SQL Tuning Dan Tow, 2003-11-19 A poorly performing database application not only costs users time, but also has an impact on other applications running on the same computer or the same network. SQL Tuning provides an essential next step for SQL developers and database administrators who want to extend their SQL tuning expertise and get the most from their database applications. There are two basic issues to focus on when tuning SQL: how to find and interpret the execution plan of an SQL statement and how to change SQL to get a specific alternate execution plan. SQL Tuning provides answers to these questions and addresses a third issue that's even more important: how to find the optimal execution plan for the query to use. Author Dan Tow outlines a timesaving method he's developed for finding the optimum execution plan--rapidly and systematically--regardless of the complexity of the SQL or the database platform being used. You'll learn how to understand and control SQL execution plans and how to diagram SQL queries to deduce the best execution plan for a query. Key chapters in the book include exercises to reinforce the concepts you've learned. SQL Tuning concludes by addressing special concerns and unique solutions to unsolvable problems. Whether you are a programmer who develops SQL-based applications or a database administrator or other who troubleshoots poorly tuned applications, SQL Tuning will arm you with a reliable and deterministic method for tuning your SQL queries to gain optimal performance.

Capturing Change in Science, Technology, and Innovation National Research Council,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Panel on Developing Science, Technology, and Innovation Indicators for the Future,2014-08-25 Since the 1950s, under congressional mandate, the U.S. National Science Foundation (NSF) - through its National Center for Science and Engineering Statistics (NCSES) and predecessor agencies - has produced regularly updated measures of research and development expenditures, employment and training in science and engineering, and other indicators of the state of U.S. science and technology. A more recent focus has been on measuring innovation in the corporate sector. NCSES collects its own data on science, technology, and innovation (STI) activities and also incorporates data from other agencies to produce indicators that are used for monitoring purposes - including comparisons among sectors, regions, and with other countries - and for identifying trends that may require policy attention and generate research needs. NCSES also provides extensive tabulations and microdata files for in-depth analysis. Capturing Change in Science, Technology, and Innovation assesses and provides recommendations regarding the need for revised, refocused, and newly developed indicators of STI activities that would enable NCSES to respond to changing policy concerns. This report also identifies and assesses both existing and

potential data resources and tools that NCSES could exploit to further develop its indicators program. Finally, the report considers strategic pathways for NCSES to move forward with an improved STI indicators program. The recommendations offered in Capturing Change in Science, Technology, and Innovation are intended to serve as the basis for a strategic program of work that will enhance NCSES's ability to produce indicators that capture change in science, technology, and innovation to inform policy and optimally meet the needs of its user community.

Global Economic Prospects 2007 World Bank, 2006
Over the next 25 years developing countries will move to center stage in the global economy. Global Economic Prospects 2007 analyzes the opportunities - and stresses - this will create. While rich and poor countries alike stand to benefit, the integration process will make more acute stresses already apparent today - in income inequality, in labor markets, and in the environment. Over the next 25 years, rapid technological progress, burgeoning trade in goods and services, and integration of financial markets create the opportunity for faster long-term growth. However, some regions, notably Africa, are at risk of being left behind. The coming globalization will also see intensified stresses on the global commons. Addressing global warming, preserving marine fisheries, and containing infectious diseases will require effective multilateral collaboration to ensure that economic growth and poverty reduction proceed without causing irreparable harm to future generations.

The Invisible Constitution in Comparative Perspective Rosalind Dixon, Adrienne Stone, 2018-06-30 Constitutions worldwide inevitably have 'invisible' features: they have silences and lacunae, unwritten or conventional underpinnings, and social and political dimensions not apparent to certain observers. The Invisible

Constitution in Comparative Perspective helps us understand these dimensions to contemporary constitutions, and their role in the interpretation, legitimacy and stability of different constitutional systems. This volume provides a nuanced theoretical discussion of the idea of 'invisibility' in a constitutional context, and its relationship to more traditional understandings of written versus unwritten constitutionalism. Containing a rich array of case studies, including discussions of constitutional practice in Australia, Canada, China, Germany, Hong Kong, Israel, Italy, Indonesia, Ireland and Malaysia, this book will look at how this aspect of 'invisible constitutions' is manifested across different jurisdictions.
