Mathematics of Space George Legendre,2011-08-29 A new title in the Architectural Design series that explores the potential of computational mathematics in cutting-edge design Mathematics has always been a vital tool in the architect's trade, but the last fifteen years have seen a sharp rise in the power of computers and has led to computational abilities far beyond anything previously available. Modern design software and computing power have changed the traditional role of geometry in architecture and opened up new possibilities enabled by topology, non-Euclidean geometry, and other areas of mathematics. With insight from a top-notch list of contributors, including such notables as Philippe Morel and Fabien Scheurer, Mathematics in Space discusses how the advent of computation and information technology has affected the work of contemporary architects. This new title in the Architectural Design series updates architectural mathematics since the digital revolution With world-class contributors, this is an essential resource for anyone interested in the ways computation has transformed the discipline The book explores fascinating issues in modern design, most importantly the impact of mathematics on contemporary design creativity For students and practitioners alike, Mathematics in Space covers vital topics in a constantly changing discipline.

Disco Bill Bernstein,2016-11-22 The deluxe edition of Disco: The Bill Bernstein Photographs is limited to 100 signed and numbered copies. This collector's item includes a signed photograph exclusive to this edition and is presented in a bespoke slipcase. Containing many previously unpublished photographs, Disco takes the viewer on an access-all-areas tour of late-'70s New York nightlife. Who were these people of the night...? It was the Posers. The Watchers. The Posers watching other Posers watching the Watchers, watching the Dancers, watching themselves. Bernstein's eye was drawn to the characters that lived for the night, rather than the celebrities, the unknown men and women who were transformed by the nightclub haze, and this is one reason his photographs from this time feel so authentic and immersive.

Bias Bernard Goldberg,2014-07-21 In his nearly thirty years at CBS News, Emmy Award-winner Bernard Goldberg earned a reputation as one of the preeminent reporters in the television news business. When he looked at his own industry, however, he saw that the media far too often ignored their primary mission: objective, disinterested reporting. Again and again he saw that they slanted the news to the left. For years Goldberg appealed to reporters, producers, and network executives for more balanced reporting, but no one listened. The liberal bias continued. In this classic number one New York Times bestseller, Goldberg blew the whistle on the news business, showing exactly how the media slant their coverage while insisting they're just reporting the facts.

What Liberal Media? Joseph S. Nye,Eric Alterman,1990 Argues that the nature of economic power has changed and that the U.S. must develop the will and the flexibility to regain its international leadership role.

Mathematical Form Mohsen Mostafavi,John Pickering,2006 This title conveys the full impact of John Pickering's sculptures and describes the meticulous process of making them. It defines the inspirations behind the works. It discusses their engineering implications. Finally, it places them within the architectural tradition of the visionary form.

The Bible Adam Long,Reed C. Martin,Austin Tichenor,2013-05-13 This play interprets the Bible with breathlessly-paced sequence of silly vaudeville sketches, puns and crude parodies of movie and television genres.

Life is Meals James Salter,Kay Salter,2014-10-09 From the award-winning author James Salter and his wife, Kay - amateur chefs and terrific hosts - here is a lively, beautifully illustrated food lover's companion. With an entry for each day of the year, Life Is Meals takes us from a Twelfth Night cake in January to a champagne dinner on New Year's Eve. This is a book rich with culinary wisdom, history, recipes, literary pleasures, and the authors' own stories of their triumphs - and catastrophes - in the kitchen. Entries include: The menu on the Titanic on the fatal night The seductiveness of a velvety Brie or the perfect martini How to decide whom to invite to a dinner party - and whom not to The greatest dinner ever given at the White House Where in Paris Samuel Beckett and Harold Pinter had French onion soup at 4:00 a.m. How to cope with acts of god and man-made disasters in the kitchen Sophisticated, practical, opinionated and indispensable, Life Is Meals is a tribute to the glory of food and drink, and the joy of sharing them with others.

Moon-face and Other Stories Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Ijp George Liaropoulos-Legendre,2003 At a time when architectural discourse and practice are brimming with references to new geometries, ijp turns its back on the habitual perception of the 3D surface as a photosensitive, colourful and somewhat mystifying expanse. Instead, this experimental text approaches its subject through a joint meditation on abstraction, figuration, performance, symbology and form. elaborated in parallel venues, including theoretical essays on the literal and metaphoric meaning of superficial, statements of computer programming syntax, recipes, printouts of data streams, indexical poetry, mathematical asides, and descriptions of numerically controlled fabrication processes - all of which offer alternative descriptions of the very same thing: the surface as object of knowledge. A rigorous typographic treatment enhanced by custom-programmed graphics stylizes the most technical side of these various threads and weaves them into a coherent narrative for nonspecialists.

