touching, funny, optimistic book full of wonderful, well observed characters' Daily Mail 'Maeve Binchy at her best' Choice Everything is changing in small Irish town of Rossmore - and when a new road threatens to cut through Whitethorn Woods, everyone has a passionate opinion about whether the town will benefit or suffer. At the heart of the conflict is the fate of St. Ann's Well. People have been coming to St. Ann's for generations to share their dreams and fears. Some believe it to be a place of true spiritual power, demanding protection; others think it's a mere magnet for superstitions, easily sacrificed. When one man is offered compensation for his land - but has a personal reason to save the well - and a childless London woman comes to Whitethorn Woods, begging the saint for help, the consequences are not as anyone anticipated . . .

*Carbon Nanotubes* Michael J. O'Connell, 2018-10-03 Since their discovery more than a decade ago, carbon nanotubes (CNTs) have held scientists and engineers in captive fascination, seated on the verge of enormous breakthroughs in areas such as medicine, electronics, and materials science, to name but a few. Taking a broad look at CNTs and the tools used to study them, *Carbon Nanotubes: Properties and Applications* comprises the efforts of leading nanotube researchers led by Michael O'Connell, protégé of the late father of nanotechnology, Richard Smalley. Each chapter is a self-contained treatise on various aspects of CNT synthesis, characterization,

modification, and applications. The book opens with a general introduction to the basic characteristics and the history of CNTs, followed by discussions on synthesis methods and the growth of “peapod” structures. Coverage then moves to electronic properties and band structures of single-wall nanotubes (SWNTs), magnetic properties, Raman spectroscopy of electronic and chemical behavior, and electromechanical properties and applications in NEMS (nanoelectromechanical systems). Turning to applications, the final sections of the book explore mechanical properties of SWNTs spun into fibers, sidewall functionalization in composites, and using SWNTs as tips for scanning probe microscopes. Taking a fresh look at this burgeoning field, Carbon Nanotubes: Properties and Applications points the way toward making CNTs commercially viable.

**Orange Empire** Douglas Cazaux Sackman,2005-02-07 Douglas Sackman peels an orange and finds inside nothing less than an American agricultural-industrial culture in all its inventive, exploitative, transformative, and destructive power. A beautifully researched and intellectually expansive book.—Elliott West, author of *The Contested Plains: Indians, Goldseekers, & the Rush to Colorado*

*Faith and Liberty* Alejandro A. Chafuen,2003-05-07 Most people think that free-market ideas and theories were first substantially developed in the eighteenth century by figures such as Adam Smith. In this revised edition of *Faith and Liberty*, Alejandro A. Chafuen illustrates this misconception by examining the sixteenth and seventeenth century writings of a group of Catholic theologians and philosophers. The Late- Scholastics, as they are called, were the first to engage in a systematic moral analysis of the ethical issues associated with trade and commerce. In doing so, they arrived at solutions that are in many senses indistinguishable from the ideas of many modern free market commentators. In this revised edition, Chafuen bolsters his case by including recent and pertinent material which gives rise to new questions and concerns. Reading this book will force to consider what they understand to be an authentically Christian approach to economic questions.
