Behind the Screen Sarah T. Roberts, 2019-06-25 An eye-opening look at the invisible workers who protect us from seeing humanity's worst on today's commercial internet. Social media on the internet can be a nightmarish place. A primary shield against hateful language, violent videos, and online cruelty uploaded by users is not an algorithm. It is people. Mostly invisible by design, more than 100,000 commercial content moderators evaluate posts on mainstream social media platforms: enforcing internal policies, training artificial intelligence systems, and actively screening and removing offensive material—sometimes thousands of items per day. Sarah T. Roberts, an award-winning social media scholar, offers the first extensive ethnographic study of the commercial content moderation industry. Based on interviews with workers from Silicon Valley to the Philippines, at boutique firms and at major social media companies, she contextualizes this hidden industry and examines the emotional toll it takes on its workers. This revealing investigation of the people “behind the screen” offers insights into not only the reality of our commercial internet but the future of globalized labor in the digital age.

Processor and System-on-Chip Simulation Rainer Leupers, Olivier Temam, 2010-09-15 Simulation of computer architectures has made rapid progress recently. The primary application areas are hardware/software performance estimation and optimization as well as functional and timing verification. Recent, innovative technologies such as retargetable simulator generation, dynamic binary translation, or sampling simulation have enabled widespread use of processor and system-on-chip (SoC) simulation tools in the semiconductor and embedded system industries. Simultaneously, processor and SoC simulation is still a very active research area, e.g. what amounts to higher simulation speed, flexibility, and accuracy/speed trade-offs. This book presents and discusses the principle technologies and state-of-the-art in high-level hardware architecture simulation, both at the processor and the system-on-chip level.

Irrationality Stuart Sutherland, 2007 Why do qualified professionals make wrong decisions that cause enormous harm to others? And why do you sit through a boring play just because the tickets were expensive? Drawing on a mass of intriguing research, Stuart Sutherland analyses the causes of irrationality, demonstrating that the trait is present in all of us.

The Scholar as Human Anna Sims Bartel, Debra A. Castillo, 2021-01-15 The Scholar as Human brings together faculty from a wide range of disciplines—history; art; Africana, American, and Latinx studies; literature, law, performance and media arts, development sociology, anthropology, and Science and Technology Studies—to focus on how scholarship is informed, enlivened, deepened, and made more meaningful by each scholar's sense of identity, purpose, and place in the world. Designed to help model new paths for publicly-engaged humanities, the contributions to this groundbreaking volume are guided by one overarching question: How can scholars practice a more human scholarship? Recognizing that colleges and universities must be more responsive to the needs of both their students and surrounding communities, the essays in The Scholar as Human carve out new space for public scholars and practitioners whose rigor and passion are equally important forces in their work. Challenging the approach to research and teaching of earlier generations that valorized disinterestedness, each contributor here demonstrates how they have energized their own scholarship and its reception among their students and in the wider world through a deeper engagement with their own life stories and humanity. Contributors: Anna Sims Bartel, Debra A. Castillo, Ella Diaz, Carolina Osorio Gil, Christine Henseler, Caitlin Kane, Shawn McDaniel, A. T. Miller, Scott J. Peters, Bobby J. Smith II, José Ragas, Riché Richardson, Gerald Torres, Matthew Velasco, Sara Warner Thanks to generous funding from Cornell University, the ebook editions of this book are available as Open Access volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other repositories.

