The Senate Intelligence Committee Report on Torture (Academic Edition) Senate Select Committee On Intelligence,2020-02-18 The study edition of book the Los Angeles Times called, The most extensive review of U.S. intelligence-gathering tactics in generations. This is the complete Executive Summary of the Senate Intelligence Committee's investigation into the CIA's interrogation and detention programs -- a.k.a., The Torture Report. Based on over six million pages of secret CIA documents, the report details a covert program of secret prisons, prisoner deaths, interrogation practices, and cooperation with other foreign and domestic agencies, as well as the CIA's efforts to hide the details of the program from the White House, the Department of Justice, the Congress, and the American people. Over five years in the making, it is presented here exactly as redacted and released by the United States government on December 9, 2014, with an introduction by Daniel J. Jones, who led the Senate investigation. This special edition includes: • Large, easy-to-read format. • Almost 3,000 notes formatted as footnotes, exactly as they appeared in the original report. This allows readers to see obscured or clarifying details as they read the main text. • An introduction by Senate staffer Daniel J. Jones who led the investigation and wrote the report for the Senate Intelligence Committee, and a forward by the head of that committee, Senator Dianne Feinstein.

The Desert World Arthur Mangin,2022-08-10 The Desert World by Arthur Mangin is a scholarly tome on deserts throughout the world. It encompasses knowledge of deserts on literally all continents. Excerpt: The traveller, ascending the famous river which has so long been mixed up with an apparently insoluble geographical problem, sees the Desert everywhere present; its yellow boundary-line is vividly traced against the rich emerald-green of the fertile valley, and, as he advances, that line seems to draw nearer and nearer, until the cultivated soil appears reduced to a narrow strip on the river-bank. It has encroached upon many once prosperous and busy sites, and buried deeply the memorials of the old Egyptian civilization.

The Environmental Behaviour of Polonium International Atomic Energy Agency,2018-01-31 Polonium-210 is an alpha emitting radionuclide with no radioactive progeny and produces only very-low-intensity gamma rays at very low abundance. This means doses largely arise from internal exposure. In addition to the relatively high ingestion does coefficient of ²¹⁰Po, radionuclide transfer in the environment results in high activity concentrations in certain foods. This publication focuses on radionuclide transfers in terrestrial, freshwater and marine environments, and provides information on key

transfer processes, concepts and models--back cover.

Nuclear War Raymond G. Wilson, 2014 *Nuclear War: Hiroshima, Nagasaki, and A Workable Moral Strategy for Achieving and Preserving World Peace* Raymond G. Wilson The real truth of the matter is, as you and I know, that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson. □Franklin D. Roosevelt There is considerable reason to believe President Roosevelt's statement is quite true, thus the financial element in the large centers shares responsibility and blame for the tens, if not hundreds, of thousands of war deaths in the last two decades. The people of the world need protection from those responsible for provoking nations to war. In the United States this responsibility lies with all elements in the highest levels of government, the decision makers. It lies with those who tinker with political and economic machinations, most likely for the advantage of a financial element in the large centers. These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world. This group of people may include most people serving in the U.S. Congress and from personal experience many in the U.S. Military. I have my doubts whether Presidents have seen all of the results of the world's first nuclear war; they are probably shielded from this. Photographs of the victims were confiscated and held confidential for more than 22 years after 1945. There were well more than 210,000 victims; not many photographs were made and survived. You can learn from this book a tiny fraction of the truth about what happens to people caught in nuclear war. (Although the truth from more than 210,000 will never be heard.) In a future war there would be hundreds of thousands, more likely hundreds of millions, of victims. The United States government has not revealed this kind of truth about its first nuclear war. As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki. In Chapter 5 a solution is suggested to save us all from our nuclear madness. I hate war as only a soldier who has lived it can, only as one who has seen its brutality, its futility, its stupidity. --Dwight D. Eisenhower, ...we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages. We have the ability to cultivate self-control and consideration for others and to strive to live together in a humane and harmonious manner with others. The revival of such true humanity--not only between individuals, but also between nations--is an absolute necessity today, for the age has come when one nation's self-centered behavior could lead all humanity to annihilation. --Naomi Shohno, 1986 America can do whatever we set our mind to. —Barack Obama

