Soviet Science and Engineering in the Shadow of the Cold War Hiroshi Ichikawa,2018-09-27 The 1950s were a vital time in the history of science. In accordance with the intensification of the Cold War, many scientific talents were mobilized to several military-related research and development projects not only in the United States, but also in the Soviet Union. Contrary to the expectation of General Leslie Groves, a leader of the Manhattan Project, the Soviet Union succeeded in their nuclear weapon development in a very short time. And then, by the end of the decade, mankind reached the dawn of the Atomic Age proper with the beginning of the operation of the world's first civil nuclear power plant in Obninsk in 1954. The risky and costly developments of new weapons such as rockets, jet warplanes, and computers were achieved by the Soviet Union in a very short time after World War ? in spite of the heavy economic damage caused by the battles with German troops in Soviet territory. Why were such a great number of scientific talents mobilized to various Soviet Cold War research and development projects? What were the true natures, and real consequences of the rushed Cold War projects? How did Soviet scientists approach the nuclear age? Thanks to the study of formerly classified Soviet archives, a more nuanced view of Soviet society has become possible. To resolve the above-mentioned questions, Ichikawa analyses the complicated interactions among various factors, including the indigenous contradictions in the historical development of science in the Soviet Union; conflicts among the related interest groups; relationships with the political leadership and the military, the role of ideology and others.

Humanitarianism, empire and transnationalism, 1760-1995

Joy Damousi,Trevor Burnard,Alan Lester,2022-03-08 This is the

first book to examine the shifting relationship between humanitarianism and the expansion, consolidation and postcolonial transformation of the Anglophone world across three centuries, from the antislavery campaign of the late eighteenth century to the role of NGOs balancing humanitarianism and human rights in the late twentieth century. Contributors explore the trade-offs between humane concern and the altered context of colonial and postcolonial realpolitik. They also showcase an array of methodologies and sources with which to explore the relationship between humanitarianism and colonialism. These range from the biography of material objects to interviews as well as more conventional archival enquiry. They also include work with and for Indigenous people whose family histories have been defined in large part by 'humanitarian' interventions.

Bridging the Barrier Tami Amanda Jacoby, 2017-11-30 The construction of the barrier separating Israel from the West Bank has become the site of one of the most heated controversies the world over, the source of virulent propaganda, incitement and hatred. Tami A. Jacoby explores the incongruent narratives of Israelis and Palestinians with regards to Israel's security barrier and the policy of unilateral withdrawal. This insightful book offers a multidimensional approach that takes into consideration different sides of the barrier conflict as well as internal divisions. It also observes how the barrier affects the lives of individuals

and communities through the rapid profusion of events in the legal, political, social and military sphere.

Understanding Authority in Higher Education Dean O. Smith,2015-01-22 Within the complex environment of higher education, administrators and faculty members face daunting challenges in their unique domains of institutional governance. Many of the greatest challenges arise from basic misunderstandings of authority and its limitations by administrators and faculty members alike. These misunderstandings are the primary source of disruptive confusion, mistrust, and mismanagement. Consequently, an institution's governance would improve significantly if its personnel clearly understand the fundamental principles of authority. To bring about this improvement, *Understanding Authority in Higher Education* clarifies issues of authority in an academic setting. Throughout, it introduces basic concepts of higher-education administration and then examines the limits of authority in context. Pedagogically, the book strives continuously to ascertain whether authority is used properly from a legal perspective, emphasizing the influence of academic cultural norms on legal principles and vice versa. But, *Understanding Authority in Higher Education* goes further than law textbooks by using real and anecdotal case studies to examine aspects of

authority that don't appear in court proceedings— those that lie beyond the reach of the law. In these cases, the book explores the anthropology— the behavior and the culture—of authority in the academic environment.

The Gareloi Solution Donald E. Phillipson, 2016-03-17 It is 2032, and shockingly, the threat of a food shortage hangs over the United States. Crop yields are down, and if the trend continues, the country could be facing a disastrous reduction in food supplies. With this in mind, the president of the United States takes immediate action, creating a small team of scientists, diplomats, and military personnel, overseen by the vice president. This team's mission is to determine what is causing the crop failures and what might be done to prevent them. As they uncover secret information from an obscure French research project and strange trends observed in US labs, their worst fears are confirmed: crops are dwindling not just in the United States but worldwide due to odd weather patterns that might signal a shift in global climates. In order to stave off disaster, the team devises a bizarre and difficult plan relying on the use of Cold War relics. Now they're in a race against time: can they save the world's food supply, or is humanity about to experience a famine that affects the entire planet? In this science fiction novel, a specialized governmental scientific team works to develop and enact a plan designed to prevent a global food shortage that threatens humankind.

Wholly Different Nonie Darwish, 2017-02-21 Western countries are ignorant of true Islamic values, says Nonie Darwish. Darwish is an Egyptian-American, former-Muslim human rights activist who is frustrated with mainstream America's talk of tolerance and assimilation. In *Wholly Different*, Darwish sets non-

Muslims straight about tenets of Islam that are incompatible with free society. For the first time, Darwish tells the whole story of her personal break with Islam, starting with the brutal physical violence and rigid class system she witnessed and culminating with the spine-tingling visit she received from President Nasser after her father, fedayeen commander Mustafa Hayez, was assassinated by Israeli Defense Forces. She lays out the seventh-century values of Islam that religious extremists are so intent on protecting through global warfare—values that set Islam apart from the other Abrahamic religions.
