African Elephant Status Report 2002 J. J. Blanc, 2003 The African elephant is the largest living land mammal, and their potential impact on their habitats raises important management issues both for protected areas and unprotected land. This Status Report, derived from data contained in the African Elephant Database, is rich in data and information on numbers, distribution and current issues, and provides continent-wide information that is vital for conservation. It will help wildlife management authorities to harmonize their policy and management decisions across regions, as well as the continent, to reduce conflict and relax the pressure on habitats.

Handbook of Linguistic Annotation Nancy Ide, James Pustejovsky, 2017-06-16 This handbook offers a thorough treatment of the science of linguistic annotation. Leaders in the field guide the reader through the process of modeling, creating an annotation language, building a corpus and evaluating it for correctness. Essential reading for both computer scientists and linguistic researchers. Linguistic annotation is an increasingly important activity in the field of computational linguistics because of its critical role in the development of language models for natural language processing applications. Part one of this book covers all phases of the linguistic annotation process, from annotation scheme

design and choice of representation format through both the manual and automatic annotation process, evaluation, and iterative improvement of annotation accuracy. The second part of the book includes case studies of annotation projects across the spectrum of linguistic annotation types, including morpho-syntactic tagging, syntactic analyses, a range of semantic analyses (semantic roles, named entities, sentiment and opinion), time and event and spatial analyses, and discourse level analyses including discourse structure, co-reference, etc. Each case study addresses the various phases and processes discussed in the chapters of part one.

Handbook of Engineering Practice of Materials and Corrosion Jung-Chul (Thomas) Eun, 2020-09-04 This handbook is an in-depth guide to the practical aspects of materials and corrosion engineering in the energy and chemical industries. The book covers materials, corrosion, welding, heat treatment, coating, test and inspection, and mechanical design and integrity. A central focus is placed on industrial requirements, including codes, standards, regulations, and specifications that practicing material and corrosion engineers and technicians face in all roles and in all areas of responsibility. The comprehensive resource provides expert guidance on general corrosion mechanisms and recommends materials for the control and prevention of corrosion damage, and offers readers industry-tested best practices, rationales, and case studies.

Multiword expressions Manfred Sailer ,Stella Markantonatou , Multiword expressions (MWEs) are a challenge for both the natural language applications and the linguistic theory because they often defy the application of the machinery developed for free combinations where the default is that the meaning of an utterance can be predicted from its structure. There is a rich body of primarily descriptive work on MWEs for many European languages but comparative work is little. The volume brings together MWE experts to explore the benefits of a multilingual perspective on MWEs. The ten contributions in this volume look at MWEs in Bulgarian, English, French, German, Maori, Modern Greek, Romanian, Serbian, and Spanish. They discuss prominent issues in MWE research such as classification of MWEs, their formal grammatical modeling, and the description of individual MWE types from the point of view of different theoretical frameworks, such as Dependency Grammar, Generative Grammar, Head-driven Phrase Structure Grammar, Lexical Functional Grammar, Lexicon Grammar.

Transboundary Water Cooperation Patricia Wouters,Huiping Chen,James E.

Nickum,2018-10-15 China and its neighbours face a series of water security issues, in which international law plays a vital role. Paramount to both policymakers and researchers in the field of water law, the current status of transboundary water cooperation schemes and how these operate in China is of global significance. Grounded in international experience, this comprehensive volume provides readers with an up-to-date overview of current international transboundary water resource sharing policies and practices, including detailed case studies at both domestic and international levels. The authors discuss existing international laws, treaties, and principles that may stimulate transboundary water cooperation and dialogue, and then analyse a number of international experiences with treaties in North America, Eastern Europe, and Central Asia. They take stock of China's water resource issues, legal practices and options, examine case studies of China's southern shared rivers, and explore some innovative approaches to cooperative management of shared waters within China. The articles in this book were originally published in the journal Water International.

Bioremediation of Chlorinated Solvents Robert E. Hinchee, Andrea Leeson, Lewis

Semprini, 1995 Soil and groundwater contamination stemming from the release of various chlorinated compounds into the environment is a significant and difficult site remediation challenge. The articles in this collection discuss the use of aerobic and anaerobic biological degradation to dehalogenate sites contaminated with pesticides and chlorinated solvents such as trichloroethylene, tetrachloroethene, tetrachloromethene, perchloroethylene, carbon tetrachloride, pentachlorophenol, and chlorinated benzene. Bench- and field-scale studies of the biological processes associated with in situ dechlorination of soil and aquifers are described. Discussed are the uses of microcosm studies and numerical simulation of dechlorination to manage system operation. Site characteristics (e.g., hydraulic properties, temperature, nitrogen availability) and their effect on the stability of the methanotrophic community are examined. Methods discussed include the use of air venting, alternative

electron donors, biofilm reactors, surfactants, municipal digester sludge, iron enhancement, and sulfate reduction to improve conditions for the microbial consortia that effect dechlorination.

Divine Names Rosina-Fawzia al-Rawi,2022-11-22 The path to self-discovery and inner and outer peace... Divine Names is a unique contribution to understanding life and oneself on a deeper level: by learning to open to the Divine. It draws on original Arabic literature—often not available in European languages—and on the author's many years of personal practice, teaching, and guiding others on their spiritual paths to healing, to

becoming whole. It focuses on the use of the Divine Names in dhikr, individual meditations and healing practices. Whether we admit it or not, human beings are searchers: we want to understand; we want to know; we want to be known. Our quest may take many forms, yet ultimately it ends in nothing but pure praising of the Divine, even if this comes after our last breath. The outside always furthers the inside because the task and the meaning of life is always about reuniting—about connecting everything on the outside to its inner truth. It is the knowledge of the heart which is always capable of uniting. Such is the path of the Sufis. The Sufi tradition centers on the opening of the heart and nothing touches the heart as much as beauty. In this book, the author's unique style of writing, which combines clarity and poetic inspiration, is coupled with distinctive and ornamental Arabic calligraphy of each of the 99 Divine Names to make it a visually stunning tribute to this tradition. It will be enjoyed regardless of a person's religious beliefs.
