Drivers of Integration and Regionalism in Europe and Asia Louis Brennan,Philomena Murray,2015-05-22 This book examines the drivers of regionalism and integration in both Europe and Asia and seeks to forge comparative perspectives between the two regions. Comprising contributions from scholars, analysts and policymakers, this volume explores and debates how and why regional bodies such as the European Union (EU) and the Association of Southeast Asian Nations (ASEAN) are formed and sustained. Furthermore, it examines the drivers of, and impediments to, regionalism and integration. The debates regarding what and who constitute drivers are presented in a fresh, thematic and comprehensive manner. Leadership and core states are also critically examined, whilst material, ideational and normative factors are all assessed comparatively. Significantly, in light of the global financial crisis, the book considers the role of crisis as a driver of regionalism and integration. This book will be of interest to students, scholars and policymakers interested in Asian and European politics and comparative politics.

Placebodefekten Gunnar R. Tjomlid,2013-09-30 Det virker for meg! Denne frasen hører vi til stadighet, både fra venner, i diskusjonsforum på Internett og i reklamer. Men hvorfor opplever folk at det virker for dem når vitenskapelig forskning viser at det ofte slettes ikke virker? Placebodefekten går i dybden på menneskelig psykologi og vitenskapelig forskning for å forklare hvor lett vi mennesker lurer oss selv. En bok fylt med aktuelle anekdoter, fra George W. Bush sine feilaktige minner om 9/11, til tidligere helseminister Bjarne Håkon Hanssens påstand om at Snåsamannen helbredet hans sønn og forfatterens egen eksperimentering for å avsløre sin laktoseintoleranse. I denne boken vil du lære både hvorfor naturlig ikke alltid er sunt, hvorfor alternativ medisin kan være skadelig, og hva placeboeffekten er - og ikke er. Vi får lese om falske diagnoser, vaksinemotstand, hvor lite populær Østens medisin er i Østen, og om hvordan stress og mestring påvirker din helse. Boken gir deg en enkel innføring i vitenskapelig metode, og går grundig gjennom de kjente alternative behandlingsformene akupunktur, homeopati og kiropraktikk. Gjennom spennende historier og enkle forklaringer utstyres leseren med en verktøykasse for kritisk tenking. Neste gang du hører om en tante som ble helbredet fra kreft ved hjelp av krystallterapi, vil du vite hvilke kritiske spørsmål du skal stille før

du tar historien for god fisk. Enkelt språk og en rik referanseliste gjør at denne boken appellerer både til menigmann og fagpersoner. Gunnar Roland Tjomlid (f. 1974, Dar es Salaam, Tanzania) er en av Norges fremste bloggere med sin blogg Saksynt på tjomlid.com. Foruten fire år hvor han bodde i Tanzania og Kenya, er han oppvokst på Tonstad i Sirdal kommune. I dag bor han i Oslo og jobber som daglig leder og webutvikler i IT-selskapet Thin AS. Ved siden av jobb og blogg holder han foredrag om kritisk tenkning og er en aktiv samfunnsdebattant.

Kenya International Monetary Fund. African Dept., 2024-01-17 The Kenyan economy remains resilient amid a confluence of global, regional, environmental, and domestic political risks. These factors, including costly and uncertain international bond market access for frontier market economies in an environment of “higher for longer” global interest rates, are adding to Kenya’s balance of payments and fiscal financing needs despite policy efforts to sustain domestic and external balances. The authorities’ EFF/ECF-supported program, approved in April 2021 and extended by 10 months in July 2023 to April 2025, continues to evolve to address the emerging challenges, including to restore market confidence while incorporating additional policy actions to reduce debt vulnerabilities, a key objective of the program. The program also endeavors to bolster Kenya’s medium-term prospects by enhancing fiscal risk management, strengthening external buffers, and improving the governance framework.

Commodifying Education Roberto Leher, Inny Accioly, 2016-11-25 The texts in this book do not compose a mere selection: the questions that guide the chapters form a cohesively and coherently structured totality which expresses the movement of construction of what the authors understand to be a new problematic in the education field in Brazil and in the world. The book addresses basic, professional and undergraduate education from perspectives that highlight different aspects of privatization, commercialization and commodification, as well as the presence of the business community in the definition of educational policies. These levels and modalities of teaching are analysed in articulation both with science, technology and so-called technological innovation policies and with the *modus operandi* of the state. “This is a book that should be read by teachers, administrators and all global citizens who have a stake in the

future of the planet. Unlike many books by authors from the United States who attack poverty and economic inequality without critiquing capitalism, this book has the courage to challenge capitalism at its very roots. Capitalism connects us all and it will require all of us to dismantle capitalism and replace it with a socialist alternative. Commodifying Education reveals how education in Brazil is inextricably entangled in the logic and practice of economic fascism, which goes under many names, such as austerity capitalism and neoliberal capitalism. I urge educators everywhere to engage the lucid arguments presented in this important work.” – Peter McLaren, Distinguished Professor in Critical Studies, Chapman University, and author of *Pedagogy of Insurrection*

The Last Best Cure Donna Jackson Nakazawa, 2013-02-21 One day Donna Jackson Nakazawa found herself lying on the floor to recover from climbing the stairs. That’s when it hit her. She was managing the symptoms of the autoimmune disorders that had plagued her for a decade, but she had lost her joy. As a science journalist, she was curious to know what mind-body strategies might help her. As a wife and mother she was determined to get her life back. Over the course of one year, Nakazawa researches and tests a variety of therapies including meditation, yoga, and acupuncture to find out what works. But the discovery of a little-known branch of research into Adverse Childhood Experiences causes her to have an epiphany about her illness that not only stuns her—it turns her life around. Perfect for readers of Gretchen Rubin’s *The Happiness Project*, Nakazawa shares her unexpected discoveries, amazing improvements, and shows readers how they too can find their own last best cure.

Improving Food Safety Through a One Health Approach Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2012-10-10 Globalization of the food supply has created conditions favorable for the emergence, reemergence, and spread of food-borne pathogens-compounding the challenge of anticipating, detecting, and effectively responding to food-borne threats to health. In the United States, food-borne agents affect 1 out of 6 individuals and cause approximately 48 million illnesses, 128,000 hospitalizations, and 3,000 deaths each year. This figure likely represents just the tip of the iceberg, because it fails to account for the broad array of food-borne illnesses or for their wide-ranging repercussions for consumers, government, and the food industry-both domestically and internationally. A One Health approach to food safety may hold the promise of harnessing and integrating the expertise and resources from across the spectrum of multiple health domains including the human and veterinary medical and plant pathology communities with those of the wildlife and aquatic health and ecology communities. The IOM's Forum on Microbial Threats hosted a public workshop on December 13 and 14, 2011 that examined issues critical to the protection of the nation's food supply. The workshop explored existing knowledge and unanswered questions on the nature and extent of food-borne threats to health. Participants discussed the globalization of the U.S. food supply and the burden of illness associated with foodborne threats to health; considered the spectrum of food-borne threats as well as illustrative case studies; reviewed existing research, policies, and practices to prevent and mitigate foodborne threats; and, identified opportunities to reduce future threats to the nation's food supply through the use of a One Health approach to food safety. **Improving Food Safety Through a One Health Approach: Workshop Summary** covers the events of the workshop and explains the recommendations for future related workshops.
