earlier consultation document published in January (Cm. 7308, ISBN 9780101730822). The Command Paper published in January summarised the actions being taken by the Treasury, the Financial Services Authority and the Bank of England in response to the disruption being experienced in the global financial markets. Five key objectives were set out: (1) Strengthening the stability and reliance of the financial system; (2) Reducing the likelihood of individual banks facing difficulties; (3) Reducing the impact, when banks do experience difficulties; (4) Providing effective compensation arrangements; (5) Strengthening the Bank of England. A full summary of the proposals to meet the above objectives is set out in the first chapter of this follow-up consultation, with the remainder of the document examining the January proposals in detail.

Disease Control Priorities, Third Edition (Volume 2) Robert Black, Ramanan Laxminarayan, Marleen Temmerman, Neff Walker, 2016-04-11 The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

reimburse them for the cost of providing paid sick and family leave wages to their employees for leave related to COVID-19.
