The Digital Transformation of Logistics Mac Sullivan,Johannes Kern,2021-04-06 The digital transformation is in full swing and fundamentally changes how we live, work, and communicate with each other. From retail to finance, many industries see an inflow of new technologies, disruption through innovative platform business models, and employees struggling to cope with the significant shifts occurring. This Fourth Industrial Revolution is predicted to also transform Logistics and Supply Chain Management, with delivery systems becoming automated, smart networks created everywhere, and data being collected and analyzed universally. The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution provides a holistic overview of this vital subject clouded by buzz, hype, and misinformation. The book is divided into three themed-sections: Technologies such as self-driving cars or virtual reality are not only electrifying science fiction lovers anymore, but are also increasingly presented as cure-all remedies to supply chain challenges. In *The Digital Transformation of Logistics: Demystifying Impacts of the Fourth Industrial Revolution*, the authors peel back the layers of excitement that have grown around new technologies such as the Internet of Things (IoT), 3D printing, Robotic Process Automation (RPA), Blockchain or Cloud computing, and show use cases that give a glimpse about the fascinating future we can expect. Platforms that allow businesses to centrally acquire and manage their logistics services disrupt an industry that has been relationship-based for centuries. The authors discuss smart contracts, which are one of the most exciting applications of Blockchain, Software as a Service (SaaS) offerings for freight procurement, where numerous data sources can be integrated and decision-making processes automated, and marine terminal operating systems as an integral node for shipments. In *The*

IBM Power Systems SR-IOV: Technical Overview and Introduction Scott Vetter, Shivaji D Bhosale, Alexandre Bicas Caldeira, Bartłomiej Grabowski, Chuck Graham, Alexander D Hames, Volker Haug, Marc-Eric Kahle, Cesar Diniz Maciel, Manjunath N Mangalur, Monica Sanchez, IBM Redbooks, 2017-01-12 This IBM® Redpaper™ publication describes the adapter-based virtualization capabilities that are being deployed in high-end IBM POWER7+™ processor-based servers. Peripheral Component Interconnect Express (PCIe) single root I/O virtualization (SR-IOV) is a virtualization technology on IBM Power Systems servers. SR-IOV allows multiple logical partitions (LPARs) to share a PCIe adapter with little or no run time involvement of a hypervisor or other virtualization intermediary. SR-IOV does not replace the existing virtualization capabilities that are offered as part of the IBM PowerVM® offerings. Rather, SR-IOV compliments them with additional capabilities. This paper describes many aspects of the SR-IOV technology, including: A comparison of SR-IOV with standard virtualization technology Overall benefits of SR-IOV Architectural overview of SR-IOV Planning requirements SR-IOV deployment models that use standard I/O virtualization Configuring the adapter for dedicated or shared modes Tips for maintaining and troubleshooting your system Scenarios for configuring your system This paper is directed to clients, IBM Business Partners, and system administrators who are involved with planning, deploying, configuring, and maintaining key virtualization technologies.

Living together in multi-ethnic neighbourhoods Karin Peters, 2023-09-04 In Western societies, such as the Netherlands, people with different ethnic backgrounds live together in urban areas. This book examines daily life in multi-ethnic neighbourhoods and the meaning of public spaces for social integration.

Through observations and interviews in two Dutch cities (Nijmegen and Utrecht) insight is gained into the use and perception of public spaces. Positive experiences in public spaces contribute to feeling at home in a multi-ethnic neighbourhood. Not only intense and lasting contacts, but also fleeting interactions contribute to feeling at home. Experience with diversity contributes to a realistic view of multiculturalism, a view that is based on everyday experiences, with all its positive and negative implications. This, however, does not mean that residents do not use stereotypes or categorizations. However, there is a major difference between the public discourse - which focuses on differences and problems - and everyday encounters, which are perceived as a way to experience and enjoy diversity. Recommendations are that politicians should look at the everyday realities in multi-ethnic neighbourhoods when discussing issues related to multi-ethnic societies. Repeatedly stressing the dichotomy between native and non-native Dutch citizens and focusing on problems, has a negative effect on the everyday lives of people because it produces and reproduces stereotyped images. Integration is not only about non-native Dutch residents adapting themselves to Dutch society: it is also about the extent to which people from various backgrounds live together and feel at home in their neighbourhood.