Atlas of Novel Tectonics Jesse Reiser,Nanako Umemoto,2006-03-09 Architects Jesse Reiser and Nanako Umemoto have been generating some of the most provocative thinking in the field for nearly twenty years. With Atlas of Novel Tectonics, Reiser+Umemoto hone in on the many facets of architecture and illuminate their theories with great thought and simplicity. The Atlas is organized as an accumulation of short chapters that address the workings of matter and force, material science, the lessons of art and architectural history, and the influence of architecture on culture (and vice versa). Reiser+Umemoto see architectural design as a series of problem situations, and each chapter is an argument devoted to a specific condition or case. Influenced by a wide range of fields and phenomenaBrillat-Savarin's classic The Physiology of Taste is one of their primary modelsthe authors provide a cross-section of thinking and inspiration. The result is both an elucidation of the concepts that guide Reiser+Umemoto through their own design process and a series of meditations on topics that have formed their own sense as architects. Atlas of Novel Tectonics offers an entirely fresh perspective on subjects that are generally taken for granted, and does so with a welcome punch and energy.

Cy Twombly Gallery Cy Twombly,Paul Winkler,Carol Mancusi-Ungaro,Josef Helfenstein,2013 A visual celebration of one of the most renowned artists of our time, along with the extraordinary Gallery he helped to create to showcase his work American artist Cy

Twombly (1928-2011) created paintings and sculptures that defied conventional classification. In his works, Twombly incorporated a wide variety of elements, from scrawls and calligraphic marks to text from poetry and mythology. Opening in 1995, the Cy Twombly Gallery at the Menil Collection was designed by Renzo Piano and has become a pilgrimage destination for the artist's avid admirers. The product of close collaboration between the Menil, Twombly, and the Dia Center for the Arts, the Gallery is one of the most extraordinary representations of any single 20th-century artist. Twombly chose the art that would be featured and worked closely with the builders to create the most appropriate venue for its presentation. This sumptuous volume showcases thirty-three paintings and eleven sculptures, including an immense 13 x 52-foot painting. Featuring large-scale, close-up details of many of the works, the book looks at paint, plaster, paintings, sculptures, and the cues that Twombly gave in his art about this special collection. Published in association with the Twombly Foundation and the Menil Collection

Banksy Paul Gough,2012 In the summer of 2009 Bristol saw a remarkable phenomenon that made international news. An estimated 300,000 people queued for hours, often in pouring rain, for admission to the city's museum & art gallery. They had been attracted by the media hype surrounding an exhibition ambiguously entitled 'Banksy vs the Bristol Museum'. There have been many celebratory books about Banksy, but this is the first non-partisan documentation of the Bristol event and an attempt to assess its local and wider impact. ..The book raises a raft of questions: Is Banksy a subversive influence or merely a bit of fun? Why is Banksy so important to Bristol? Is he really important? Where does the exhibition leave Bristol as an epicentre of 'street art'? It looks at the setting up of the show and questions the need - other than to conform to the required Banksy mystique - for secrecy.

Connecting Women: Activist networks Barton C. Hacker,2021 Women's networks proliferated during the long nineteenth century in the Atlantic World and began spreading globally. Abetted by transformative changes in communication and transportation (the subject of the first chapter), women established links among themselves, sometimes informally, sometimes as part of formal organizations. Most goal-oriented networks, particularly those with social and political agendas, were personal, national or transnational in nature and inevitably excluded those who did not share the goal. Such activist networks and their influences are the main focus of Part One. Topics addressed include women's national and international networks in British temperance associations; British anti-slavery societies; Italian crime syndicates; the Istanbul region of the Ottoman Empire; Philippine suffragism, early twentieth-century Portuguese political organizations, and Great War relief efforts in France. The chapters in Part Two examine the diverse literary networks that women writers enjoyed, abided, or disdained during the long nineteenth century. Included are the themes of British female utopia and dystopia; how the work of some British women poets both affected and reflected the variety of networks in which they were enmeshed; the intensely personal networks of American writers Mary Moody Emerson, Margaret Fuller, Emily Dickinson, and Alice James; Salem witches reimaged as Romantic heroines by American novelists Caroline Rosina Derby and Ella Taylor; the efforts of Southern autobiographers Rebecca Harding Davis and Elizabeth Avery Meriwether early in the twentieth century to negotiate a place for themselves and the South in American national history; and the significance of women's networks present in the South and absent in Brazil as depicted in Evelyn Scott's 1923 memoir--