The Why of the Buy Patricia Mink Rath, Stefani Bay, Penny Gill, Richard Petrizzi, 2014-10-27 How do consumers decide what to buy for their wardrobes and their homes? What drives them to choose one brand over another? This current textbook tells all about how consumer behavior theory and practice is applied in the fashion industry. The second edition of Why of the Buy: Consumer Behavior and Fashion Marketing updates its presentation of how psychology, sociology, and culture influences consumers' fashion purchase decisions—and ultimately impacts the success of global fashion enterprises. The unifying element of this text is its presentation of current knowledge of consumer behavior applied to the fields of fashion and design in an enthusiastic and relevant way that will attract and engage students. New to this Edition ~ New Chapter 11, Social Media and the Fashion Consumer, explores how the relationship between marketers, retailers, and consumers is aided by social media and the internet ~ Added discussion of Omnichannel retailing in Chapter 13 ~ Expanded and updated coverage of technology, ethics, and social responsibility ~ What Do I Need to Know About ...? list the objectives of each chapter and provide a roadmap for study ~ More than 20% new photos all in full color Chapter Features ~ Let's Talk features throughout each chapter encourage students to relate the topic to their experiences and observations ~ Case in Point and Point of View box features in each chapter offer real life case studies or current viewpoints on relevant consumer behavior and marketing topics ~ Chapter mini-projects offer an opportunity to apply chapter concepts to realistic fashion settings ~ Summaries, Key Terms, Questions for Review and Activities

The SuperCollider Book Scott Wilson, David Cottle, Nick Collins, 2011-04-15 The essential reference to SuperCollider, a powerful, flexible, open-source, cross-platform

audio programming language. SuperCollider is one of the most important domain-specific audio programming languages, with potential applications that include real-time interaction, installations, electroacoustic pieces, generative music, and audiovisuals. The SuperCollider Book is the essential reference to this powerful and flexible language, offering students and professionals a collection of tutorials, essays, and projects. With contributions from top academics, artists, and technologists that cover topics at levels from the introductory to the specialized, it will be a valuable sourcebook both for beginners and for advanced users. SuperCollider, first developed by James McCartney, is an accessible blend of Smalltalk, C, and further ideas from a number of programming languages. Free, open-source, cross-platform, and with a diverse and supportive developer community, it is often the first programming language sound artists and computer musicians learn. The SuperCollider Book is the long-awaited guide to the design, syntax, and use of the SuperCollider language. The first chapters offer an introduction to the basics, including a friendly tutorial for absolute beginners, providing the reader with skills that can serve as a foundation for further learning. Later chapters cover more advanced topics and particular topics in computer music, including programming, sonification, spatialization, microsound, GUIs, machine listening, alternative tunings, and non-real-time synthesis; practical applications and philosophical insights from the composer's and artist's perspectives; and under the hood," developer's-eye views of SuperCollider's inner workings. A Web site accompanying the book offers code, links to the application itself and its source code, and a variety of third-party extras, extensions, libraries, and examples.

Steeped in Blood David Klatzow,2010-11-05 Bloody crimes of passion, political assassinations, sinister poisonings, investment fraud and mass mining disasters ... Dr David Klatzow has seen it all. During his extraordinary twenty-six-year career as South Africa's foremost independent forensic scientist, he has investigated countless high-profile and notorious cases. *Steeped in Blood* provides gripping accounts of dozens of these matters, including the infamous deaths of Brett Kebble and Inge Lotz, the Helderberg aeroplane crash and the frustrating investigations of the brutal apartheid years. From the Gugulethu Seven and Trojan Horse massacres to the assassination of David Webster, Klatzow's investigations reveal his fierce determination to unveil the truth in spite of overwhelming state obstructions, police bungling and cover-ups. Unfazed by controversy and unwilling to accept no for an answer, Klatzow's tenacity, fearlessness and forensic know-how are used to brilliant effect in these fascinating cases. This book exposes a demanding and sinister world where the rewards are equalled only by the frustrations, and where the truth is always elusive. But the truth is out there, and David Klatzow will find it.

Electrospun Nanofibers for Energy and Environmental Applications Bin Ding,Jianyong Yu,2014-04-10 This book offers a comprehensive review of the latest advances in developing functional electrospun nanofibers for energy and environmental applications, which include fuel cells, lithium-ion batteries, solar cells, supercapacitors, energy storage materials, sensors, filtration materials, protective clothing, catalysis, structurally-colored fibers, oil spill cleanup, self-cleaning materials, adsorbents, and electromagnetic shielding. This book is aimed at both newcomers and experienced researchers in the field of nanomaterials, especially those who are interested in addressing energy-related and environmental problems with the help of electrospun nanofibers.
