**Health and Wellbeing in Sexual Orientation and Gender Identity** Catherine Meads 2020 This is a collection of published papers from a variety of authors from around the world on the topic of the health and wellbeing of minority sexual orientation and gender identity populations. Some of the included papers focused on health inequality and inequity and some focussed on healthcare delivery. Many showed how health inequities in LGBT+ groups of people were found across a wide variety of political environments and health and wellbeing topics and frequently inadequate healthcare delivery. The increasing interest in research in this area, which has been neglected in the past, shows its growing importance.

**Global Marketing (First Edition)** Johny Johansson 2016-01-27 *The New Global Marketing: Local Adaptation for Sustainability and Profit* discusses the ways that marketing managers can assess the potential for global expansion and help their firms capitalize on opportunities. The book explores which companies and products should expand internationally, what countries offer the best opportunities, and which marketing plan will lead each product or company to success. The material adapts well-established frameworks to demonstrate how the global marketer can assess company strengths and weaknesses and analyze opportunities and risks in foreign markets. It

discusses the proper balance between standardization and localization, and addresses the importance of the "triple" bottom line - environmental sustainability, social fairness, and financial performance. Students also learn about bottom-of-the-pyramid markets, the role of digital global marketing, and the importance of adapting to international political, social, and environmental pressures. Featuring more than twenty original case studies, *The New Global Marketing* is an excellent introduction to what it really takes to succeed as a global marketer. Written for students with some marketing education and exposure to international business, the book is ideally suited to upper-level business courses and M.B.A. programs.

**Seedling Ecology and Evolution** Mary Alessio Leck 2008-09-18 Seedlings are highly sensitive to their environment. After seeds, they typically suffer the highest mortality of any life history stage. This book provides a comprehensive exploration of the seedling stage of the plant life cycle. It considers the importance of seedlings in plant communities; environmental factors with special impact on seedlings; the morphological and physiological diversity of seedlings including mycorrhizae; the relationship of the seedling with other life stages; seedling evolution; and seedlings in human altered ecosystems, including deserts, tropical rainforests, and habitat restoration projects. The diversity of seedlings is portrayed by

including specialised groups like orchids, bromeliads, and parasitic and carnivorous plants. Discussions of physiology, morphology, evolution and ecology are brought together to focus on how and why seedlings are successful. This important text sets the stage for future research and is valuable to graduate students and researchers in plant ecology, botany, agriculture and conservation.

Growing Up Tobacco Free Institute of Medicine 1994-02-01 Tobacco use kills more people than any other addiction and we know that addiction starts in childhood and youth. We all agree that youths should not smoke, but how can this be accomplished? What prevention messages will they find compelling? What effect does tobacco advertising have on youths? Can we responsibly and effectively restrict their access to tobacco products? These questions and more are addressed in *Growing Up Tobacco Free*, prepared by the Institute of Medicine to help everyone understand the troubling issues surrounding youths and tobacco use. *Growing Up Tobacco Free* provides a readable explanation of nicotine's effects and the process of addiction, and documents the search for an effective approach to preventing the use of cigarettes, chewing and spitting tobacco, and snuff by children and youths. It covers the results of recent initiatives to limit young people's access to tobacco and discusses approaches to controls or bans on tobacco sales, price sensitivity among adolescents, and arguments for and against taxation as a prevention strategy for tobacco use. The controversial area of tobacco advertising is thoroughly examined. With clear guidelines for public action, everyone can benefit by reading and acting on the messages in this comprehensive and compelling book.

**Computer-aided Ear-training** Susanna Király 2016-07-14 My doctoral thesis has involved two related tasks. The first was to analyse Zoltán Kodály's philosophy of music education and, on this basis, to develop a computer-assisted instruction method (CAI) for teaching music theory and solfège (ear-training). The second task was to experiment with the effectiveness of this method and compare it with traditional approaches to teaching. Many students find music theory and ear training difficult. During the 1990s, in connection with my licentiate thesis "Solfège in the Computer Classroom" (2000), I initiated this research project, and developed a CAI method for teaching music theory and solfège. I wanted to see just how useful Kodály's approach could be in computer-aided teaching and learning. The results show that the Kodály approach can be successfully applied to the development of a computer-aided solfège programme and the Kodály system is applicable to new learning environments and teaching practices. In music education CAI is an area with great potential for development. It offers multiple learning options and can enhance students' motivation to study music theory and ear-training; some of the learning outcomes were even better than with the traditional ways of learning. The results also show, however, that the teacher-pupil interaction is essential in a

computer-aided learning programme.

Global Food Trade and Consumer Demand for Quality Barry Krissoff 2013-03-14 Consumers have always been concerned about the quality, and particularly the safety, of the foods they eat. In

recent years this concern has taken on additional prominence. Consumer focus on food safety has been sharpened by reports about new risks, such as that posed by "mad cow" disease, and about more familiar sources of risk, such as food borne pathogens, pesticides, and hormones. At the same time, some consumers are increasingly interested in knowing more about how their food is produced and in selecting products based on production practices. Some of the questions consumers are asking include whether food is produced with the use of modern biotechnology, whether it is organically produced, how animals are treated in meat and egg production systems, and whether food is produced using traditional methods. Recent trends also show increased consumer demand for a variety of food products that are fresh, tasty, and available on a year-round basis. This has fostered increased global trade in food. For example, consumers in temperate climates such as North America are able to buy raspberries throughout the year, and Europeans can enjoy South American coffee. Trade in processed food products is actually increasing more rapidly than trade in agricultural commodities, further addressing the demand for variety among consumers.

