2. [What Sticks](#) Rex Briggs,Greg Stuart,2006-09-01 What Sticks is the one book that explains exactly how marketing and advertising works today! Based on new insights from analysis of over \$1 billion worth of advertising. Decades ago it was okay to believe, as retail magnate John Wanamaker did, that “half the money I spend on advertising is wasted; the trouble is, I don’t know which half.” However, today the stakes are much higher. Marketing thought leaders Rex Briggs and Greg Stuart estimate that \$112 billion in advertising spending in the U.S. alone is wasted, cutting deeply into company profits. What Sticks uncovers bold new insights from the largest-ever global marketing research project among 30 Fortune 200 companies, including: Procter & Gamble, Johnson & Johnson, Kraft, McDonalds, Unilever, Ford and others. This is a comprehensive and solutions-oriented book that outlines how any marketer, at any level, can guarantee their advertising succeeds. Marketers cannot ignore the findings or the solutions revealed in What Sticks, such as: * Why 47% of the advertising campaigns studied didn’t work and what you can do to guarantee yours does * How to spend the same advertising budget, but get better results * How to get your CFO and CEO to eagerly increase your marketing & advertising budget * How to forecast next year’s advertising budget (Hint: It’s not by using last year’s spending!) * How to immediately fix your advertising by applying these principles and real nuggets of wisdom Revitalize your advertising and join the new marketing revolution at www.whatsticks.net

2. [World Wildlife Crime Report 2020](#) United Nations Publications,2021-03-31 The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.