Geospatial Technologies and Homeland Security Daniel Sui, 2008-05-25 Homeland security and context In the Geographical Dimensions of Terrorism (GDOT) (Cutter et al. 2003), the first book after 9/11 to address homeland security and geography, we developed several thematic research agendas and explored intersections between geographic research and the importance of context, both geographical and political, in relationship to the concepts of terrorism and security. It is good to see that a great deal of new thought and research continues to flow from that initial research agenda, as illustrated by many of the papers of this new book, entitled *Geospatial Technologies and Homeland Security: Research Frontiers and Future Challenges*. Context is relevant not only to understanding homeland security issues broadly, but also to the conduct of research on geospatial technologies. It is impossible to understand the implications of a homeland security strategy, let alone hope to make predictions, conduct meaningful modeling and research, or assess the value and dangers of geospatial technologies, without consideration of overarching political, social, economic, and geographic contexts within which these questions are posed.

Ethics in Fiscal Administration Angela Pool-Funai, 2018-05-11 *Ethics in Fiscal Administration: An Introduction* integrates ethics into the public administration curriculum by weaving ethical dilemmas into the financial management and budgeting process of the public and nonprofit sectors. Inquiry-based discussion prompts challenge students to examine scenarios that they are likely to encounter in professional public service careers. Critics of the public sector often use the analogy that government should be run more like a business. Issues such as profitability versus social value

preclude the public sector from becoming a mirror image of the private sector; however, ethical decision making in fiscal administration is an important concern across sectors. Using examples drawn from the public and nonprofit arenas, *Ethics in Fiscal Administration: An Introduction* will help prepare future budget managers and other public administrators for the important work of upholding the public financial trust.

Pocket Oncology Alexander Drilon, Michael Postow, Lee Krug, 2014-04-09 *Pocket Oncology*, developed and edited by oncologists at Memorial Sloan-Kettering Cancer Center, is a simple, yet comprehensive, review of basic principles of cancer management. Prepared in the style and format of books in the popular Pocket Notebook series, *Pocket Oncology* is intended as a quick reference presented in easy to read bulleted text, and using diagrams and charts where appropriate. Each oncologic disease is presented on two facing pages that review initial clinical presentation, pathophysiology, staging, current standard of care treatments, and active areas of current research. Edited by Alexander Drilon and Michael Postow, the content of the book has been written by medical oncology fellows and each disease entity has been authoritatively reviewed by an oncologist with specific expertise in each subspecialty of oncology. Features: • simple, comprehensive, review of basic principles of oncology in easy to read bulleted text, using diagrams and charts where appropriate. • its small size makes it easy to carry the pocket of a lab coat for quick reference to information while in the hospital or oncology clinic. • perfect for medical students, residents, fellows, physician assistants, and nurses who perform daily oncologic care.

Climate Information for Public Health Action Madeleine C. Thomson, Simon J. Mason, 2018-09-21 Policy-makers are increasingly concerned about the impact of climate variability and change on the health of vulnerable populations. Variations and trends in climatic factors and extreme weather events impact many health outcomes, including malaria, heat stress and undernutrition. *Climate Information for Public Health Action* is based on the premise that climate knowledge and information can help protect the public from climate-sensitive health risks. With a focus on infectious disease, hydro-meteorological disasters and nutrition, the book explores why, when and how data on the historical, current and future (from days to decades) climate can be incorporated into health decision-making. Created as a collaborative effort between climate and health experts, this book targets a broad technical public health community, alongside development practitioners and policy-makers engaged in climate change adaptation. It may also guide climate experts in the development of climate services tailored to health needs. Written in an accessible, informative style, while maintaining the highest technical and scientific standards, it will also be a valuable resource for students and academics studying and working in the emerging field of environment and health. The Open Access version of this book, available at <http://www.tandfebooks.com/doi/view/10.4324/9781315115603>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

CALL and complexity - short papers from EUROCALL 2019 Fanny Meunier, Julie Van de Vyver, Linda Bradley, Sylvie Thouësny, 2019-12-09 The theme selected for the 2019 EuroCALL conference held in Louvain-la-Neuve was 'CALL and complexity'. As languages are known to be intrinsically and linguistically complex, as are the many determinants of learning (additional) languages, complexity is viewed as a challenge to be embraced collectively. The 2019 conference allowed us to pay tribute to providers of CALL solutions and to recognize the complexity of their task. We hope you will enjoy reading this volume as it offers a rich glimpse into the numerous debates that took place during EuroCALL 2019. We look forward to continuing those debates and discussions with you at the next EuroCALL conferences!

