**War Photographs Taken on the Battlefields of the Civil War** Mathew B. Brady,Alexander Gardner,2013-06-01 Fought over the course of four years, the Civil War pitted countrymen against countrymen, North versus South, friend against friend, and brother against brother. The photographs within these pages document the war that united America as one. These rare shots were taken in the middle of the battlefield during the earliest days of photography. Selected from a collection of seven thousand original negatives, these historic photos capture nearly every aspect of Civil War life. Among these photos are images of camps sprawling across acres, soldiers at their battlements, firing of heavy artillery, the aftermath of battle, and the terror that these young men faced. See first-hand of Union and Confederate officers strategizing their next moves, and Abraham Lincoln addressing his Union commanders. Originally released from the private collection of Edward Bailey Eaton in 1907, this edition is a must have for any Civil War buff or historian. No collection can be considered complete without these photographs by Matthew Brady and Alexander Gardner, as well as the meticulous passages that put the images in illuminating context.

**Socio-Life Science and the COVID-19 Outbreak** Makoto Yano,Fumihiko Matsuda,Anavaj Sakuntabhai,Shigeru Hirota,2022 This open access book presents the first step towards building socio-life science, a field of science investigating humans in such a way that both social and life-scientific factors are integrated. Because humans are both living and social creatures, a human action can never be understood fully without knowing both the biological traits of a person and the social scientific environments in which he exists. With this consideration, the editors of this book have initiated a research project promoting a deeper and more integrated understanding of human behavior and human health. This book aims to show what can, and could be, achieved through our interdisciplinary project. One important product is the newly formed three-party collaboration between Pasteur Institut, Kyoto University, and the Research Institute of Economy, Trade and Industry. Covering many different fields, including medicine, epidemiology, anthropology, economics, sociology, demography, geography, and policy, researchers in these institutes, and many others, present their studies on the COVID-19 pandemic. Although based on different methodologies, the studies show the importance of behavioral change and governmental policy in the fight against a huge pandemic. The book explains the unique genome cohort-panel data that the project builds to study social and life scientific aspects of humans.

**New Jersey Cemeteries and Tombstones** Richard Veit, Mark Nonestied, 2008-09-17 From the earliest memorials used by Native Americans to the elaborate structures of the present day, Richard Veit and Mark Nonestied use grave markers to take an off-beat look at New Jersey's history that is both fascinating and unique. New Jersey Cemeteries and Tombstones presents a culturally diverse account of New Jersey's historic burial places from High Point to Cape May and from the banks of the Delaware to the ocean-washed Shore, to explain what cemeteries tell us about people and the communities in which they lived. The evidence ranges from somber seventeenth-century decorations such as hourglasses and skulls that denoted the brevity of colonial life, to modern times where memorials, such as a life-size granite Mercedes Benz, reflect the materialism of the new millennium. Also considered are contemporary novelties such as pet cemeteries and what they reveal about today's culture. To tell their story the authors visited more than 1,000 burial grounds and interviewed numerous monument dealers and cemetarians. This richly illustrated book is essential reading for history buffs and indeed anyone who has ever wandered inquisitively through their local cemeteries.