**To Err Is Human** Institute of Medicine  
2000-03-01 Experts estimate that as many as 98,000 people die in any given year from medical errors that occur in hospitals. That's more than die from motor vehicle accidents, breast cancer, or AIDS—three causes that receive far more public attention. Indeed, more people die annually from medication errors than from workplace injuries. Add the financial cost to the human tragedy, and medical error easily rises to the top ranks of urgent, widespread public problems. *To Err Is Human* breaks the silence that has surrounded medical errors and their consequence—but not by pointing fingers at caring health care professionals who make honest mistakes. After all, to err is human. Instead, this book sets forth a national agenda—with state and local implications—for reducing medical errors and improving patient safety through the design of a safer health system. This volume reveals the often startling statistics of medical

error and the disparity between the incidence of error and public perception of it, given many patients' expectations that the medical profession always performs perfectly. A careful examination is made of how the surrounding forces of legislation, regulation, and market activity influence the quality of care provided by health care organizations and then looks at their handling of medical mistakes. Using a detailed case study, the book reviews the current understanding of why these mistakes happen. A key theme is that legitimate liability concerns discourage reporting of errors—which begs the question, "How can we learn from our mistakes?" Balancing regulatory versus market-based initiatives and public versus private efforts, the Institute of Medicine presents wide-ranging recommendations for improving patient safety, in the areas of leadership, improved data collection and analysis, and development of effective systems at the level of direct patient care. *To Err Is Human* asserts that the problem is not bad people in health care—it is that good people are working in bad systems that need to be made safer. Comprehensive and straightforward, this book offers a clear prescription for raising the level of patient safety in American health care. It also explains how patients themselves can influence the quality of care that they receive once they check into the hospital. This book will be vitally important to federal, state, and local health policy makers and regulators, health professional licensing officials, hospital administrators, medical educators and students, health caregivers, health journalists, patient advocates—as well as patients themselves. First in a series of publications from the Quality of Health Care in America, a project initiated by the Institute of Medicine

**Extending and Embedding Python** Guido van Rossum 2018-02-03 Extending and Embedding Python describes how to write modules in C or C++ to extend the Python interpreter with new modules. Those modules can not only define new functions but also new object types and their methods. The document also describes how to embed the Python interpreter in another application, for use as an extension language from

Finally, it shows how to compile and link extension modules so that they can be loaded dynamically (at run time) into the interpreter, if the underlying operating system supports this feature. ### **The Politics of Early Language Teaching**

Ágoston Berecz 2014-08-10 Disseminating knowledge of the state language to the non-Magyar half of the citizenry was a policy priority of the government of the Hungarian Kingdom between the 1870s and the First World War. Drawing on a wide array of sources, *The Politics of Early Language Teaching* provides an in-depth look at how Hungarian was taught to ethnic Romanian and German children in the south-eastern tracts of the Habsburg Empire. The monograph covers the ever-harshening legislation from the period, reconsidering the role of state supervision and exploring the contemporary methodological debates as well as taking a closer look at classroom practices. Not only does the book throw much light in comparative mode on one of Europe's great early experiments in linguistic engineering; but it provides many new insights into Dualist Hungary's competing national ideologies and the limits of their efficacy on the ground.

Scientific Criteria to Ensure Safe Food National Research Council 2003-08-29 Food safety regulators face a daunting task: crafting food safety performance standards and systems that continue in the tradition of using the best available science to protect the health of the American public, while working within an increasingly antiquated and fragmented regulatory framework. Current food safety standards have been set over a period of years and under diverse circumstances, based on a host of scientific, legal, and practical constraints. Scientific Criteria to Ensure Safe Food lays the groundwork for creating new regulations that are consistent, reliable, and ensure the best protection for the health of American consumers. This book addresses the biggest concerns in food safety—including microbial disease surveillance plans, tools for establishing food safety criteria, and issues specific to meat, dairy, poultry, seafood, and produce. It provides a candid analysis of the problems with the current system, and outlines the major components of the task at hand: creating workable, streamlined food safety standards and practices.

**Ethnic Policy in China** James Leibold 2013

Following significant interethnic violence beginning in 2008, Chinese intellectuals and policymakers are now engaged in unprecedented debate over the future direction of their country's ethnic policies. This study attempts to gauge current Chinese opinion on this once-secretive and still highly sensitive area of national policy.

Domestic Chinese opinion on ethnic policies over the last five years is reviewed and implications for future policies under the new leadership of CPC Secretary General Xi Jinping are explored. Careful review of a wide spectrum of contemporary Chinese commentary identifies an emerging consensus for ethnic-policy reform. Leading public intellectuals, as well as some party officials, now openly call for new measures strengthening national integration at the expense of minority rights and autonomy. These reformers argue that divisive ethnic policies adopted from the former USSR must be replaced by those supporting an ethnic "melting pot" concept. Despite this important shift in opinion, such radical policy changes as ending regional ethnic autonomy or minority preferences are unlikely over the short-to-medium term. Small-yet-significant adjustments in rhetoric and policy emphasis are, however, expected as the party-state attempts to strengthen interethnic cohesiveness as a part of its larger agenda of stability maintenance. About the author James Leibold is a senior lecturer in Politics and Asian Studies at La Trobe University in Melbourne, Australia. He is the author of *Reconfiguring Chinese Nationalism* (2007) and co-editor of *Critical Han Studies* (2012) and *Minority Education in China* (forthcoming). His research on ethnicity, nationalism, and race in modern China has appeared in *The China Journal*, *The China Quarterly*, *The Journal of Asian Studies*, *Modern China*, and other publications.