Mills' Atlas Robert Mills, 1980 This reprint edition of MILLS' ATLAS has an especially prepared history and introduction to these maps as well as considerable history about Robert Mills, the man and architect, prepared by Mr. Gene Waddell, formerly Director of the South Carolina Historical Society, Charleston. These maps, originally 23 29 in size, have been conveniently reduced in size to 11 17 and folded to fit into an exquisitely gold-stamped simulated leather cover for book shelf or coffee table. The Districts for which maps are included are: Abbeville, Barnwell, Beaufort, Charleston,

Chesterfield, Chester, Colleton, Darlington, Edgefield, Fairfield, Greenville, Georgetown, Horry, Kershaw, Lancaster, Laurens, Lexington, Marion, Marlborough, Newberry, Orangeburg, Pendleton, Richland, Spartanburg, Sumter, Union, Williamsburg and York.

Introduction to Databases Peter Revesz, 2010-01-11 Introduced forty years ago, relational databases proved unusually successful and durable. However, relational database systems were not designed for modern applications and computers. As a result, specialized database systems now proliferate trying to capture various pieces of the database market. Database research is pulled into different directions, and specialized database conferences are created. Yet the current chaos in databases is likely only temporary because every technology, including databases, becomes standardized over time. The history of databases shows periods of chaos followed by periods of dominant technologies. For example, in the early days of computing, users stored their data in text files in any format and organization they wanted. These early days were followed by information retrieval systems, which required some structure for text documents, such as a title, authors, and a publisher. The information retrieval systems were followed by database systems, which added even more structure to the data and made querying easier. In the late 1990s, the emergence of the Internet brought a period of relative chaos and interest in unstructured and "semistructured data" as it was envisioned that every web page would be like a page in a book. However, with the growing maturity of the Internet, the interest in structured data was regained because the most popular websites are, in fact, based on databases. The question is not whether future data stores need structure but what structure they need.

Deliberate Force - a Case Study in Effective Air Campaigning Robert Owen, 2012-08 Every airman or person interested in the art and science of air and space warfare should read this book. True to the direction of Gen James Jamerson, former deputy commander in chief of US European Command, and the author, the Air University Balkans Air Campaign Study (BACS) has emerged as a balanced and wide-ranging discussion of the Deliberate Force air campaign, which occurred during the fall of 1995. Exploiting the sources and resources available to them, the BACS team members have laid out a mile-wide and foot-deep exploration of the context, theoretical foundations, planning, execution, leadership, and effects of this milestone event. In so doing, they have contributed significantly to our knowledge about the political, military, technical, and human elements that shape air campaigns and influence their outcomes. Moreover, the BACS offers insights into persistent questions of military planners, such as the relationship of diplomacy and war; the synergy of land power, space power, and airpower; and the role of chance and fog in the conduct and outcome of air and space warfare. Finally, because the BACS team from the start wrote this report for immediate declassification, virtually the entire report and all of its substantive elements are available here as an open source, only four years after the event. Given its scope, this book should contain material of interest to all aerospace-warfare practitioners and/or thinkers, regardless of their area of expertise.

Place-based Planning, 2008 Place-based planning is an emergent method of public lands planning that aims to redefine the scale at which planning occurs, using place meanings and place values to guide planning processes. Despite the approach's growing popularity, there exist few published accounts of place-based approaches. To provide practitioners and researchers with such examples, the current compilation outlines the historical background, planning rationale, and public involvement processes from four National Forest System areas: The Beaverhead-Deerlodge National Forest in Montana; the Willamette National Forest in Oregon; the Chugach National Forest in Alaska; and the Grand Mesa, Uncompahgre, and Gunnison National Forests in Colorado. These examples include assessments of the successes and challenges encountered in each approach.
